

That many million men can't be wrong

FIGURES show that more Prince Albert is smoked by experienced jimmy-pipers than any other brand. You might give any of a dozen reasons why they bought their *first* tin of P.A. But their tenth and their hundredth, . . . only demonstrated quality can account for *that!* Wouldn't you say so?

The very fragrance of P.A. is an indication of the quality-taste still to come. The first fire-up makes good on the aromatic promise. Cool as a steeple-jack doing his stuff. Sweet as getting back to earth again safely. Mild and mellow and long-burning. Some tobacco, Men, and no mistake!

If you don't know the joys of a pipe packed with P.A., get busy and make up for lost time. No matter what your present set-up may be, try Prince Albert. It is not an experiment, but an experience — a little journey into a land of pipe-joy that you'll take many times every day.

The revenue stamp tells you—TWO full ounces in every tin.

PRINCE ALBERT

—no other tobacco is like it!

Telephone! Use Long Distance

The low rates on out-of-town calls will surprise you. For instance:

If you call a point 100 miles away, a station-to-station call will cost you but 70c during the day; 75 miles, 60c; and 50 miles, 45c.

Call by number if you possibly can as it is the quickest and cheapest way to telephone distant points. If you don't know the number you can get it by calling "Information"

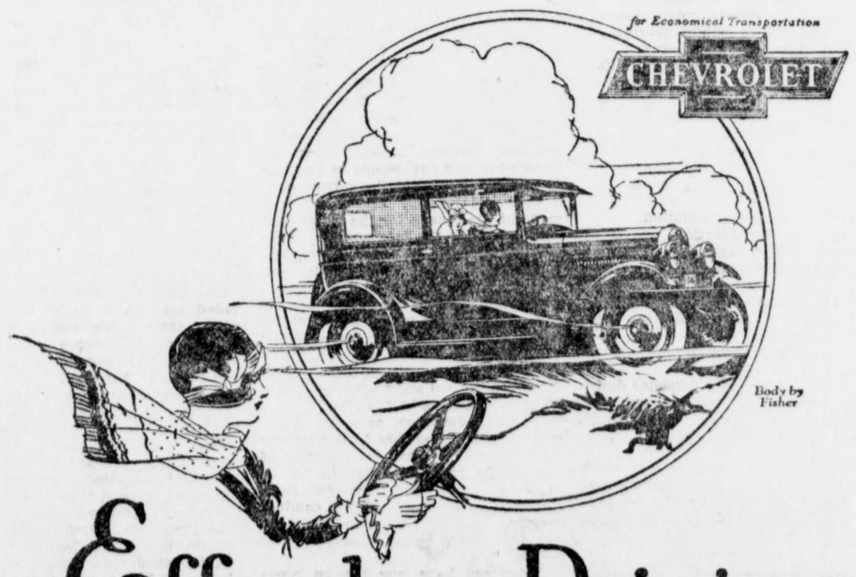

How to Make a Station-to-Station Call

If you know the number, tell the operator: "This is Franklin 1234. I want Chestnut 2468 Philadelphia." If you don't know the number of the desired telephone say: "This is Franklin 1234. I want anyone at the telephone of L. O. Jones, 172 Broad Street, Philadelphia."

How to make a Person-to-Person Call

After giving the operator the telephone number or the name under which telephone is listed say, "I wish to speak to A. B. Smith."

They include the lowest handling and financing charges available.

Day after day it becomes more apparent that the unrivaled popularity of the Bigger and Better Chevrolet is due to its basic elements of superiority.

And the greatest factor of all is the effortless driving it provides. It steers with the weight of the hand—for the worm and gear steering mechanism is fitted with ball bearings throughout . . . even at the front axle knuckles. The clutch is velvety smooth in action and the gear-shift lever responds to the lightest touch. Acceleration is swift and certain, while big non-locking four-wheel brakes assure perfect control under every condition of highway and traffic.

Bigger and Better

You'll never know what a great car it is until you sit at the wheel and drive! So come in today for a demonstration!

AGRICULTURIAL NOTES

SEED CORN SELECTION IS PAYING PROPOSITION

Few farm tasks give better returns for the time and effort expended than the careful selection of seed corn.

With a little experience a farmer can soon learn to select good seed corn quickly and accurately, it is said. The well-formed, medium sized ears, typical of the variety to be grown are best for seed purposes. The ears should be relatively heavy, with bright, well formed grains free from exernal signs of disease.

