In Trim This Winter?

Watch The Kidneys After Winter's Colds.

COLDS and grip are hard on the kidneys. When the kidneys slow up, impurities remain in the blood and are apt to make one tired and achy with headaches, dizziness and often nagging backache. A common warning is scanty or burning secretions.

Doan's Pills, a stimulant diuretic, increase the secretion of the kidneys and aid in the elimination of waste impurities. Are endorsed by users everywhere. *Ask your neighbor!*

DOAN'S PILLS 60c
A STIMULANT DIURETIC FOR KIDNEYS

RHEUMATISM

While in France with the American Army I obtained a noted French prescription for the treatment of Rheumatism and Neuritis. I have given this to thousands with wonderful results. The prescription cost me nothing. I ask nothing for it. I will mail it if you will send me your address. A postal will bring it. Write today.

CHEVROLET

Again -the Greatest Sensation of America's Greatest Industry

Again, Chevrolet has created an automobile so far beyond all expectations in the low-price field that it constitutes the greatest achievement of America's greatest industry.

Built on a 4-inch longer wheelbase—offering numerous improvements in performance, beauty and safety—the Bigger and Better Chevrolet marks a spectacular epoch in the development of luxurious transportation at low cost.

The engine is of improved valve-in-head design with alloy "invar strut" pistons . . . hydro-laminated camshaft gears . . . mushroom type valve tappets . . . AC oil filter . . . AC air cleaner and a new crankcase breathing system.

Throughout the entire car similar advancements are represented—from the four-inch longer wheelbase and the new semi-elliptic shock absorber springs—84% of the wheelbase, to the marvelously beautiful new Fisher bodies in new Duco colors.

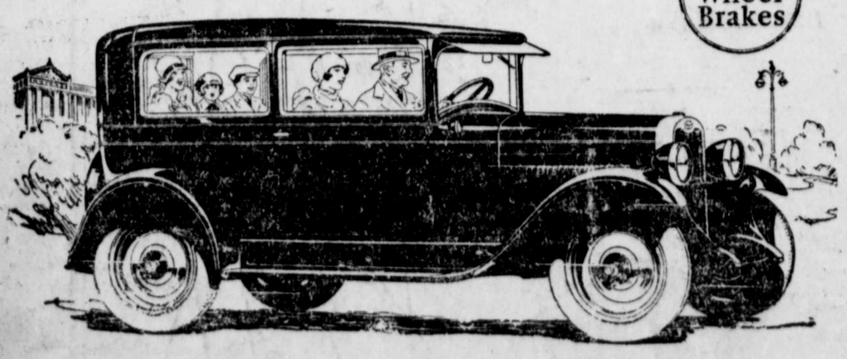

Come in and drive this great new car. Drive it through traffic—and get the thrill of its darting pick-up . . . the smooth, certain action of its non-locking four-wheel brakes! Drive it on the open road—and test every point in the speed range for smoothness and roadability! Try it on the hills—and learn the true meaning of Chevrolet power!

Do that—and you will agree with thousands of others that here is the world's most luxurious low-priced automobile.

Every feature of advanced design demanded in the finest cars now offered in the New Chevrolet! Read this partial list.

Improved valve-in-head motor.
New stronger frame 4" longer; wheelbase 107".
New four-wheel brakes.
Thermostat control cooling system.
New alloy "invar strut" pistons.
New instrument panel indirectly lighted.
New ball bearing worm and gear steering.
Semi-elliptic shock absorber springs; 84 per cent of wheelbase.
Safety gasoline tank at rear.
Larger balloon tires 30" x 4.50".
New streamline bodies by Fisher.
New Duco colors.
Theft-proof steering and ignition lock.
A. C. oil filter.
A. C. air cleaner.
Single-plate dry disc-clutch.
New crankcase breathing system.
New two port exhaust.
Heavy one-piece full-crown fenders.
Alemite pressure lubrication.
Vacuum tank fuel supply.
Improved Delco-Remy distributor ignition.
Combination tail and stop light.
Large 17" steering wheel with spark and throttle levers located on top.
Rear view mirror.

and 4 Wheel Brakes

QUALITY AT LOW COST

Weird and Wonderful Biskra Girls' Dances

In Biskra one hears the sound of the African tom-toms and the playing of pipes, the tapping of the drums, all night long, writes Lillian Genth, in the American Art Magazine. The street of the Ouled Nails is not only the most interesting street in Biskra but the most interesting street I have ever seen in my life. The green overhanging balconies, the many notes of color in the dresses of the girls, the gleam of the gold coins on their bodies and the clank of their anklets and bracelets as they walk down the street make a barbaric spectacle.

