FOUNDERS' DAY CELEBRATION

ONE HUNDRED AND FORTY-THIRD ANNIVERSARY OF THE VENERABLE INSTITUTION OBSERVED WITH APPROPRIATE EXERCSIES

In spite of the most inclement weather which prevailed all during the time set for the occasion, Founders' Day was most appropriately observed on Thursday afternoon, beginning at about 2.00 o'clock. The affair was the 143rd anniversary of the old institution.

The principal speaker of the occasion was Mr. Alfred Pearce Dennis, vice-chairman of the United States Tariff Commission. Mr. Dennis' speech was most fitting and was received in a manner which denoted in no uncertain manner that the audience appreciated it. Mr. Dennis is a native of the Eastern Shore and received the honorary degree of Doctor of Laws at the College last June.

Governor Albert C. Ritchie, twice executive of this common wealth, was also a speaker of the occasion. Governor Ritchie's speech was short, but to the point. His speeches always please the public.

Promptly at the hour set for the observance, the Daughters of the American Revolution of Kent County unveiled, at the easterly end of the campus, an attractive tablet commemorative of the fact that here in 1789 Ex-President of the United States George Washington, "father of his country," was given the degree of Doctor of Laws by the college and also of the undisputed fact that this college is the only school of collegiate rank bearing his name with his direct consent. Prominent officials of the State D. A. R. were present for the celebration. The tablet, which was erected upon a large boulder brought from the banks of the Susquehanna River near Conowingo, was formally presented by Mrs. William G. Smyth, regent of Old Kent Chapter, Daughters of the American Revolution. It was received on behalf of the college by President Paul E. Titsworth. Two young ladies Misses Lillian Brown and Elizabeth Titsworth, unveiled the tablet.

Following the ceremonies, all the visitors and guests immediately proceeded to William Smith Hall, where Messrs. Dennis and Ritchie made their addresses, as well as Mrs. Charles J. Marsden, of Baltimore, Vice Rigent, D. A. R., and Miss Harriett Marine, of Annapolis, State Historian. Mrs. R. B. Heslop, of Baltimore, State Treasurer, was also present.

After the exercises in observance of the occasion, the visiting members of the Daughters of America were entertained by the local chapter at luncheon.

In spite of the disagreeable weather conditions, the affair was most successful. The ceremonies were impressive, while the speakers all made most interesting addressing, touching upon many things of historic portent in their remarks.

HEALTH CAMPAIGN ENDS

EFFORTS TO RID SALISBURY OF MALARIAL MENACE SAID TO BE SUCCESSFUL

A crusade of an entire community to eliminate the anapheles mosquito, dreaded carrier of the malaria germ, has ended successfully in Salisbury. Salisbury, four years ago, obtained widespread notoriety through the activities of this litle insect when the city's 235 cases of malarial fever represented more than 85 per cent of the total reported throughout the State. Today, with the danger period past, State health officials report only 12 isolated cases for the year.

The campaign to eradicate the mosquito has been intensive, though carried on with small cost to the city compared to the results obtained. The mosquitos' breeding places were the object of attacks lead by Dr. D. B. Potter, city health officer, and Dr. Victor DeSomoskeoy, deputy State officer.

All rubbish heaps within the city limits were ordered removed. Then a move to drain all stagnant pools and lakes in and near Salisbury was successfully carried out. One of these known as "Cranberry Bog," containing nearly twenty acres, represented a mammoth undertaking.

Those bodies of water which could be drained were given a treatment of oil at regular intervals. This will be continued during the mosquito breeding season. The work is done by a man employed for that purpose who constructed and supervised stationary containers which permitted the oil to drip upon the water's surface. Waste oil taken from automobiles was contributed by local garages.

In a report to the city officials Dr. DeSomoskeoy declares that Salisbury has not had a case of diphtheria this year and only seven cases of contagious diseases—three scarlet fever and four typhoid. The report said that health conditions here are better than at any time during the past five years.

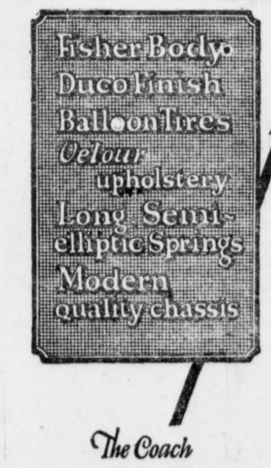

Authorities recently reported milk conditions there as model. The products of one dairy tested less than 500 bacteria per inch, while ten dairies supplying Salisbury were below 1,000.

LOOKOUT FOR RAILROAD

AUTOMOBILE DRIVERS SHOULD BE CAUTIONS WHILE CROSSING EVERY TRACK

Drivers of automobiles should be doubly cautious in crossing railroad tracks where the highway parallels the railroad.

No railroad crossing should be crossed without looking in both directions and it is particularly necessary to safety that this be done when crossing where railroad and highway parallel each other.

Carelessness on the part of the driver at such crossings is attended by great danger.

Bear in mind that gears should not be shifted on or near the track. Many machines stall when shifting gears. If necessary to shift gears do so not less than 75 feet from the track and then look in both directions before crossing.

A railroad crossing is dangerous only when made so by careless driving. No prudent person would run over a red light in the highway for a warning, yet motorists frequently not only run over a crossing flagman and break down crossing gates warning them of an approaching train, but with scarcely less frequency run into a train from one to five cars back of the engine, and then ask taxpayers to tax themselves for grade changes to eliminate the danger, when the danger is not in the crossing but in the driver.
