

Your friend the telephone!

YOU want the best telephone service you can get. We are just as anxious to give it to you. So that's one thing we have in common.

Most of the job of keeping the service up to scratch belongs to us. But there are some things you can do, and taking proper care of your telephone instrument is one of them.

Inside that telephone on your table are a lot of small parts—over two hundred of them. Every time you bang or drop the instrument the adjustment of these parts is made a little less true. Result—a noisy telephone; a cuff on the ear doesn't improve your hearing.

Any telephone is only as good as its cords—the wires which join it with the bell box. If these cords are often twisted and jerked or allowed to get wet, you may expect poor service—or no service at all.

Your telephone is as well made as the best brains and hands can make it. It is a friend, and deserves to be treated as such.

Dear Friends:
We have been having some exciting times on the old river bank around our clubhouse, and we are in for a peck of trouble. I don't know how we are going to get out of it without a Fight. Every day I will write down what happens, and every Sunday in the Junior Baltimore American you will read all about it. It looks like a fight.
Yours truly,
SECKATARY HAWKINS