At night when the girls have their dances in the little coffee houses in the street of the Ouled Nails, it is a most interesting sight. Every one seems absorbed in the dance. The attendants and the audience sit around in a ring on their haunches, sipping mint tea and coffee, calling to the girls and dancers who sit on a platform before you.

Each awaits her turn to come down to her dance with the confidence of a prima donna on the opera stage. The dance is very wonderful. First the gyrations of the neck, the rest of the body held absolutely rigid. Then the quivering of the shoulders with the rest of the body rigid. The hum and the din of the little cafes become very exciting. These Ouled Nails dancers, daughters of the Nile, are often murdered for their gold.

Conceit and Timidity Bars to Advancement

Henry Ward Beecher once called conceit "the most incurable disease known to the human soul."

Conceit, however, is not to be confused with pride, self-respect or self-confidence. There is merit in these qualities and many a man of limited abilities has stamped and pounded his way to the seats of the mighty.

But the conceited man moves in quite a different realm. His is simply an unreasoning, unfounded opinion of his own importance. He is a giant in a world of pygmies.

Many men fail because of timidity and modesty. They secretly tell themselves that they don't amount to much, that they are mediocre and that nobody is interested in their words or deeds. They slink into the hidden recesses of obscurity of complete failure.

There is a sane middle ground upon which those who get anywhere worth while in life must ever stand. Neither conceit nor timidity will carry anyone very far.

Honesty is the best policy even in appraising one's own talents.—Thrift Magazine.

Berlin's Many Mills

The Berliner on the whole knows little about his drinking water except that it ranks among the best and purest of any capital. Most people living there think it is taken from the many lakes surrounding Berlin. But this is not the case. With the exception of 3 per cent, writes a Christian Science Monitor correspondent, the eitire water supply of Berlin is obtained from wells, some reach as far down into the earth as 100 meters.

The consumption of water in the summer reaches 500,000 cubic meters daily, but the water works are capable of supplying even more than that—namely, 740,000 cubic meters daily, so that an emergency can easily be met. Next year they will even be in a position to produce 800,000 cubic meters daily.

Books Must Have Air

Recent tests by the United States bureau of chemistry analyzing a large number of worn leather bookbindings, show that leather books need pure air and deteriorate when exposed to harmful sulphurous and acidic impurities. Backs of leather books deteriorate quicker than the sides because ordinarily they are more exposed to light and impure air, the tests reveal. To prolong the life of treasured leather bindings, steps should be taken to prevent their deterioration through the absorption of atmospheric impurities, the bureau advises. Certain coatings and finishes, notably neat's foot and castor oil, are stated to be excellent for the purpose.

Hard to Duplicate

In a Colorado town was a man too poor to indulge in any luxuries other than a superabundance of children. After the coming of a number of singles and doubles a loving but unreasonable wife presented him with triplets—three girls—and he sought for some family to adopt them.

A neighbor was rather inclined to take them, but his good wife thought one would perhaps be enough. They were talking it over before their little daughter, who said: "Why don't we take one of them—or don't they want to break the set?"

Inexcusable Mistake

There is a delightful old Irish woman who keeps a corner fruit stand in a Western town. One day a gentleman disposed to be facetious took up a fine melon from her stall, and said gravely: "You have pretty good apples in this state; but where I come from we have them twice that size."

The old lady looked up from her stool, surveyed the joker coolly and replied in a tone of pity: "Ah, what for should I be wastin' me breath to talk to wan that takes our gooseberries for apples!"

AGRICULTURIAL NOTES

QUALITY TOMATO SEED GROWN LAST SEASON

Approximately 1,400 pounds of high quality tomato seed, produced under supervision of the Tri-State Packers' Association and the University of Maryland. Extension Service, will be available for distribution in Maryland the coming year, it is announced by L. M. Goodwin, canning, crops specialist for the Extension Service.

The seed was produced by selected growers near Elkton, Cecil County, and Greensboro, Caroline county, during the past year as one of the means for improving the yield and quality of canning tomatoes in Maryland.

Production of seed was concentrated on two varieties, the Marglobe and the Tri-State, over a thousand pounds of the former variety and nearly four hundred pounds of the latter being secured. Production, it is said, fell somewhat short of expectations owing to uncertain market conditions for pulp the product after the seed is extracted, unfavorable plant growing weather and a limited supply of the TriState stock.

The production of tomato seed to meet the requirements of Maryland canners and tomato growers has been a cooperative project between the Extension Service and the Tri-State Packers' Association for several years. Increased yields and better quality have been among the factors sought in the varieties propagated. Control of disease through the use of resistant varieties and a reduction in the number of varieties and strains grown in a single community have also been among the objects sought, it is said.

Efforts this year will again be directed to encouraging growers to produce strong vigorous plants and to get them into the field as early as weather conditions will permit. The use of cloth covered coldframes and out door plant beds operated according to best production methods will again be recommended to growers as means of producing plants of maximum quality.

