ROCK HALL

Miss Kathleen Urie, of Baltimore, is spending the week with her parents, Capt. and Mrs. Frank Urie.

Miss Mary Louise Lewis and Mr. Herbert Hutchins, of Baltimore, were week end guests of the former's sister, Mrs. William Francis, and Mr. Francis.

Capt. and Mrs. Frank Davis visited their son-in-law and daughter, Mr. and Mrs. Irvin Smith, at Bel Air, from Saturday to Monday. Miss Florence Hogans accompanied them home for a visit.

Mr. Timmerman has returned from Solomons and is erecting a dwelling at Gratiitude.

Foundations are being laid for Mr. Chas. Davis' new bungalow on Sharp street.

Mr. and Mrs. Benjamin Durding and daughter, of Baltimore are spending a couple of weeks with the former's parents, Mr. and Mrs. Wm. P. Durding, and Mrs. Durding's grandmother, Mrs. Jane McKiyett.

Mr. and Mrs. John Dowling had as week-end guests their son, Mr. Maurice Dowling, wife and child, of Baltimore.

Mr. and Mrs. Millard Sewell and child and Mrs. Frank Joiner and son, of Baltimore, were week-end guests of the ladies parents, Mr. and Mrs. Benj. F. Sewell.

Mr. Clarence Hersch spent the week-end home from Baltimore.

Dr. and Mrs. W. O. Selby entertained for a few days recently Mrs. J. Page Strong and son, Gordon, of Baltimore, Miss Edna Strong and their son, Mr. Owen S. Selby, of Millington.

Mr. Reginald Downey, of Baltimore, was week end guest of his father, Mr. John Downey.

Mrs. John E. Joyner spent the week end with her husband in Baltimore.

Messrs. William and Maurice Durding, of Baltimore, visited their parents, Mr. and Mrs. William P. Durding, for the week end.

Miss Edith Wachowiz spent the week end from the State Normal School with her parents, Mr. and Mrs. Michael Wachowiz.

Messrs. George and Arthur Downey, with the latter's wife, of Shiloh, N. J., are guests of Mr. and Mrs. Joseph Hynson, Jr., on The Haven.

Mr. and Mrs. John Diehl are moving today to Little Creek, Del.

Mr. Edgar Judefind spent the week end at home from his employment in Chester,Pa.

Mrs. Sterling Crouch is making a visit to her sister, Mrs. Pearl Wheat in Baltimore.

Mrs. Walter Coleman was a visitor in Baltimore a few days last week.

Mr. and Mrs. Russell Sewell entertained over the week-end Miss Emma Ritter and Miss Maud Shaffer, of Baltimore.

Mr. and Mrs. Roland Warner and daughter, Lorraine, were week end guests at the home of the former's sister, Mrs. Charles Jacquette and Mr. Jacquette, at "The Shipyard."

Mrs. Marion Parsons and children, of near Chestertown, were guests Friday and Saturday of Mr. and Mrs. Walter Coleman.

Mr. and Mrs. George Wooley entertained a Hallowe'en masquerade party on the evening of the 31st.

BETTERTON

The ladies of the Methodist church held a successful supper last Saturday evening in the basement of the church, the proceeds being about $140.00. The Ladies Aid Society also served lunch all day on election day in Crews Ice Cream Saloon.

The "witches and ghosts, acted as hosts" last Friday evening at a Hallow'en social given by the Epworth League, masqueraders of all ages entering into the fun from the grandmothers down to the three year olds.

The soccer team again met the Chestertown boys last Friday afternoon on the Chestertown field and again ended in a tie 0-0. The Betterton boys have played well this season and while they have not won a game neither have they lost any.

Mr. Dixie Smith and Miss Smith, of Fairlee are spending the week with Mr. and Mrs. James Brice.

Mr. and Mrs. J. H. Gooding, of Baltimore, spent the week end with Capt. and Mrs. George Moore.

Miss Grace Tull has returned to her school in Baltimore after being at home for several days, Mrs. Tull returned to Baltimore with her.

Mrs. Howard Leigh and son, John Scott, of Baltimore, are visiting her mother. Mrs. Scott Crownhart.

Mrs. Willie Owens spent the week-end with her parents, Mr. and Mrs. Davis at Rock Hall.

Mrs. Arthur Brice has returned to her school duties after being away for three weeks because of illness. Mrs. Harvey Moore substituted for her during her absence.

