St. James and Lynch M. P. Churches

L. Colvin Randall, Pastor. Something unusual will happen at St. James and Lynch Churches this Sabbath. That is it may do so, if you will come with us, for each additional voice raised in praise, each added soul lifted in prayer, each new personality, joining to make for a larger spirit of Christian Fellowship, and in Christian Unity and Love, works miracles. Thus to make our service more attractive, and more highly spiritual, we need your presence. Try to join us in these following services at St. James at 10.00 a. m. in the Sabbath School, 11.00 in the Hour of Worship, and in the Christian Endeavor at 7.30 p. m., when Miss Betty Moffett and Mr. Wilbur Morris, Jr., will conduct the service. At Lynch the order is Sabbath School at 2.00 p. m., Hour of Worship at 3.00 p. m., and the Christian Endeavor at 7.30 p. m.

Kennedyville M. P. Church

H. G. Hager, Pastor. We cordially invite you to all of our services this Sabbath.

Miss Emma Shafer wil be our leader in the C. E. Society. Her topic will be, "Prohibition."

Mr. L. W. Ford, Supt., of the Sunday School, invites you to join him in the Sabbath School worship at ten o'clock. Come and make our School grow.

TEN-TON TOMATO CLUB FOR MARYLAND

WINNERS TO BE PRESENTED GOLD WATCHES, MEDALS

Kent County Tomato Growers are being urged by County Agent Horace B. Derrick, to enter the Ten Ton Tomato Club for Maryland and give such an account of their stewardship of the tomato growing possibilities of Kent, as will not only entitle, the growers to Membership in the Club, but will bring honor, gold watches, and medals to them.

The object of the Maryland Ten Ton tomato Club is to promote the production of higher yields per acre of canning tomatoes. Increased yields will necessarily result in increased quality. Better quality is positively necessary to the continuation and future prosperity of the canning industry in Maryland.

AGREEMENT

The University of Maryland Extension Service agrees to

1. Assume the responsibility of supervising the contest and the interpretation of regulations. Supervision shall include furnishing the growers entered in the contest with proper application blanks, examine and approve or reject applications, check on reported yields measure acreages entered in the contest and award prizes to successful contestants.

2. Supply the contestants with cultural information on tomato growing either through meetings or personal visits.

3. Furnish each contestant with a copy of the Maryland bulletin "More Tomatoes from Fewer Acres."

b. Keep in touch with the contestant throughout the growing season by means of news letters.

The Tri-State Packers Association agrees to

1. The Maryland members of the Association will cooperate with the Maryland Extension Service and Maryland growers to encourage membership in the club.

2. Pay the expenses of the three Maryland prize winners to the annual meeting of the Tri-State Packers Association. The three state prize winners will be the guests of the Association and the President of the Association will present the prizes to the winners at the annual banquet held each year in connection with the Associations' annual meeting.

All Growers entered in the Contest agree to

1. Select a suitable field of two acres or more in size. (Two acres is the minimum acreage required. A grower cannot qualify wih a part of the total acreage produced on his farm. If the total acreage grown for canning is for example ten acres then the entire ten acres must make an average yield of at least ten tons per acre for the grower to qualify for membership in the club.)

2. Fall plough the land to be used for tomatoes (This will not be a requirement for 1928 due to the advanced date when the club was started.)

3. Use stable mnure at the rate of ten tons or more per acre if available. Supplement the stable manure with an application of not less than 600 pounds per acre of 16% acid phosphate fertilizer or complete grade if desired.

4. If stable manure is not available the grower agrees to use not less than 1000 pounds per acre of a 4—8—8 commercial fertilizer or a better grade if desired.

5. Set the plants in the field not later than May 25th on the Eastern Shore of Maryland and June 1st in Western Maryland. (The cloth covered cold frames will be found useful in securing plants at the required time.)

6. Set only stocky healthy plants, spray or dust the plant bed as directed in the bulletin "More Tomatoes From Fewer Acres."

7. Use an approved variety suitable for canning.

8. Practice not less than a four year rotation.

9. Practice deep cultivation only when plants are first set in the field, follow with shallow cultivation as vines develop.

10. Pick and deliver to the canning plant only red ripe tomatoes.

11. Secure cannery receipts for all tomatoes delivered or sold on the open market or under contract and present such receipts as evidence of yields secured.

The grower further agrees, if required, to sign an affidavit that all deliveries credited to his club acreage actually came from the designated fields or plot.

12. Notify the County Agent during the harvest relative to the approximate yield expected. (If the yield falls appreciably under ten tons per acre the fields will not be measured. If the grower in his own judgment estimates the yield will be ten tons or more the County Agent should be notified at once.)

AWARDS—All growers qualifying and securing yields of ten tons per acre or less then fifteen will receive a bronze medal suitably engraved with the members name, year and yield per acre.

Fifteen tons per acre or less than twenty a silver medal.

Twenty tons per acre or more a gold medal.

Three state wide prizes as follows: (All club members compete for this prize.)

Highest Maryland yield a gold watch value $100.00.

Second high a gold watch value $75.00.

Third high a gold watch value $50.

Valve-in-head Supreme

-in the Sky
-at the Speedway
-on the Road

The famous Buick Valve-in-Head Engine has given conclusive proof of leadership in all elements of performance over a period of twenty-four years.

Lindbergh, Maitland, Chamberlin, Byrd—the famous fliers of the day—use engines employing the Valve-in-Head principle in their record-breaking flights.

Practically every racing car entered in all the major speed classics of the past twelve years, has been Valve-in-Head equipped.

Choose Buick—powered by the famous Valve-in-Head Engine—supreme in the sky, at the speedway, on the road!
