WHAT'S IN THE AIR?

Station W. C. A. P.'s Big Fall And Winter Programs.

O. P. Gascoigne, Manager of Broadcasting

During the fall and winter, station W. C. A. P., will present to the radio audience a well-balanced series of programs consisting of the better grade of music both vocal and instrumental. Educational talks, both technical and non-technical will be used in proportions with the well balancing of an evening's program.

The management has given considerable attention to the broadcasting of symphony concerts, both in large and small ensembles. Also, a reasonable amount of dance music by well-known jazz orchestras will be put on the air during the late hours of the evening, which is the time that such music is demanded by the listening public.

This station will endeavor to bring to the radio audience all important affairs of the government that can be broadcast, including the President's Messages to Congress. Debates in the Senate and House of Representatives, and other outstanding features of national importance are possibilities.

National sporting events are given special consideration, and will be heard at frequent intervals during the fall and winter.

Recently, W. C. A. P., inaugurated a series of organ recitals played by prominent organists of Washington on organs in the principal churches of the City. The recitals are usually of one hour duration. The organ program being interspersed with vocal solos by leading artists. As a weekly feature this has proven very popular.

The broadcasting every morning of the Health Exercises from the Metropolitan Tower, New York has proven very popular and will be continued during the fall and winter.

W. C. A. P., "Washington Chesapeake and Potomac" is operated by the Chesapeake and Potomac Telephone Company at Washington, and is one of the broadcasting stations of the Bell system. This station broadcasts on a frequency of 640 kilocycles equivalent to 468.5 meters, and is on the air Monday, Wednesday and Friday usually from 7:15 to 12 midnight On Sunday at 11 A. M. and 4 P. M. church services are broadcast, while from 6:30 to 9:30 P. M., a special musical program from the Capitol Theatre, New York, is also an attraction. Programs are standard eastern time.

Sound Advice Given by Ancient Writers

The old sanitary laws devised by the Hebrews must be recognized by hygienic experts, as based on sound and scientific modern concepts, according to Dr. Otto Bauer, physician at Jena, who writes in a German popular medical journal, Pierre Van Paassen comments, in the Atlanta Constitution. Humanity must often go back to the ancients for counsel and advice. The Mosaic sanitary laws are not the only instance. How much sound advice, for example, is there not contained in Xenophon's Oeconomicus for the young matrons of our days who wish to retain their schoolgirl complexion and their slim, athletic figures?

Xenophon writes of a man who told Socrates how he had counseled his wife not to use so much white enamel for her complexion, to discard high-heeled shoes and not to dip too deeply in the rouge pot. And he added: "I counseled her to oversee the baking woman as she made the bread; to stand beside the housekeeper as she measured out her stores; to go on tours of inspection, for it seemed to me this would at once be walking exercise and gynastics. And as a most excellent gymnastic, I recommend her to knead the dough and roll the paste; to shake the coverlets and make the beds. For by so doing she would enjoy her food, grow vigorous in health and her complexion would be lovelier." Socrates gravely assented to this and referred somewhat contemptuously to "ordinary fine dames, painted counterfeits of womanhood."

Famous English Poet of Seventh Century

The earliest English poet of whom there is any record was St. Caedmon, whose festival is celebrated in both the Roman and Anglican calendars. He lived in the Seventh century in Northumbria, the son of a farmer, and his poetic gifts were said to be of miraculous origin.

At drinking parties each person present was supposed to compose and sing a verse. Caedmon was unable to compose a line, and when the harp was brought out he always fled from the festive party.

On one such occasion when he was lamenting his lack of poetic ability, a vision appeared to him and inspired him to write a poetic version of the Creation. The manuscript of this work, supposed to have been composed by Caedmon, is preserved at Oxford. Caedmon translated into Anglo-Saxon the whole of sacred history. He became a monk in the convent of which the famous Hilda was abbess.

There he lived and sang and died, in the odor of sanctity, and was afterward canonized.—Chicago Journal.

