PROTECT YOUR HEALTH SAVE YOUR FOOD

THE proper preservation of foods prevents the growth of disease germs and bacteria.

To preserve foods properly refrigeration must be used.

The Crosley Icyball Refrigerator provides a commodious cabinet for the storage of all these things which are needed for the table during the day. More economical than ice the cost of heating the Icyball unit each day is averaged at 2 cents.

The Crosley Icyball Refrigerator offers you all these advantages at a very low cost. This beautiful refrigerator comes to you at $85. F. O. B. factories.

The Crosley Icyball Refrigerator is the result of an invention which makes it possible for you to enjoy the many benefits of refrigeration no matter where, or under what conditions you may live.

For its operation it is entirely independent of electricity or other power services. You simply remove the heat unit each day and heat it for the period of approximately an hour and a half.

THE Crosley Icyball Refrigerator is manufactured by one of the largest radio manufacturers in the world. The facilities and great resources of so large a corporation make it possible to sell this high class refrigerator at so low a price.

Come into our store and see a Crosley Icyball Refrigerator in operation. You will be convinced that it is the greatest refrigerator on the market. To see it is to buy it.

$85 COMPLETE WITH CABINET F.O.B. FACTORIES

THE Crosley Icyball Refrigerator cabinet is constructed of metal. The exterior is finished in grey and green lacquer and enamel. The interior is handsomely done in grey and white baked enamel. Trimmings are of polished nickel.

The Crosley Icyball Refrigerator is equipped for the making of ice, frozen desserts, chilled salads, ice cubes, etc.

The Crosley Icyball Refrigerator will do anything that any other refrigerator will do, and do it cheaper. You're safe with a Crosley.

Owners of the New All-American are calling it America's finest medium-priced automobile

Few, if any, cars in Oakland's field have ever aroused such enthusiasm among owners as the New All-American Six is causing. Come in and let us show you why its owners are so proud of their cars and so completely satisfied with the value which the New Oakland All-American represents.

Prices, $1145 to $1375, f. o. b. Pontiac, Michigan, plus delivery charges. Spring covers and Lovejoy Hydraulic Shock Absorbers included in list prices. Bumpers and rear fender guards extra. General Motors Time Payment Plan available at minimum rate.

Consider the delivered price as well as the list price when comparing automobile values . . . Oakland-Pontiac delivered prices include only reasonable charges for handling and for financing when the Time Payment Plan is used.

PROFIT FROM PURE-BREDS

DAIRYING THE 4-H CLUB WAY BRINGS SATISFACTORY RESULTS

Some years ago, before the T. B. test was compulsory, Walter Moffett, of Broad Neck, in preparation for the entrance of his son into 4-H Club Work with purebreds tested his herd. The herd of twenty-one cows re-acted. It looked like a severe blow but worked out to be a blessing.

In a recent conservation Mr. Moffett stated that he had been "cow poor" due not only to some poor cows but also to poor feeding and management on his part.

He purchased nine (9) cows to replace the twenty-one (21) and determined to feed them well and in proportion to their ability to produce. He followed the practices recommended to his son in the 4-H Calf Club. The milk from each cow was weighed and tested for butterfat. A grain mixture suitable for his roughages was fed each cow in amounts determined by her production. His new practices brought surprise and satisfaction, for the nine cows gave as much milk as had the twenty-one. The profits from handling the nine good properly fed cows were materially greater than from the twenty-one alleged dairy cows fed on hit or miss plan.

Doubtless many other Kent County dairymen have had similar results if they have had sufficient feed and have fed well and economical. Should not this experience cause many farmers to think carefully before going out to buy as many cows as they had before the T. B. test? Why nor provide adequate feed for the smaller number, feed them according to their production ability as determined by milk scales, Babcock test, and feed bill, eliminate those which cannot pay good returns over and above feed costs. Save the big investment and the labor of housing and caring for the large number and make more money than under the old plan of being "cow poor" and poor cow-men.

FOR POISON IVY

After exposure to poison ivy or poison oak, thorough washing of the skin surface with strong kitchen or laundry soap having an excess of alkali, is agood precaution. Lather well, and rinse several times in running water. Pay especial attention to the finger nails and tender skin between the finger nails and tender skin between the fingers. This treatment if carefully done may be tried even after inflammation has developed, to lessen the area affected, and the intensity of the poisoning. As a preventive a solution of 1 part of iron sulphate in 5 parts of water has been recommended. This solution should be freely applied to the parts likely to come in contact with the ivy and allowed to dry. By this means some measure of protection may be afforded to persons who are engaged in work that makes it difficult to avoid contact with the plant. A 5 % solution of potassium permanganate applied locally is reported to be a very good remedy. The brown stain caused by this solution will gradually wash off or it may be removed more rapidly with lemon juice. Solutions of cooking soda or Epsom salt are ordinarily as helpful as any local applications. In the early stages ointments are not recommended.

This information may be helpful to some of our local golfers who spend much time threshing around in the rough and along fence rows.

Lemon is not the only garnish for iced tea, although it is very commonly used both to decorate the glass and add to the flavor of the tea. A spray of mint, a rose geranium leaf, a thin slice of orange or lime, are other attractive garnishes; and some people like a flavoring of whole cloves or stick cinnamon, put into the tea while it is hot, or a few cloves stuck in each slice of lemon and arranged pleasingly on a plate to be served with the tea.

5c IS ENOUGH FOR A GOOD SMOKE

It Buys a Dandy Cigar — If You're a Good Picker

No doubt you've done your share of hunting for "a good five-cent smoke." And finally decided "there ain't no such thing." Wait—here's the livest tip ever handed you: Bayuk's *Havana Ribbon*. Try that cigar, sir, and you'll be playing five-cent limit till the cows come home.

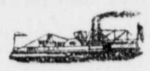

Bayuk's *Havana Ribbon* is as different from ordinary five-centers as a home run is different from a pop fly. That's because we've landed squarely on the secret of what makes a cigar good: *Ripe tobacco!* Unlike the average nickel cigar, Bayuk's *Havana Ribbon* contains no bitter *under*-ripe nor flat-tasting *over*-ripe leaves. No "scraps" or cuttings discarded in the making of higher priced cigars. But only long-filler, *fully*-ripe leaves from the mid-section of choice tobacco plants. "Sounds reasonable," you say. Why, man, it's amazing! Sold everywhere. Also *Practical Pocket Packages* of five cigars.