Mr. and Mrs. Littleton Crew spent several days in town this week.

Mrs. Flora Clark and daughter were called to Philadelphia this week to attend the funeral of her mother-in-law.

Mr. and Mrs. Alfred Greenwood have moved into one of Mr. James T. Crew's cottages recently vacated by Mr. and Mrs., Crownhart.

—Weather prophets sometimes base their predictions on the crop of acorns. If the crop is plentiful, then the weather will be severe. If a light crop, then the winter promises to be mild. Authorities state that most oak trees bear acorns but every other year, and when the off year for bearing comes around then a scarcity of acorns is reported and a mild winter predicted. We notice the oak trees in Kent have but few acorns on them.

FARM NOTES.

ITEMS THAT WILL INTEREST OUR KENT AGRICULTURISTS

The testing of dairy cattle for tuberculosis which has been in progress in Queen Anne's County has resulted in the recent elimination of approximately sixty head of reactors, reports County Agent E. W. Grubb.

The increasing importance of dairying in the United States as a source of the Nation's food supply is strikingly brought out in a study just completed by T. R. Pirtle of the dairy and poultry products marketing division of the United States Department of Agriculture. The per capita consumption of milk and cream has increased about twelve per cent. during the past ten years, and per capita consumption of butter has increasel more than six per cent., Mr. Price says.

Shipping point inspection, a comparatively recent development that is helping to solve the problem of marketing farm products, has had its trial in Maryland and has proven eminently satisfactory to the limited number of fruit growers to whom it has been available.

Sheep lore in Maryland is increasing. Stories of record wool clips, of highly productive ewes, of profitable early lambs and of pure bred flocks, are accumulating. To these must be added the latest from William B. Morgan, of Piscataway, which is told rather effectively by the photograph. Four lambs were nurtured by this cow, says Mr. Morgan. Early in their careers, a half bushel measure was turned upside down and, with their forefeet on this, the lambs obtained their meals. The cow became very found of the lambs and even took part in their sport at times, running and playing with them, says Mr. Morgan.

Many a valuable bull is rendered useless by improper care and management, says the United States Department of Agriculture. The importance of exercise is often underestimated, and many bulls, after their value has been proved, are found to be sterile or slow breeders, due largely to close confinement and lack of activity. This is more true of dairy bulls, perhaps, because of their temperament, which makes them more difficult to handle.

With thirty-five growers whose fields have passed the initial inspection required for the production of certified seed potatoes, Worcester and Somerset counties bid fair this year to produce the bulk of the certified seed potatoes grown in Maryland and to transfer to the Eastern Shore the distinction for this particular phase of agriculture hertofore held by Garrett and Allegany counties.

Slaughter of nearly 80,000,000 animals in establishments operating under Federal meat inspection during the year ended June 30, 1924, is shown by figures recently complied by the Bureau of Animal Industry, United States Department of Agriculture.

Hogs were the most numerous of all classes of stock, there being 54,416,481 of these animals slaughtered.

Calves slaughtered during this record-breaking year numbered 4,667,948. Cattle and sheep killed under the supervision of Government inspectors numbered 9,188,652 and 11,505,001, respectively.

This record slaughter of animals indicate an increased total meat consumption in the United States, as would be expected with the growing population.

Poultry Notes

ITEMS OF INTEREST CONCERNING RAISING OF CHICKENS FOR PROFIT

There is nothing very cheerful to be said about the poultry market these days, in fact it might be said to be in a slump. There is a continuous movement all the time, of course, but it cannot be said that it is anything like activity, and the one market is very little different from the conditions elsewhere. The arrivals of about all grades of stock is greater than the demand calls for, and prices have been easing as a natural consequence. There seems to be nothing like a keen demand in any section, but fat hens of 4½ pounds up and high-grade springers attract the greater amount o finterest.

Farmers seem to be busily engaged in weeding out their flocks, but some of them are said to be using very poor judgement in sending all sorts and con. judgment in sending all sorts and conditions, a large share being thin and of dispose of them except at very material concessions, most of them going to Arabs.

Ducks, which were in fair demand a week ago, have been coming in much more rapidly and are exceeding the demand to such an extent that quotations have been lowered in an effort on the part of dealers to clean up. The receipts of turkeys are a trifle more liberal and at the present time there is a reasonable demand, but any material increase in receipts is likely to bring about a price drop, as the demand is not sufficient to take care of more than moderate receipts.

