Tuberculosis Association Active

The Maryland Tuberculosis Association, Inc., has made a special effort throughout the State, to bring about a more adequate enforcement of existing laws covering promiscuous spitting.

To prevent the spread of tuberculosis, every man, woman and child should learn the common fact about this terriable disease. The specific cause of tuberculosis is a small germ which is taken into the body with dust laden air that we breathe or diseased foods that we tat.

One who insists on coughing and spitting anywhere should be made to stop it as he is a source of danger to his family, his neighborhood, and all who come in contact with him. The germ from a consumptive sputum has many ways in which to reach others, and add them to its list of victims, such as for bedding, handkerchiefs, towels. dishes, floors, etc.

You cannot get this disease unless you receive the germ from someone who is already infected. If you keep yourself in good health, the germ will not hurt you when you are exposed to them. They only effect "run-down" people or those otherwise in poor health.

It is necessary, however, for everyone to be careful about spitting in places where the germs have opportunity to be transmitted to others. No one would think of leaving a loadtd revolver lying in the street where someone might kick it or step on it—possibly resulting in the injury or death of a passerby. It is just as important for us to realize the devastating power of the tuberculosis germ which is left lying around through carelessness or lack of knowledge.
