Washington Has Victorious Weekend

Tossers Hand Mt. St. Marys 9 To 2 Defeat—Track Team Runs Away With Md. Dental Meet

Featuring the first sign of hitting ability shown thus far this season the Washington College nine last Saturday handed their ancient rivals, Mt. St. Marys a 9 to 2 defeat. Washington busted a total of 13 hits in scoring their 9 runs. Mt. St. Marys was able to see the southpaw slants of Jack Carroll only to the extent of 3 safe blows.

The first inning went scoreless for both sides, but in the second stanza the Kibbies trotted out their best batting boots and before three were out had shoved three runs across the pan. They added two more in the third, one in the fourth, and finished in the fifth by repeating the dose of three.

The Mounts scored one each in the eighth and ninth, when after men were put on base by error the local Collegians elected to play for a sure out rather than trying to stop a score.

Jack Carroll in addition to forkfisting one of the best games of his college career hit what was probably the longest fly ever poled out on the local field. The ball hit the fence in dead center fielded on the first bounce and would have bounded over had it hit on the turf instead of the soft cinders on the track.

Mandrel, playing his first year of college ball, had shown signs all Spring of being a real possibility as far as facing the pitcher was concerned. He proved his case Saturday when his three hits at opportune times were big factors in Washington's success.

This was Washington's second victory in a week, the tossers having journed to Chester, Pa., on Wednesday and handed the P. M. C. nine a 5 to 2 licking.

For the second successive year the Washington College track team romped off with the Maryland Dental School meet open to all Maryland Colleges except Maryland and Hopkins. In winning, Coach Farie's team rolled 58½ points against 28½ for St. Johns who carried off second honors. Blue Ridge was third, Loyola fourth and Western Maryland fifth. Maryland Dental also competed but did not take a single point.

Two handsome cups were presented the Washington team, one for last years victory, the other for this years win.

The local track and field artists will try their wares against Blue Ridge on this Saturday when the two teams meet for a dual contest on the local field. The first event is scheduled for 1:30 P. M., so that the meet will not interfere with the Washington-University of Maryland baseball game.

PUPILS OF ONE ROOM SCHOOLS TO BE SAFEGUARDED AGAINST DIPTHERIA

At the time that pupils in the schools located on and near the state road in Kent Co. were given the toxin-anti-toxin treatment last February to immunize them against diptheria this treatment could not be given the children in the outlying schools on account of the bad condition of the roads. Dr. J. P. Franklin, Deputy State Health Officer for Cecil, Kent and Queen Annes Counties, is now prepared to extend this good work to the schools listed below and will visit there for that purpose on Tuesday, May 18, 1926, to give the first treatment at the time scheduled for each school:

Morgnec	9:00 A. M.
Cherry Lane	9:15 A. M.
Chesterville	9:30 A. M.
Golt	10:00 A. M.
Sassafras	10:15 A. M.
Turner's Creek	10:45 A. M.
Lynch	11:00 A. M.
Janvier	11:15 A. M.
Worton Point	11:30 A. M.
Hanesville	11:40 A. M.
Melitota	11:50 A. M.
Broad Neck	1:00 P. M.
Lankford	1:20 P. M.
Pomona	1:45 P. M.
Quaker Neck	2:00 P. M.
Cliffs	2:15 P. M.
Chestertown	2:45 P. M.

The second and third treatments will be given on the first and second Tuesdays after the above date to those children who take the first treatment on the 18th of the current month.

Not only will those children whose parents requested last winter that they be immunized against diptheria be treated on the dates mentioned but also all other children under 13 years of age, pre school children and school children whose parents so desire will be given the treatment. It will not be necessary for the parents to sign the requests for the treatment before they bring their children to the nearest enter listed above. That can be done at the time the child is given the first treatment on May 18th.

The work that has been done in Kent County during the past two years along the line of safeguarding children against diptheria has been most successful. It is sincerely hoped that every parent of children under thirteen in the schools named will ask that the toxin-anti-toxin treatment be given his child.

LOUIS C. ROBINSON,
County Supt. of Schools.

"Have a Camel"
Open one up! The tobacco tells its own story

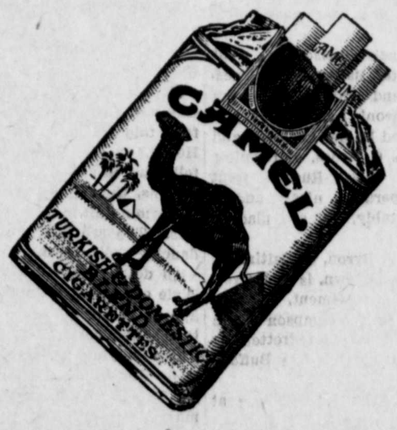

CAMELS are made of the choicest Turkish and Domestic tobaccos grown. To prove what we say about Camel's tobacco quality, make this test:

Take a Camel and any other cigarette. Tear off the papers and place the tobaccos from the two cigarettes in separate piles. Now shake them up and examine the tobaccos. Your own eyes will quickly show you the difference, how the Camel tobacco is longer and of a riper color. Then gather up the two piles separately—and smell them. You will at once notice the rich, fragrant aroma of Camel tobaccos not found in the other.

This marked difference is even more apparent when you "taste the smoke." It is solely because of the quality of the tobaccos and the skill of the blending that Camels *never tire the taste, never leave a cigaretty after-taste.*

Camels are so good that we know you will like them. Give them every test known and you will find Camels the highest quality cigarette made, regardless of price. *Have a Camel!*