Litter Contest Again Won By Montgomery Boy

Getting a litter of pigs to market weight successfully and rapidly seems to be more than a mere matter of chance with G. Carlton Oland, of Olney, Montgomery county, who for the second successive year has carried off the honors in the fifteen-hundred pound litter contest sponsored by the Maryland Swine Growers' Association.

Tabulation of the weights of the various entries in the contest recently completed by B. E. Carmichael, livestock specialist for the University of Maryland Experiment Station and secretary of the Swine Growers' Association, shows that the ten Duroc Jerseys raised by Oland reached a weight of 2093 pounds in 150 days.

Oland managed to beat his record of last year somewhat insofar as average weight per pig was concerned. The ten pigs in his litter at the end of the 150 day period had an average weight of nearly 209 pounds.

To achieve his results, it is pointed out, it was necessary to put considerably more than a pound of weight a day on each animal. Oland was formerly a 4-H club member in Montgomery county.

Production Stays Up In Laying Contest

Production held steady in the ninth week of the Maryland State Egg Laying Contest under way at the University of Maryland Experiment Station despite the cold weather and [illegible] thousand competing hens laid 2,846 eggs during the seven day period, exceeding the previous week's production by two.

The layers in the present contest continue to keep ahead of the records made in the two previous years. Production for the ninth week of the contest was at the rate of 40.66 per cent. compared to 35.9 per cent. in the corresponding week a year ago and to 34.2 per cent. for the same period in 1926.

"This Little Pig Stayed Home" is the name of a new motion picture by the U. S. Department of Agriculture which calls attention to the losses caused by hog cholera. Copies of the film are available for use in agricultural meetings where it is desired to spread educational information on cholera and its prevention.

Slaughtering beef on the farm not only makes it possible to procure meat at a considerable saving, but often is the only means of obtaining fresh beef in many localities. When circumstances permit, killing should be done on a day when the beef can be cooled at a temperature ranging from 34 degrees to 40 degrees F. The carcass should be allowed to hang from 12 to 24 hours, or long enough to cool, without freezing, before being cut. It may be allowed to hang from two to four weeks before being cut up if well covered with fat; beef becomes more tender and palatable when allowed to ripen or age.

Three new oat varieties, Albion, Richland, and Iowar, have achieved economic importance in the winter wheat belt. All three varieties were developed by selection from the well-known and widely grown Kherson or Sixty-Day oat, introduced into this country from Russia by the U. S. Department of Agriculture and the Nebraska experiment station 30 years ago. Iowa has a little taller straw and is from two to three days later than Albion in maturity, and it also a little superior in yielding ability. Richland is primarily a special purpose oat for growing on low, rich soils, where because of its short stiff straw, it does not suffer by lodging. It is also resistant to stem rust.

KENNEDYVILLE

Mrs. Nat Johnston and son, Walton, visited Mrs. Annie Johnston on Sunday.

Mr. and Mrs. Rollison spent Sunday with Mr. and Mrs. Frank Shinn in Quakerneck.

Miss Grace Greenwood visited her uncle, Mr. Henry Ruttei, last week.

Thomas Johnston was taken to Dr. Jones hospital in Wilmington on Tuesday where he was operated on for appendecidis he is doing very well at this time.

Mr. and Mrs. Howard Pennington were Sunday visitors in the neighborhood.

The Mite Society of Grace Presbyterian Church will meet at the home of Mrs. Robert Hills Wednesday evening, January 18.

Mr. and Mrs. Howard Clendaniel are visiting in Baltimore this week.

Cards were received from Miss Edith and Harry Walls of their safe arrival in the Sunny South.

Mr. William Crows friends gave him a Surprise Party on Wednesday evening at being his birthday.

Miss Nellie Walters of Chestertown visited her friend Mrs. Wm. Jewell the past week.

Mr. and Mrs. Edgar Pennington, Mr. Samuel Comely and Mr. Robert Hill attended the Farm Bureau meeting in Baltimore last week.

Mr. and Mrs. Irving Jarvis, Mr. and Mrs. Smart, and children, of Wilmington, Mr. Neal Jarvis and family, of Galena, spent Sunday with Mr. and Mrs. Raymond Hill.

Miss Elizabeth Crowding, of Worton, is visiting her friend, Miss Harriett Walls.

Mr. and Mrs. John Atwell and daughter, Mrs. Ray King, and children, spent Sunday with Mr. and Mrs. John Boulden, near Still Pond.

Mr. and Mrs. Granvil Ward spent the week end with Mr. and Mrs. James Caldwell.

Mr. Bert Newton and sister, Mildred, and Mr. and Mrs. Morris and children spent Sunday with their mother, Mrs. Newton.
