

# There never was a smoke so pleasing as Camel

IN LIFE'S supreme moments no cigarette can compare with Camel. No other cigarette ever was made so good, for Camel excellence is the result of skill. Skill in finding the world's choicest tobaccos—in blending, as only the world's largest organization of experts can.

From the beginning Camel took its stand on the quality platform, and nothing could ever induce its makers to change Camel tobaccos. No expense is spared, no care is too great to make Camel the world's most satisfying smoke, regardless of price.

In popularity with smokers, no cigarette made can touch Camels. Camel quality has been rewarded with the greatest demand, the largest sales any cigarette ever enjoyed. Since smoking began, there was never such a growing preference as for Camels. Camel rewards its friends with enjoyment that never ends, for Camels never tire the taste, simply never leave a cigaretty after-taste.

If you have never tried Camels, if you do not know how good, how satisfying a cigarette can be, we invite you to try them now for the utmost in smoking pleasure. Have the best that's made—we invite you—

*Have a Camel!*

## HEALTH NOTES

The following extracts from speeches of authorities will interest our readers:

By Sir Arthur Newsholme, of Great Britain:—"The three main objects of public health work are: (1) the prevention of disease; (2) the enhancement of health; (3) the cultivation of the complete being of man in order that physically, mentally and morally there may be the highest self-development of a well balanced nature."

Dr. Livingston Farrand, the president of Cornell University: "The educated person have a knowledge of the important health problems facing the community, of the methods of attacking those problems and of the results to be expected from intelligent community action in the public health field."

Dr. Matthias Nicoll, Jr., Commissioner of Health for the State of New York: "Ten thousand lives are sacrificed needlessly from diphtheria in the United States each year. Ninety per cent of these deaths occur in children under five years of age. Science has now given us means where by complete protection against this disease may be accomplished by the adminstration of toxin-anti-toxin. The vast majority of the people so immunized will never contract diphtheria, even though exposed to the disease."

Sir Arthur Newsholme: "The removal of the great environmental enemies of public health must always remain the basis of public health work. Of these enemies, impure drinking water and defective arrangements for the removal of organic filth from subsequent human contact are the greatest dangers to health and life."

Dr. Arnold Gesell, Yale University: "If we want this civilization to march forward toward higher economic standards, to moral and spiritual ideals, it will march only on the feet of healthy children."

Dr. Ellen C. Potter, Pennsylvania State Department of Health: "The biggest bill the taxpayer has to meet is due to the care of the sick; the biggest bill the individual has to meet in unhappiness, ineffectiveness and failure is due to that individual's lack of real health; both bills can be tremendously reduced by a well organized, well executed program of positive health."

## KENNEDYVILLE

Mrs. Thomas Jones spent Wednesday with Mrs. George Glenn.

## GIRLS CLUBS SHOW PROGRESS

Girls' Clubs throughout the County have been holding all day club meetings, the purpose of which has been to finish the Clothing and Food Projects, and start a new project by August 1st.

The Clubs plan to meet weekly until all demonstrations are completed.

Demonstrations in selection of suitable clothes for girls, including materials, color and workmanship of ready made garments in comparsion with the handmade garments, were given a prominent place on the programs for the June meetings.

The girls exhibited some very fine work in both clothing and Food projects. The success of the Clubs is due primarily to the leadership of the local people.

MONEY FOR FARMERS

We make loans to farmers for term of 33 years on easy payment mortgage plan of the FARM LOAN SYSTEM. We charge no COMMISSIONS and we do not require farmers to subscribe to any STOCK.

Loans are made for any Farm Purpose or to pay off EXISTING MORTGAGES. If your farm is mortgaged why not get the advantages of one of our NEW mortgages that NEVER have to be RENEWED—a long term loan being paid off gradually. Semiannual payments are fixed in advance and you know EXACTLY what they will be. You need not pay more on principal unless you desire. Remember: NO COMMISSIONS and NO STOCK.
