NEWSOME'S GARAGE

Betterton, Maryland

QUALITY AT LOW COST

It clings to metal-

because this oil is a new kind of motor oil- not a stickier oil, but an oil of greater oiliness, and this is proved by many tests like this one given here

TEN THOUSAND MILE TEST PROVES

A six cylinder Essex was driven ten thousand miles with "Standard" Motor Oil. The cylinders were worn away only one one-thousandth of an inch, as measured by precision instruments.

The average wear in an automobile engine with oils commonly used by motorists is about three times as great in the first ten thousand miles.

This means that by using "Standard" Motor Oil you can retard wear, maintain piston seal, and reduce upkeep costs.

STANDARD

"STANDARD" MOTOR OIL

"Standard" Greases, Transmission Oil and Gear Compound are made with the same care as "Standard" motor fuels and motor oils.

AGRICULTURIAL NOTES

MILK POWDER VALUABLE IN DAIRY CALF RATION

Highly satisfactory results have followed the use of skimmed milk powder as a substitute for whole milk in raising dairy calves, says J. A. Conover, dairy specialist for the University of Maryland Extension Service, and the method may be used to advantage in Maryland.

Considerable care will be necessary for the first two months, and unless the dairyman has had previous experience, it would be best to obtain explicit directions for the use of the powdered milk during this period. As soon as possible, however, the calf should be taught to eat hay and grain. Usually it will begin to chew a little hay when it is about ten days old. Nothing but good, bright timothy or mixed hay should be used at the start.

After the calf has reached two months of age, however, clover, alfalfa or soybean hay may be used and will give excellent results. If a small handful of grain is put ino the bottom of the pail after the calf is through drinking it will soon learn to eat grain. A mixture of 55 pounds of yellow corn meal, 10 pounds of wheat bran and 26 pounds of dry skimmed milk, to which should be added two percent of salt and one percent of steamed bone meal, has given excellent results at the Pennsylvania Experiment Station.

Reconstructed liquid milk should be fed until the calf is seven weeks old. It may then be reduced gradually until at the end of the eighth week it is discontinued entirely. In the meantime the amount of the grain mixture should have been increasing until the calf is getting from four to six pounds daily. This should continue until the calf is four months old, when the skimmed milk powder is gradually reduced and finally discontinued.

Hedge Sticks Make Valuable Fence Posts

Farmers who cut down and burn the osage orange hedges that border many farm fields in Maryland are most likely destroying a considerable quantity of valuable timber.

Osage orange sticks with a diameter of three inches or over make most desirable fence posts, and are the equal of any fence posts that sell at the lumberyard for from thirty to fifty cents each. Osage orange is one of the most durable woods produced in America and posts of this wood should give service for thirty years or more.

Contest Layers Have An Exciting Week

Leading pens in he Maryland State Egg Laying Conest at the University of Maryland Experimen Station are putting forth strenuous efforts in the struggle for supremacy.

The Rhode Island Reds, which jumped into the lead during the twenty-second week, were rather quickly replaced by the White Leghorns.

The best record for individual production still belongs to the Barred Plymouth Rock Hen, No. 932. Her record for the period of the contest is 135 eggs, despite the fact that she produced but three eggs during the twenty-third week.

Crisfield has turned to the arduous task of building a greater and more modern business section, from the barren mass of ruins which followed the fire two weeks ago. A few of the fifty-six business houses destroyed by the fire will not attempt to reestablish, while others are to rebuild on a larger scale.

The uppermost political thought in Worcester county at this time is the successor to the late Senator Harrison. Who the gentlemen will be will evidently have to be determined by the primary election, which will be held on May 7th, throughout the county.

The Cream of the Tobacco Crop

VINCENT RICHARDS
Champion Tennis Player
writes:

"Immediately before and after my important tennis matches I obtain the greatest possible comfort and satisfaction from Lucky Strikes.

A tennis player must guard his throat carefully, and that is why I smoke only Luckies—they are mild and mellow, and cannot possibly irritate your throat, and my wind is always in splendid shape."
