Make More Money

FROM YOUR CORN AND FEED

Ground corn goes further and gives [illegible] results than Whole Corn says your [illegible]vernment. If it pays to grind some of [illegible]ur corn, it will surel pay more to grind your feed. We have on our floor Mills many sizes for this purpose.

The Small No. 6 New Holland Mill to [illegible]e with the 1½ H. P. Engines.

The No. 6½ New Holland Mill to use with the 3 H. P. Engines.

The No. 10 New Holland to use with the 5 or 6 H. P. Engines.

The No. 10 Type D—I. H. C. Mill to use with 8 H. P. and larger Engines or for use with the Tractor.

It is hardly necessary to say that these Mills all carry the standard guarantee, have been sold very extensively here and are giving splendid satisfaction.

The I. H. C. Mill will grind Hay, Corn, Fodder or any kind of Grain.

We have one used Mill, has 10 inch plates, an extra set of New Plates; fine for 8 or 10 H. P. Engine or Tractor, in good condition only $35 00.

THE MODERN FUNERAL

The methods and systems in vogue a few years ago, and still [illegible]hered to by many, are no longer applicable in this age and [illegible]neration.

A better understanding of the duties of the funeral director [illegible]hanged the old order.

[illegible]e of the most difficult problems confronting the modern [illegible]l director will be solved when the public realizes that [illegible]CE is the principal, and, in fact, only commodity which we [illegible]o offer.

[illegible]e casket and funeral appurtenances are negligible, or [illegible]lly so, requiring little or no experience, and, in the mat[illegible]xpense, consistent with the cost of production.

[illegible]VICE is the main considerataion—the care and disposi[illegible]the body of the one who has passed on, knowledge or [illegible]nd a readiness to relieve the burdens of the ones who [illegible]to mourn.

[illegible]principal reasons for EMBALMING are: (1) Sanitation, [illegible]an absolute prevention of communication by infection; [illegible]he restoration of color and form.

[illegible]lming is not, as is generally supposed, a lost art. The [illegible]MBALMER is a thoroughly trained sanitarian, a student [illegible]y and chemistry. In his work he employs none of the [illegible] barbarous methods used by the ancient Egyptians.

Is there anything dearer to the heart of a woman than a real beautiful kitchen range? To witness the crowds at Wm. A. Hyland's, Galena, Md., attending the special exhibit of the Majestic Range, one would think not. An expert from the Majestic factory is here for the week, and the way he shows the advantages of the Majestic heat-tight construction makes possible the accurate control of the heat while baking and how the linings and hidden construction are such that give long life to the range. It requires no expert to point out the smooth, lustrous finish of the Majestic Range—these speak for themselves. The new 1923 Model has many, many improvements and is the last word in finish and design. See adv. on page 2.
