IMMORTALIZE SOUTH AT GETTYSBURG.

Confederate Monuments, Now Numbering But Two Upon Historic Field, to Be Greatly Increased

Upon a visit to the wonderful Battlefield of Gettysburg last summer,—that immortal melting pot of American heroism, where South and North vied with each other in the establishment of lasting valor upon a loftier pedestal,—the one thing which impressed the winter most was the absence from this continental battlefield of confederate monuments. With only 2 of the 840 monuments on the battle field here erected in honor of Confederates, efforts are being made by C E. Sloane, secretary of the Gettysburg Chamber of Commerce, to interest Southern States and organizations in honoring men and organizations who battled there in '63.

Virginia has a monument on Confederate avenue, one of the show memorials on the field, which was erected at a cost of $50,000, while Maryland Confederates' tribute to an infantry regiment is on Culp's Hill.

Two Southern State monuments are in prospect for the battlefield there From Mrs. F. F. Shores, of the United Daughters of the Confederacy of North Carolina, Mr. Sloane has received the following communication:

"I am glad to tell you that the United Daughters of the Confederacy of North Carolina are planning to erect a monument at Gettsyburg. This is their feature work for the year. Other States may be working also to this end."

While the women of North Carolina are engaged in raising funds for a tribute to Confederate soldiers of that State in the Battle of Gettysburg, word has been received from Gov. A. W. McLean, of North Carolina, that he will bring the matter of a memorial to the attention of the Legislature there when it convenes in January 1927.

The State of Mississippi, many of whose sons fought and fell at Gettysburg, may also erect a suitable memorial here, if the Legislature, now in session, approves a suggestion to be made to it by Gov. Henry L. White field. Governor Whitfield has informed Secretary Sloane he will take the matter of an appropriation for a suitable State memorial on the battle ground here before the Legislature at once.

Governors of other Southern States and heads of organizations which number among their members survivors or relatives of survivors of Picketts Charge, Little and Big Round Tops and the Valley of Death here, have been importuned by the local Chamber of Commerce to consider the erection of suitable memorials at Gettysburg.

It has been indicated that the New York monument, dedicated last September, will be the last erected here by Northern States, since almost every commander, division and regiment in the battle has been honored in granite or bronze.

PHILADELPHIA CELEBRATION LOOMS.

Great Event Gives Promise of Eclipsing Anything Ever Held in Country

International representation at the Sesquicentennial International Exposition has been augmented by the official acceptance of two others whose acceptance is imminent.

Japan and Spain have officially declared for the Sesquicentennial and Argentine and Chile are busily at work through consular representatives and commercial attaches planning exhibits representative of their countries.

The Japanese Government, in a dispatch received by the State Department at Washington officially accepted President Coolidge's invitation to participate. At the same time it increased its contemplated appropriation of $486,000 to $750,000, thus making its participation the largest which it has ever made to any international exposition. Iwao Nishi, a member of the Japanese Bureau of Commerce in Tokyo has been appointed Commissioner General to the Sesquicentennial and will be in charge af all arrangements.

Japan is urging its trade guilds to exhibit their products in the special section set aside for such products rather than in a national pavilion as contemplated by other foreign countries. These guilds have already applied for more than 36,000 square feet of exhibition space in the various buildings and it is expected that the total amount of space which they will require will be double this amount Silks, ceramics, specimens of the arts and crafts, and the products of the Japanese steel industry will all have full representation.

Spain is planning one of the most comprehensive exhibits of any foreign country. On December 12, the Council of Ministers voted approval of the participation plans. General Primo de Rivera, the Spanish dictator, is taking great interest in the exposition and will send the finest military band in Spain and company of his personal bodyguard, the Royal Halbarbiers.

Through the efforts of Alexander Moore, United States Ambassador to Spain, the greatest collection of armor in the world, the "Ameria Real," has been offered by Alfonso's government This collection is so large that a special transport has been requested from he United States Government to transport it to the exposition. Industrial exhibits, a collection of Spanish paintings and tapestries will also be sent.

Among the exhibits which will undoubtedly arouse a great amount of interest are the documents and things of historical value, many of them dealing with Spanish American relations, which will be sent from several of the ducal palaces and revealed to the public for the first time. Of particular interest will be the famous jewel casket owned by Queen Isabella, the repository for the jewels which were pawned to finance Columbus's voyage to America.

A Spanish pavilion will be erected to house these exhibits and an architect will soon be despatched from Madrid to supervise its construction.

Chile and Argentine are both busily at work on exhibition plans. Marcial R. Candioti, Argentine Consul at Philadelphia, has recently reported the appointment of a committee of eight prominent Argentinians which will assemble and make ready the Argentine exhibit. This will include the representative products of the textile and leather industries, food products, beaten silver jewelry, agricultural implements steel products and specimens of the arts and crafts.

According to Enrique Gallardo, Chilean Minister to Holland, who visited Sesquicentennial headquarters recently on his way to his post, elaborate plans are being made in his country for the Exposition. The largest copper mine in the world—"El Tenienate Chuguicamata"—will be represented by an exhibit of its product. Large exhibits of Chilean coal and silver are being assembled. Nitrates particularly will be displayed by several Chilean companies which produce a major portion of the world's output in this industry. Preserved fruits, rare woods and lumber and minral products will also have a place in the exhibition.

Chile is preparing a series of motion picture films especially for the Exposition in which industrial processes of her industries, glimpses of native social life and views of scenery of Chile will all be shown.

Both Chile and Argentina are preparing large educational exhibits. These two countries lead in education in South America. Chile is the only country in South America that makes primary education compulsory, and Argentine spends more money for its educational system than it does for its army and navy combined.

How to Stop That Weakening Cough

Why let a heavy, stubborn cough wear you down when you can get speedy relief and often break it up completely in 24 hours through a remarkable new method based on the famous Dr. King's New Discovery for Coughs?

Here is the method: You simply take one teaspoonful and hold it in your throat for 15 or 20 seconds before swallowing it. It has a double action. It not only soothes and heals irritation, but also removes the phlegm and congestion which are the *real cause* of the coughing. So with the cause removed the worst cough soon disappears.

Dr. King's New Discovery is for coughs, chest colds, bronchitis, spasmodic croup, etc. Fine for children, too—no harmful drugs. Very economical, as the dose is only one teaspoonful. At all good druggists. Ask for
