POULTRY NOTES

ITEMS THAT WILL INTEREST OUR POULTRY RAISERS FROM FAR AND NEAR

Put your brains to work if you are engaged in poultry raising. Don't simply build houses and fill them with good stock and lay down on the job. All progress is the result of thought. The great centers of commerce are the product of thought; likewise the marvelous modern civilization in every particular and of which you are a part. You will never get anywhere worth while by any other process. It all depends on what's doing under your hat. There is the fountain of your success in poultry culture or in anything else. Are you numbered among the ones what put your brain to work or those who lay down on the job?

Don't try to make those pullets lay too soon, but rather put bone and muscle in them, making them completely mature before you force them for winter laying. Your object should be to grow fowls as large as possible and the only way you can do it is to feed them and house them correctly. You ought to be disappointed to see your pullets at half size laying pigeon eggs. Keep them well fed till they are long bodied, full breasted, ableto defy the blasts of winter and lay large fine eggs under all condition. Expand them. Build them into mighty egg machines. You are after big birds, birds that challenge the admiration of the poultrymen whenever they see them.

Keep your eye on the hen that moves her roosting place. Mites or lice are likely after her. Keep the hen house clean. Carbolineum is the best mite and lice killer of which we know.

Poultrymen have the best prospect they have ever had for a most successful year. Get ready for the coming season with vim and you are a sure winner.

During the next three months the price of eggs will be high. The only way to get them is to feed for them and feed right. It pays—we know.

By the installation of big mash mixer Mr. P. M. Brooks has done a real favor to our poultrymen. Mr. Brooks intends to mix a standard mash for our poultrymen that is universally used. We advise our poultrymen to buy this mash from Mr. Brooks. It will be much cheaper than the commercial mashes and will be just as good or better. Mr. Brooks intends also to mix a standard mash for young chicks next winter and spring which will be more practical than the widely advertised commercial chick mashes.

Keep your eye on the weather these fall days and don't let your hens get in the draft and get roop started in your flocks. It is a beautiful and treacherous time of the year. Forewarned is forearmed!

Turn your flocks out on the fall and winter pastures, keeping them out as far into the winter as possible. With exception of a few blustery or wintry days, we let our hens on the range at the Bramble Poultry Farm every day in the year. You may get a few less eggs, but you have better breeders.

Round up the pullets and put them in snug winter quarters as soon as possible, providing they are fully developed. If not, keep them on the range as long as possible.

WEDDINGS

(Other Weddings on page 7)

Elliott F. Boulter and Rosie May Watson were married on Wednesday evening, Oct. 2, at the Wesley Chapel parsonage by Rev. Charles H. Reed. Four cars packed with relatives and friends made up the procession that came to witness the wedding. The bride was beautifully attired in a dress of blue satin trimmed with Spanish lace and wore a blue picture hat. After the ceremony, the party proceeded to the home of Mrs. Sadie Boulter for a reception.

The home of Mr. and Mrs. H. C. Stanley, Kennedyville, was the scene of a quiet but pretty wedding on Tuesday morning, Oct. 2, at 11 o'clock, when Miss Elsie Ethel Happel, of So. Charleston, W. Va., sister of Mrs. Stanley, and Mr. James Harvey Gearhart, of Blue Ridge Summit, Pa., were united in marriage by Rev. Dr. Trout, of Kennedyville M. P. Church. The bride was handsomely attired in a dress of navy flat crepe, with hat and gloves to match, and corsage of pink rosebuds and lillies of the valley. The groom wore a navy blue suit. The house was beautifully decorated with potted plants and cut flowers of the season. The pretty ring ceermony was performed in front of a beautiful background of flowers. Immediately after the ceremony a dinner was served; the table was decorated with a pretty wedding cake and flowers. Mrs. Gearhart is a daughter of Mr. and Mrs. Carl Frederick Happel, of South Charleston, W. Va., and has been a teacher in the Charleston schools for a number of years and worker in al lactivities of the school and church work there, where she will be greatly missed. Mr. Gearhart is a graduate of the Philadelphia College of Pharmacy and son of Mr. and Mrs. John Gearhart, of Blue Ridge Summit, Pa. The happy couple boarded the afternoon train at Middletown and went to Philadelphia and from there to Piney Mt. Inn, Fayetteville, Pa., where they will spend a quiet honeymoon, after which they will reside at Blue Ridge Summit, Pa., where Mr. Gearhart is engaged in business. They have the good wishes of their many friends.

MILLINGTON

Mrs. J. S. Smith was the guest this week of Mrs. O. H. Connelly, of Townsend, Del.

Mrs. Ella White and Miss Cyntha Nelson sepnt last Tuesday in Wilmington.

—Automobiles have become so plentiful in Kent county that the parking problem on Saturday nights has become quite a large one. On some Saturday nights there is difficulty in finding a place to park.