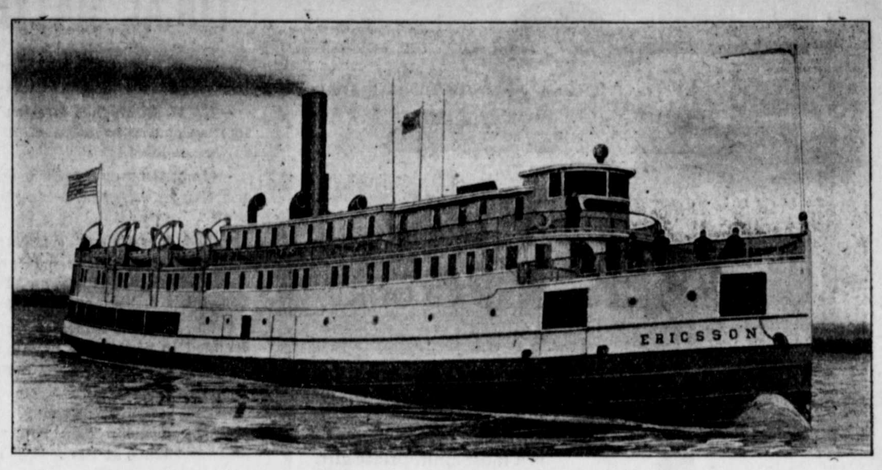

Can Always Do That

Biff—You know, when I get so old and feeble that I can't do anything but sit around I want to die off.

Bang—I don't. I want to live just as long as possible.

Biff—What do you think you'll get out of life when you get old like that?

Bang—Boy, I'll get a big kick out of just sittin' around and crabbin' about how the younger generation is going to the bow-wows.

Look Here!

WHAT'S THIS?

The FAST STEAMER Lord Baltimore will leave Pier 1 Light St. DAILY at 9 o'clock a. m. for Betterton. Returning, leave Betterton about 4.30 p. m. Have YOUR ASPARAGUS ready to go. Fresh Meats, Fish, Vegetables from your Baltimore shipper to your store by Ericsson Transfe Service.

Leave it to Plant for Service.

BUSINESS IS BUSINESS
By S. E. Kiser

He started when the firm was young
To help to build it to success;
Through seasons that were hard he clung,
With loyal faith and helpfulness.
At every step ahead he shared
His vigilant employer's pride;
He gladly did his best, and cared
For little that went on outside.

He saw the works begin to spread,
The danger point was left behind,
And now and then he moved ahead,
With one strong purpose in his mind.
New men came, and went away
To find advancement where they might;
But he was there, it seemed, to stay
And prove his worth with all his might.

If others grumbled he was not
Inclined to let his trust depart;
He banished each disloyal thought,
Strong faith was locked within his heart.
Year after year the business grew,
Departments sprang up here and there,
And he was glad, because he knew
That he had aided and been fair.

His hair is snow white now and thin,
His steps, which once were quick, are slow;
The other day they called him in
To tell him he would have to go.
He thought that he had helped to build,
A common and an old mistake;
Another fills the place he filled,
And who cares if his heart shall break?

POULTRY NOTES

ITEMS THAT WILL AID OUR READERS WITH THEIR POULTRY PROBLEMS

August, last month of Summer, should be a busy month on every poultry farm, but on account of extreme heat usually attendant upon this season of the year, is the month when most poultrymen take their vacations, or, if not actually absent, do not devote the same effort to the care of their flocks, old or young that has been done in other months. This neglect is responsible to a great degree for the retarded development of pullets, with later production that would have been otherwise. What you do in August will determine largely the condition in which your flock goes into winter quarters and the profits you make from them throughout their production life.

Keep up your fight with parasites: intestinal worms, mites and lice. Provide an abundance of succulent green feed, if you would have thrifty, healthy producers for the coming winter. This means vegetables from the garden, usually, during this part of the summer, as most grass has become tough and worthless for greens. If your young birds do not make the gains that they should on the feed consumed, examine for lice and worms, and look your house over for mites. Also, see that you are feeding sufficient mineral matter to make it possible for them to digest their food in an efficient manner.