Eggs are continuing their upward may, but there are some clouds in the sky. Some dealers are of the opinion that the price will go to 60 cents before many days, but that is considered to be the limit. There, they say, will come the turning point, with prices going lower almost as rapidly as they have been going up.

One of the most interesting and one of the most important problems which comes to the attention of every poultry raiser is that of compounding and mixing the rations for his birds. When considering the home compounding of rations there are a number of factors which must be careful considered. The first requisite in compounding and mixing a successful ration is that it contains a sufficient amount of actual feeding material. You will remember we call these nourishing parts or feed nutrients. These are of several kinds, more notably protein, carbohydrates and fat. The nutrients in ration can be expressed either in the amount of these ingredients required per bird or in the amount required per 100 pounds of live weight. Owing to the great variation of the weights of birds it is generally expressed in the latter form.

There are two ways of expressing the amount and proportion of nutrients present; that is, first the amount of each of the three nutrients in 100 pounds of the feed, and secondly, the heat and energy which the ration will develop when consumed. For instance a ration containing 100 pounds of protein and 400 pounds of carbohydrates and fat can be expressed as having a nutritive ration of one to four meaning that to every pound of protein present there is four pounds of carbohydrates and fat. In order to express a nutritive ration in its simplest terms the nutrients must first be reduced to the same value; that is, we must get all protein together, all carbohydrates together, and all of the fat together.

Will a great layer produce great layers? She will, if you will give her half a chance. High authorities a few years ago came to the conclusion that fecundity is not hereditary. That was a big joke—tho the "authorities" did not so intend it. You may as well say that a black skin isn't hereditary, a Roman nose, a high instep, musical ability, brains or anything else. Yes, a hen that will lay 200 eggs in a year and come thru looking as tho she had the time of her life in doing it will produce daughters of the same kind—that is, if the father of those daughters is of like heavy-laying blood. Also, if right care is given to her and to her offspring. She may not do it every time; but the Rule will hold. That's the way you can get profitable birds—breed from profitable birds.

Johnny's First Aid Adventure.

A few days ago Scout Johnny Jones saw his father go out to the garage, a small tight building on the back of the lot.

Mr. Jones went through the little side door and closed it after him as it was a bitter cold morning.

Johnny heard the engine start and knew that "daddy" was going to warm the engine up a bit.

Mrs. Jones called Johnny and asked him to help move some furniture in the front of the house.

Later Johnny went to the back door and hearing the engine still running in the garage, he decided to see what "daddy was doing.

When he opened the door he saw his father lying on the floor, unconscious, and apparently dead.

Johnny rescued his father and treated him properly.

What would you do Scouts

Next week tells what Scout Johnny Jones did.

STILL POND

Miss Inez Russell, of Chestertown, spent last week end with her friend Miss Lucille Parr.

Mr. and Mrs. Harry Wheeler and daughters and Mrs. Bertie Knighten, of Baltimore, visited Mr. and Mrs. Carl Norris, Saturday and Sunday.

The Ladies Aid Society meets on next Wednesday afternoon at the home of Mrs. Wm. Bonwill.

Mrs. Wilson Smith, of Philadelphia, spent the past week with her daughter Mrs. Carl Norris.

Mrs. Elizabeth Price is visiting her daughter Mrs. Harry Redding, near Georgetown, Md.

Miss Elizabeth Hague, of Philadelphia, spent last week end at her home here.

Mrs. S. J. Stanley is spending some time with her son Mr. Harry Stanley at Kennedyville.

BODY FISHER

Here at Last

A *complete* Coach that rivals many a Sedan in beauty, in completeness—in *everything*, except price!

L-Head Engine

Most of the finer cars have engines of the L-Head type! Oldsmobile is one of them! It is a speedier, more powerful and more economical engine!

Fisher Body

Its body is built by Fisher—with a staunch hardwood frame, steel-paneled from floor to roof.

Duco Finish

Naturally only the finest of rich satin Duco is good enough to finish such a body. More beautiful than paint and varnish, and much more enduring.

Appointments

This Coach has the new Fisher V.V. one-piece ventilating windshield, with automatic cleaner—cowl lights—Ternstedt hardware—extra wide doors—*everything!*

Chassis

Delco electrical equipment—Harrison radiator—a positive pressure feed lubrication, and dry disc clutch.

Price

Only because Oldsmobile shares in the combined purchasing facilities of General Motors, can you buy a Coach like this for only $1065, f.o.b. factory!
