IT PAYS TO FERTILIZE A CORN CROP

Did you know, it pays to feed your Corn better than most any other crop, particularly with our regular Corn Fertilizer, that is especially adapted to its growth and maturity.

One of the requisites is to apply a sukcient quanity say: 350 lbs. to the acre, which is the amount used by the most successful Corn growers.

All of the County Agents and agronomists over the Country are now advocating the use of fertilizers on your Corn, as it not only increases the yield from 15 to 20 bushels more than the unfertilized, but also improves the quality, in that one user claims, he has now 50% more merchantable corn, than he used to have, before he commenced using fertilizer.

I know of one man, who bet his Son, it would not pay to use fertilizer, as he never had, they each put in a field, the young man fed his and the old man lost his bet, TRY IT.

FOR TOMATOES

Use Our Peerless Tomato Fertilizer, this has been on the market for years and many of the most successful Tomato Growers, will use no other.

We had one customer, who grew 19 tons to the acre a few years ago, with our goods and we will be pleased to supply you.
