FIVE-COUNTY ALFALFA COMPAIGN

Alfalfa will grow on amost any type of soil, provided it is well drained, is not sour, and is in a good state of fertility.

Sassafras loam, Sassafras gravelly loam, Susquehanna gravel, Norfolk sand, Elkton Clay and Meadow are the most prominent types of soil found in this vicinity. The writer has seen fine alfalfa patches and fields grown on everyone of these types of soil. Just think of it, the supreme dairy roughage crop, ALFALFA, containing 11 per cent. protein, will grow abundantly and thrive in Sassafras loam, Norfolk sand, Elkton clay, Meadow and most any other type of soil. This fact is perhaps the most important, it puts an Alfalfa patch within the reach of every dairyman in the Five-County Alfalfa Campaign area, Kent, Queen Anne, Caroline, Talbot and Dorchester Counties.

With the type of soil found to be favorable for Alfalfa, vnen there are three other things to look for. First, the soil must be well drained. Alfalfa cannot stand "wet feet" as it is called. It will drown if there is too much water in the soil. Therefore, select a well drained piece of soil. On the other hand, a soil that will hold no moisture, one in which crops burn badly in ordinary hot weather, is too dry. Secondly, the soil selected for Alfalfa should be in a good state of fertility. It should be rich in humus and plant food. Alfalfa is a valuable plant, containing a large amount of protein and minerals. It must have a good piece of soil to grow in. Barn yard manure, green crops turned under, and commercial fertilizer all go toward enriching a piece of soil for alfalfa.

The third consideration is the condition of the soil with respect to acidity. This can be easily corrected and will be taken up in a later article.

Now, is the time to select the piece of soil to put in Alfalfa this August. Since the type of our soil is suitable to Alfalfa, it is only necessary to select a piece that is well drained and in a good state of fertility. The big thing is to look ahead, select the five, ten, fifteen or twenty acres for Alfalfa, add to its fertility and save it for Alfalfa, ever remembering that "MILK FLOWS WHERE ALFALFA GROWS."

MASSEY

Mr. and Mrs. Charles Baker visited their nephew who is in the Delaware Hospital.

Mrs. Russell Kelly has returned home after spending a few days with her parents, Mr. and Mrs. Wm. Palmatory.

It's easy to tell

that this oil is better for when the motor idles or when the hill is steep, you feel the difference—it's an oilier oil which takes a hold on metal and "stays put"

A real road test

Sixty cars and trucks were operated for two months with a good oil commonly used by motorists, and then for two months with "Standard" Motor Oil—nearly 200,000 car miles in all. The same gasoline was used throughout.

With "Standard" Motor Oil these cars averaged 8.5% greater mileage per gallon of oil. The better piston seal and greater power resulted in 12.7% more miles per gallon of gasoline.

The greater oiliness of "Standard" will have the same effect in your car.

"STANDARD" MOTOR OIL

"Standard" Greases, Transmission Oil and Gear Compound are made with the same care as "Standard" motor fuels and motor oils.

Strawberry Ice Cream

The most favorite Ice Cream of the season has just arrived. We received a shipment of Fresh Red Ripe Strawberries this week right from the sunny south, Plant City, Fla., and have mixed these Red Ripe Fresh Strawberries with our Fresh Rich Milk and Cream and have sweetened it to your tempting flavor.

Your Chicks Deserve a Good Starter

You are staking your future poultry profits on your success with your baby chicks.
Their downy little backs carry all your hopes for a husky lot of pullets and a profitable flock of layers.
Help them reach the goal you've set for them. They deserve the very best of feed and care.
Feed them Larro Chick Starter.
It's the best that you can buy or mix for them. Thousands of Poultrymen have proved that statement by raising more chicks, bigger chicks, better chicks, on Larro than they ever got before using it.
The same satisfying results await your first trial.

An Ideal *and* An Aim

"The ideal and aim today of the American Telephone and Telegraph Company and its associated companies is a telephone service for the nation . . . enabling at all times, anyone, anywhere to pick up a telephone and talk to anyone else, anywhere else, clearly, quickly and at a reasonable cost."

WALTER S. GIFFORD,
President of the American Telephone and Telegraph Company (Bell System)

¶ This statement of the president of the American Telephone and Telegraph Company expresses the ideal and aim of the *Bell System*. It is the principle which has guided the management during the entire life of the system—to give the most telephone service and the best at the lowest cost to the public.

¶ In pursuit of this objective, there has been established a great nation-wide system of communication — built and extended in a spirit of service to the public—permitting at all times, anyone, anywhere to talk to anyone anywhere else, clearly, quickly and at a reasonable cost.

¶ The Chesapeake and Potomac Telephone Company of Baltimore City, which furnishes your service, is a part of the Bell System. Its policies are the same—to give you the most telephone service and the best at the lowest possible cost.

¶ To this end we are constantly setting higher standards of service—then bending our energies to attain them. The year just closed has witnessed greater progress in this direction than any similar period in the company's history.

¶ This year we expect to do better and next year better still. In this way we are striving faithfully to realize the ideals and aims of the Bell System.
