BAY NOT POLLUTED

Conservation Commissioner Earle Says Oysters and Fish Are Both All Right.

A system of inspection and supervision to settle all suspicions of pollution in the oyster industry of Maryland is being perpared by the State Health Department and the Conservation Commission with the cooperation of oyster men and packers, Swepson Earle, State Conservation Commissioner, announced yesterday.

Mr. Earle plans to add a biological division to the Conservation Commission, which would supervise oyster beds and detect pollution before the oysters enter the packing houses.

In addition to a biologist a bacteriologist would be employed by the commission, he added. Mr. Earle will lay the matter before Governor Ritchie this week.

"The Chesapeake Bay is in a healthier condition than any other oyster-producing section in the country," Mr. Earle declared. "We have no large summer colonies from which pollution might result.

"The natural conditions in the bay are such that a minimum of precaution is needed to keep it free from pollution With the exception of waters near the larger towns, where restricted areas have been marked, there is no pollution in the State."

MARYLAND OYSTERS ALL RIGHT

Maryland's oysters have been given the stamp of approval by the Maryland State Department of Health following a meeting of the Department head with Dr. John S. Fulton, State Director of Health. For some reason, Dr. Fulton said, reports have been current that the State Department of Health was thinking of placing an embargo upon Crisfield oysters. There is not the slightest foundation for the rumors, he declared, adding that Crisfield oysters and Maryland oysters are satisfactory.
