FIRE TRUCK SATISFACTORY

Sleeping Quarters For Two Men And Drying Tower For Hose To Be Added

Much interest is being manifest by the Chestertown Volunteer Fire Co., in giving to the town and county likewise neighboring communities the best of protection against loss by fire. In addition to the new county truck plans are under way looking toward the erection of a drying tower, with which the hose equipment may be always in first class shape, also means added life to the same, there also will be "bunk" accommodations for two men placed in the fire house.

With a couple of the firemen always on hand at night, thus saving much valuable time in case of night calls.

Word has been received that the test recently made by the Board of Underwriters of the new truck was satisfactory and with the addition of a drying tower and the placing of two bunk men in the fire house an additional cut in the insurance rate is looked for, which means much to the business interests of the town.

While a cash settlement was made for the new truck it was necessary to borrow money from the bank to make this possible. There is yet needed more than a thousand dollars to clean up this debt and it is hoped that those who desire to aid with donations to this worthy cause will send in their cash or check to Treasurer B. B. Bartley. A list of all making donations will be published in the county press.