The cob should be examined. If the ear is a healthy one, the cob will be white inside. The grains should be fairly large, free from moulds and checks, well matured with plump tips and having good depth and medium indentation. The backs should be glossy, free from soft starch and blisters and the germs should be plump and creamy white.

The grains from the butts and tips of the selected ears should be shelled by hand and discarded. Better still, the butts and tips of the ear may be cut off with a sharp corn knife so that the internal condition of the cob can be observed.

A half dozen kernels should be removed from various parts of the ear and examined by cutting across the germ. Ears with dead germs should be discarded. Mouldy kernels or cobs, shrunken, blistered or checked kernels and dull, oft, starchy kernels, are to be avoided in selecting seed corn. Ears with rotted or hredded shank attachments, those with cobs badly discolored internally and hose seriously injuredt by mice should also be discarded.

After seed corn has been finally selected, two grains from each ear should be tesed for germination. If ninety-five per cent or more of the grains produce vigorous sprouts, the seed should be safe for planting. If the germination test shows less than ninety per cent of vigorous sprouts, a regular germination test of each ear should be made and all ears discarded that do not show perfect germination.

Reds Push Leghorns In Laying Contest

Rhode Island Reds came within one egg of taking production honors away from the victorious Leghorns during the twenty-first week of the Maryland State Egg Laying Contest at the University of Maryland Experiment Station.

As it was the ten Reds crowded into second posiion by virtue of their record of 982 eggs for the period of the contest. First position is still held by the White Leghorns whose record to date is 983.

The Barred Plymouth Rock hen leading in individual production made a perfect record for herself during the week and has produced 125 eggs in the twenty-one weeks of the contest.

Average production per bird has reached 70.61 eggs. The Barred Plymouth Rocks lead the breeds in average production, the seventy birds of this breed having a general average of 75.2 eggs for the twenty-one weeks. Leghorns are second, the 780 individuals having an average of 71.4 eggs. The Rhode Island Reds are a close third, the 90 individuals averaging 71.05 eggs. Sixty birds of the miscellaneous breeds have an average of 50.1 eggs.

Plans Made To Observe Egg Week In Maryland

Efforts to focus the eyes of Maryland consumers on the egg as an economical, palatable and highly valuable food product, will be made by Maryland poultrymen and other interested in the poultry industry of the State during National Egg Week, which has been set for May 1 to 7.

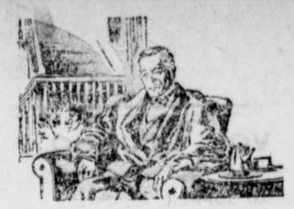

Plan for Maryland's participation in the observance of the week are going forward under the direction of Roy H. Waite, professor of poultry husbandry at the University of Maryland, who has been asked to serve as chairman of the State committee in charge of the campaign.

Egg production in Maryland, it is that runs into millions of dollars annually. In fact, the annual production of eggs in the State, has a value of approximately $7,000,000 and even so is short of meeting the requirements of the consuming public.

The egg, it is pointed out, is not only a good food product but aneconomical one. What the average person fails to realize, when buying a dozen eggs is that he is paying for approximately a pound and a half of meat which has no waste about it but the shell.

From beginning to end the egg is an efficient product. It is produced under highly efficient conditions for it is claimed of the hen that she is the most efficient of all farm animals in furnishing food for human consumption. An average hen, weighing from four to six pounds, if well fed and well managed, will produce from five to six times her own weight in eggs in the course of a year. And she can accomplish this on a feed allowance of from eighty to ninety pounds.

The hen, however, goes a step further and furnishes her product in a perfectly sealed container. The final efficiency of the egg is found in the ease, and simplicity with which it can be prepared for consumption.

Miserable With Backache?

Too Often This Warns of Sluggish Kidney Action.

EVERY day find you lame and achy —suffering nagging backache, headache and dizzy spells? Are the kidney excretions too frequent, scanty or burning in passage? These are often signs of sluggish kidneys and shouldn't be neglected.

Use *Doan's Pills*. *Doan's*, a stimulant diuretic, increase the secretion of the kidneys and thus aid in the elimination of waste impurities. Are endorsed by users everywhere. *Ask your neighbor!*

50,000 Users Endorse Doan's:

Geo. M. Wilson, Easton, Md., says: "A cold settled on my kidneys and they acted irregularly. I had a constant, dull ache across the small of my back and when I stooped the pains were so sharp I could hardly straighten. Doan's Pills rid me of the backache and after I used them my kidneys acted in good order. I haven't had any return of the annoyances."