See that sufficient roosting space is given to take care of the rapidly increasing size of your birds. They need three times as much house room as they did in May. Are you giving it? Also, are they on wirecovered roosts, that compel them to spread out at night and thus insure them ample roosting and breathing space? Can air circulate around them while on the perches? Is the air in the house sweet and fresh? If necessary hinge the back and both ends of the house to open out, cover the openings with netting and see how much more comfortable your birds spend the night than when housed in a stuffy, poorly ventilatad house.

In every laying flock in the summer there are always a few individual hens which cease laying for some cause or other, while the majority, or a good many individuals, may still be laying well.

Such things as persistent broodiness, molting, lack of vitality, disease and other things may cause these individuals to cease production. Whatever the cause, these individuals possess undesirable characteristics, and it is constructive breeding to dispose of such individuals, to prevent the reproduction of their kind. It is also economy to dispose of them because of their nonproductive condition. In some flocks it is often possible to reduce the feed bill by several dollars per week, without affecting the egg production greatly, through the removal of such individuals at intervals throughout the summer.

Such periodic culling is a great aid in building up egg production in a flock.

The presence of a male bird in a flock has no effect upon the number of eggs laid. The male only fertilizes the eggs so they will hatch. Fertile eggs spoil quickly in hot weather, and find a slow sale and low price among particular buyers. The removal of male birds from the breeding flock makes possible infertile eggs which are of better as broilers. All breeding males should be given a run apart from pullets and hens.

The value of green feed for growing stock has been emphasized several times recently in the Maryland Egg Laying Contest Bulletins and in these letters. Green feed is well worth the trouble usually involved in providing it, and there is no economical substitute for it in a poultry ration.

Where space permits, it is usually more economical to grow green feed in a fenced field or area, and turn the birds on it.

Where green feed will not grow in winter, cabbage grown in summer and stored is probably the most economical and efficient green feed. This will g far in conserving the health of the flock, and will result in better egg production.

PROJECTS FOR JULY

Cull the Laying Flock. Remove males from Breeding Hens. Cull Breeding Cockerels. Provide Green Food for all birds. Prepare for winter green feed.

THE WRONG MAN TO BLUFF

The young lawyer had just entered his office for the first time. He was nervous. The paint on his shingle was hardly dry. Silently he prayed for a client. A knock as if in direct response to his petition was heard at the door. Hastily seizing the telephone and assuming the attitude of one engaged in a very earnest conversation he bade the one seeking admittance enter and with a lightly bored expression motioned him to a seat. The lawyer resumed his conversation over the telephone with the imaginary party. This latter it seemed was importuning him to take a case involving thousands of dollars. But the young lawyer politely but firmly refused. He had more important litigation pending, etc.

Thinking his listener sufficiently impressed by this time, he hung up the receiver and turning to the man asked majestically, "And what can I do for you, sir?"

"Nothing" replied the other, I was just sent up by the telephone company to connect up your phone."—

F. G. L.—FAMILY GO LIGHT

It was a small dinner party, and the desert stage had been reached, when little Joan said:

"Will dessert upset me tonight, mummy, or is there enough to go round?"

Would be buyer.—We hear this house is for sale.

Owner.—Yes Madam, but after reading the add writer's description of it we have decided not to sell.

MR. FARMER

Do you know that within the past eighteen months the Maryland-Virginia Joint Stock Land Bank of Baltimore, through Wm. Frazier Russell, Jr., its attorney, has loaned to Kent County Farmers more than $90,000.00?

Do you know that you pay no bonuses or commissions to secure a loan through this bank?

Do you know that when you borrow $1000.00 you get a draft for $1000.00?

Do you know that every time you pay your interest you cut down the principal mortage indebtedness?

Your neighbors are getting "wise." It will cost you nothing to learn.

Write to or call upon,
WM. FRAZIER RUSSELL, JR., Att'y,
Chestertown, Maryland
