CHIROPRACTIC

Chiropratic is a Drugless Method based upon natural laws and does not include any thing included in Medicine, Osteopathy or Massage.

Speaking of Chiropractic, Dr. Alfred Walton, M. D., D. C., of Philadelphia, a famous medical writer, writes: "I have personally seen cures effected by spinal adjustments by young men who have had a thorough instruction concerning the spine whose skill in curing disease should make the most brilliant surgeon in the land ashamed of his incapacity. Chiropractic is so much superior to the drug method that it is truly laughable to compare them.

Dr. Chas. Mayo, of the famous Mayo Bro's. Hospital at Rochester, Minn., who is considered to be the worlds greatest surgeon says: "Yes surgery will some day give away to drugless healing. The Drugless Healer is one of the best things that have come into the life of the present day."

Dr. A. A. Gregory, M. D., states in his own writing: "We know (admit) that most diseases are not amenable to our ordinary method of medical or surgical treatment while under spinal adjustments acute diseases are cut short and aborted, and chronic cases recover which have been believed to be incurable.

Dr. R. N. Smith, M. D., before the Academy of Medicine in New York read the following paper: "The most severe case of renal colic which it has been the fortune of the writer to see, was attended by a dozen members of the Staff of a great Boston Hospital, where surgical interference was the unanimous advice after exhausting all other regular procedures, was cured instantly by manual adjustment of the ninth dorsal vertebra of the spine which was palpably out of its normal position."

Quoting Dr. T. H. Patchen, noted medical writer he says: "Chiropractic adjustments eliminates the cause of disease more promptly, radically and permanently than any other known method."

These quotations are from men learned in their profession. They speak independently because they are supported by endowments and can speak the truth without fear of ostracism. They are men who are the recognized leaders of their profession, hence their evidence should bear weight. Their opinions should weigh more in your mind than those of the small town doctor, who cannot see Chiropractic because he is over-filled with prejudice against a competing profession.

Copies of the original statements published here are on file in this office, and can be seen by interested parties.

If you want to learn more regarding Chiropractic get your information from a direct and reliable source. Call on a competent Chiropractor who has made a deep and thorough study of the spine and its relation to disease and health. He alone can give you reliable information.

If you are sick of being sick, and have tried every thing else, try Chiropractic and get well.

Chiropractic never injures a patient nor produces any harmful effects. Call for a spinal Examination.

"There is a principal which is a bar against all information, which is proof against all argument and which cannot fail to keep a man in everlasting ignorance. That principal is condemnation before Investigation." Herbert Spencer.
