Poultry Notes

ITEMS THAT WILL INTEREST OUR READERS IN ALL BRANCHES OF POULTRY

The bantan rooster crows louder than any other rooster, and he is the smallest rooster on the farm.

A number of local breeders can truthfully testify that poultry pays.

We have had theories without number concerning the best way to select laying hens. One "expert" says select the hen with a body which is narrow in front and grows wide and deep at the rear. Another will tell you the hen with a comb larger than the average for her breed should be selected and Hogan and Potter will sell you their systems for a moderate price. Without discussing these theories and without discussing or calling into question the merits of any of them, the fact remains that the only definite and certain way to select the best layer in a flock is to install trapnests and find which hen is trapped oftenest.

English papers state that World War officers have taken to raising poultry quite extensively in England.

The poultry bulletin published by the government and by several states are free for the asking. They are reliable and instructive. Send for them.

Young and inexperienced breeders should go slow, examine carefully the way, raise at first one breed only and stick to it, determine to become one of the best breeders of that variety, read about it, study its pecularities, take the best care of it, and talk and think about it.

Earnest efforts count in every industry, this is specially true in poultry production.

Who cannot learn in the poultry business No one knows it all, and the sooner we realize it, the better.

Poultry experiments are usually accompained by special interest for the the fact that there is always the question of chance whether or not they will prove desired results. Probably the majority of experiments fail while the value of those that make good prove of greatest value and also prove unquestionably that those who try and don't give up will prove winners in the end.

The new Standard demands greater quality in our breeds and varities of poultry. While it is more explicit and more easily understood, it also is more severe in all its demands in a way that promises more popularity and progress. This Standard well meets the demands of this age of advancement and poultry interests will benefit hereby.

There really should be no end to the hatching season. There is a demand for both early and late chicks and each assures it profitable. The creative mind never knows where to stop. If it did, its life would begin to crumble.

The Bramble Poultry Farm hatchery is still operating at almost full capacity

Early hatched chicks are now ready for the airy roosting coops and the range.

If troubled with crows, hawks, skunks or rats stealing and killing chicks, go gunning for them.

While we are improving our fowls in all other respects and bringing them to a higher degree of excellence, we should aim to give them an inheritance of parental strength and vitality, and avoid the necessity for attributing the frailty and debility of our fowls to inbreeding. Unfortunately many flocks of fowls which show a lack of vitality, and strength of constitution, have attributed to them the influence of inbreeding as the cause when, if properly investigated, the baneful influence of immature parentage might justly be assigned as the cause.

ROCK HALL

Children's Day at Rock Hall M. E. Church was celebrated last Sunday.

Among our home comers from school are Miss Myrtle Culley, Miss Gladys Culley, Mr. Alfred Culley, Miss Frances Orr, Miss Virginia Thompson, Miss Gertrude Willson, Miss Lorraine Urie, Miss Louise Kendall and Miss Louise Hepbron, the latter two being graduates at the State Normal School.

Mr. Dulaney, who has been living in Swan Creek, has sold his home to Mr. Phipps, of Baltimore, and moved back to that city.

Mr. Jefferson D. Ayres has purchased the property of the late John Coleman and will enlarge and improve it.

Mr. John W. Downey sold two building lots on Sharp street to Fred Williams.

Mrs. William Revelle consulted physicians at a Baltimore hospital for an infected arm that started from the puncture of a rose thorn.

Mr. Robert Lewis is making very good progress following an operation for appendictis at a Baltimore hospital.

About dusk last Thursday Mrs. Walter Legg was paralyzed while in a carriage in Rock Hall. Her son, Mr. William Smith took her at once to a physician and then had her taken home but she has shown no sign of consciousness since. Her son, Mr. Irvin Smith, of Belair, came to visit her.

Mr. Walter Davis, of Baltimore, spent the week end with his parents, Capt. and Mrs. C. E. Davis.

Mrs. Charles H. Jones received a birthday surprise visit from her children last Saturday evening. All had a pleasant time and enjoyed the ice cream and cake they took along.

Miss Mildred McCrea was guest last week of her aunt, Mrs. Thomas L. Rich, and Mr. Rich, returning to her home in Baltimore Saturday.

Mr. and Mrs. William H. Jones entertained for the week end their children, Mr. and Mrs. Clarence Moffett, Mrs. Sallie Chance and Nora and Mr. Hynson Jones, of Baltimore.

Mr. and Mrs. J. W. Boyer have as guests their son, Mr. Leroy Boyer, superintendent of the German Orphans Home at Catonsville, Mrs. Boyer and son, Elroy, besides Mrs. Mary Henning of Baltimore.

Mrs. Joseph Jones and children of Bridgeton, N. J., were guests from Friday to Tuesday of Mr. and Mrs. John Thomas and other friends.

Mr. and Mrs. Henry Sewell came Friday on a visit to their relatives, Mr. and Mrs. Frank Sewell, returning to their home at Shiloh, N. J., Tuesday.

Mr. and Mrs. Edward Sewell, of Shiloh, were week end guests of the latter's parents, Mr. and Mrs. Lewin Hyland.

Mr. William Camp, of Wilmington, Del., spent last week with his sister, Mrs. Notley O. Willson.

Quite Proper

Bobbed Bandit: "Hands up!! If you move you're dead."

Gent from Boston: "Mercy—such English—Don't you know if I move it is a postive sign I'm living, ol' dear?"

DODGE BROTHERS TOURING CAR

Important Improvements

New Front Axle Makes Driving Easy

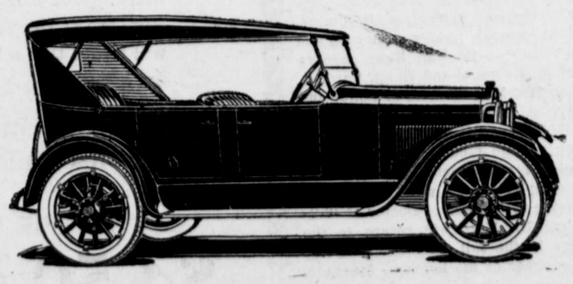

The front axle has been strengthened for greater margin of safety and redesigned to afford greatest possible ease in steering.

Springs Now Very Long and Underslung

The rear spring is underslung and semi-elliptical in type It is increased to 55 inches in length—ten inches longer than the old spring. Riding ease is now a feature of Dodge Brothers cars.

The front springs have been increased from 1¾ to 2 inches in width and are composed of more leaves of thinner stock, thus greatly improving riding comfort.