The Most Extraordinary Farm Electric Plant Opportunity Ever Offered to the Farmers of This County

A Whole Carload of the Famous Delco-Light plants-Your Chance to buy at a big Saving

Notice

The Delco-Light Plants referred to in this special offer are standard Delco-Light Plants, fully covered by the regular service guarantee as to material and workmanship, and fully protected by the liberal service policy. Each plant has the famous 4-cycle, air-cooled, valve-in-head Delco-Light engine, and the thick-plate, long-lived Delco-Light Storage Battery. Any one purchasing a Delco-Light Plant as a part of this special carload order is assured of the same satisfaction he would receive in placing his order individually,—the same satisfaction now enjoyed by 175,000 Delco-Light users.

I KNOW that there are dozens, yes, hundreds of homes in this county where Delco-Light is needed and wanted. For you have told me that some day you would want the blessings of electric light and power.

You have visited your neighbors. You have seen the bright atmosphere of their homes,—happy, joyous children whose lives have been gladdened, the mothers from whose shoulders the burdens of toil have been lifted, the fathers whose interests in life have been broadened, and whose profits have been increased,—all because of Delco-Light.

And now, folks, I come to you with an amazing offer. Only a few of you—only those of you who will join me in a great project of co-operative buying can share in this remarkable offer.

To you I am going to offer Delco-Light—the standard electric light and power plant—installed, equipped, including the lighting fixtures, all ready to flood your home with the blessings of electrical sunshine at a price that has heretofore been unheard of. You can save by acting *now*.

Will You Join Your Neighbors In Buying a Carload of Delco-Light Plants?

I have made a proposition to the Delco-Light Factory. I have told them that I want to place a large quantity of plants in this county during the next few days. I have asked them if they will ship a whole carload of Delco-Light Plants direct from the factory to me.

I explained to them what a fremendous benefit it would be to me to have that many more satisfied users of Delco-Light in this county. These new users would show Delco-Light to their friends and neighbors and talk about it, and as a result it would help me wonderfully in selling more and more plants. The Delco-Light Company is willing to ship the carload, which will result in a great saving in freight. And I have added my generous bit. I will do the wiring at a ridiculously low figure. I will give absolutely at cost a generous part of the equipment that is needed to get the benefit from Delco-Light.

Are You Ready?

Due to this wonderful plan you can now have Delco-Light for less money than ever before—probably half of the cost that you expected.

Through the wonderful benefits of co-operative buying you can now give your family that joy and happiness that is only possible through electric light and power. You will have power to do the chores, for the washing machine, the separator, the churn, the feed grinder; electricity to heat the iron, to pump the water, and light—clean, safe, economical light that transforms your home from a place of danger and gloom to one of cheerfulness and deep content.

The number of plants that we have arranged to get on this plan is limited. You will have to act quickly. You will have to respond immediately. But the terms are so generous, the price so low, the advantages so great that if you ever at any time in the future expect to modernize your home, to make it a better, healthier, happier place in which to live and work, *now* is the time to do it.

Don't wait one minute. Simply mail the coupon. This does not obligate you in any way. It merely indicates that you are interested, and we will send you full details of the plan; we will tell you of the wonderful savings, and quote you a price such as you have never believed was possible. Mail the coupon or telephone now. This is the first time such an opportunity has ever been offered, and it may be the last. Act *now* if you want to save.

Why Worry About Coal Supply Th Winter?

One of the greatest labor-s home comfort inventions years is the oil-gas burne ables one to use common cheap distillate for heating The coal shortage of the years has set the minds of and the heating experts up lem of securing a cheap fuel to replace coal, and t Oilver oil-gas burner has to be very satisfactory.

Now there is a burner makes of furnaces and co heating stoves. Railways, companies and many hom and industrial plats are us burners with great satisfac fuel cost alone is about th coal, but there is a great many other ways. The oil about one tenth the space a of coal for an equal amoun and the heat can be contr maintained at the desired ture a great deal more re the oil. In the home there in health, comfort, clean dom from worry and the shoveling coal, keeping and carrying out ashes. burner furnishes a stead odorless heat supply at a valve.

The use of coal is nev factory, even when che ful. Big laundry bills, and a layer of coal du present. The tempera never constant. You fire and the house be hot. The fire dies d ature falls, the hou then you build it up never the proper breds colds, sickne monia, particularly subjected to these

Why go through ant situation this in the past? Why a freezing house a up the fire and s stand around an wait for the he bother hauling around sifting janitor be a m plead with for s wife struggle wi of shovelling coal onto Think of the hours your business pleasur coal fires. There are to the Oliver: no m fed to the burner b forced into it, (presu the noise in an oil bu secure a scientifically ly safe, practicall efficient oil burner that it will amaze time to install your of thousands of h equipped with Olive fect satisfaction The be installed duirng ths. You will inst yourself. You migh ting the benefits n only make you regr that you did not Write or phone for tion or a practical your home, to
