## Install Oil Burners In Furnaces

Why worry with coal for your furnace with its uncertain heat, soot, ashes and constant work and bother, when you can have an oil burner INSTALLED COMPLETE FOR LESS THAN $200.00 with a positive guarantee of heating satisfaction. An oil burner is one of the most essential of all modern home conveniences.

We have heated our large frame house for the past two years with an oil burner in a steam furnace with perfect satisfaction. The owners of ten other homes in which I installed burners like ours the same fall are enthusiastic over their oil burners, and my wife says she would not take a thousand dollars for ours if she could not get another like it. She never has to bother with the furnace when I am away from home or worry over having plenty of heat all the time. It is practically noisless and the oil is very little if any more expensive to use than coal. No janitor is needed to tend the furnace.

I can install for you and guarantee it to give you heating satisfaction, if, after an examination, find your conditionns suitable for oil heating. Phone or write me, giving size of house, make of furnace and average amount of coal used in a season, and I will help you to secure satisfactroy heat if possible.
