POULTRY NOTES

ITEMS OF INTEREST THAT WILL HELP OUR POULTRYMEN SOLVE THEIR MANY PERPLEXING PROBLEMS

BY POLK T. BRAMBLE
Bramble Poultry Farm

The two local hatcheries have had the largest season in their history.

Truslow Poultry Farm are having erected four mamoth laying houses for their breeding stock.

Approximately five hunderd persons attended the Third Annual Maryland Poultry Field Meeting at the U. S. Farm, Beltsville, Maryland, on June 14th. An almost ideal day as to weather brought representatives from practically every section of the State as well as out-of-state visitors from Virginia, Delaware, Pennsylvania and New Jersey.

Outstanding features on the program included addresses by Hon. R. W. Dunlap, Assistant Secretary of Agriculture, E. W. Sheets, Dr. M. A. Jull and Dr. H. A. Hunyea of the U. S. Department of Agriculture, Mrs. Helen M. Baker, of Chestertown, Maryland, and Mr. Reese V. Hicks, Managing Director of the Inter-national Baby Chick Association.

The luncheon was a most popular feature of the program, over four hundred people being served.

The U. S. Department of Agriculture was host and sponsor of this meeting, with the University of Maryland and State and County Poultry Organizations cooperating.

Summer Feeding and Culling

While it is normal for the layers to gradually slacken their pace in production as summer progresses, sudden drops in production or continued decreasing production until a loss is being sustained is quite another matter.

If laying mash is stopped in the spring or the birds neglected as to lice, mites, house cleaning, etc., it will be harder to bring them back into good production. Birds in poor flesh due to worms or exceptionally high production in spring because of an excessive consumption of mash, will likely require time to regain flesh before they are able to produce well.

Six Steps in the Demonstration

1. Keep daily records of the number of eggs laid by the whole flock for not less than one week before any change is made in the management of the flock or the flock is culled. Daily egg records on the flock are too important to neglect and should be kept the year round.

2. Feed complete laying ration including laying mash and green feed. Milk added to the ration is also very helpful in stimulating the appetites of the birds, and should have a place in the ration. The feeding of mash moistened with milk will help increase feed consumpton, so necessary to a good production.

Feed about equal quantities of grain and mash by weight if the birds are in good flesh. If the birds are thin, an extra allowance of grain may be advisable to help increase their flesh.

To insure the birds eating sufficient mash, it may be best to confine them to the house until noon, allowing outside range in the afternoon. Green feed also helps to stimulate the appetite.

The feeder should at all times of the year aim to feed and manage the birds so as to first maintain the body weight and health of the birds by feeding sufficient grain or fat producing feeds and seemed to secure a reasonably good egg production through the feeding of protein concentrates (laying mash) without sacrificing the body weight and health of the birds.

3. Thoroughly clean and then disinfect the house. First sweep down the ceiling and walls, then remove all litter and manure by shoveling, scraping and sweeping. It is even best to scrub the foor, walls and dropping boards with lye water 1lb. lye to 40 gallons water. Then use a good disinfectant. Open additional windows or curtains, if necessary, to furnish good summer ventilation. Then whitewash the interior of the house to improve its hygienic condition.

The cleaning is more important than the disinfecting alone, even though not so pretentious. Disinfecting a dirty house is a waste of both labor and money. The virtue in cleaning the house is getting unhealthful and dangerous material away from the birds. Shoveling the litter and manure just outside the house where the birds still have contact with it is like disinfecting a dirty house. The litter and manure should be removed to the pit or fields away from the birds.

All cleaning, disinfecting and whitewashing should be done at the same time feeding practices are changed.

4. Treat the roosts for mites and the birds for lice while house cleaning is in process. Old crankcase oil painted on the roosts will get the mites. 40 per cent. nicotine sulphate solution (Black-Leaf 40) poured in a thin stream evenly and thoroughly along the roosts about one-half hour before the birds go to roost will kill the lice on the birds. Sodium Flouride may be used on the birds by the pinch method, if preferred.

Lice and mites cause a considerable loss in eggs each summer.

5. After the housing and feeding are corrected and the mites and lice gotten rid of, continue to keep the birds improving in condition and production for not less than three weeks. Also keep daily egg records. After at least three weeks have elapsed the birds may be culled in fairness to them and every one concerned. This is merely giving the birds a fair and reasonable chance.

6. Then after at least three weeks the birds should be culled. The molters and non-producers should be removed for marketing. A demonstration meeting will add community interest to the work. Continue daily egg records for at least two weeks after culling.

Consult your county agent for further details about this work.

CHESAPEAKE BAY BASEBALL LEAGUE.

SATURDAY, JUNE 22, 1929.

Sudlersville vs. Galena

Score by innings:

	1	2	3	4	5	6	7	8	9	Total
Sudlersville:	0	5	0	0	8	2	2	3	0	10
Galena:	0	0	0	0	0	0	1	0	2	4	7

Runs batted in: N. Coleman 1, Wallace 6, F. Coleman 2, Walraven 2, C. Smith 1, Knotts 2, B. Coleman 3, Redding 2, Peacock 5.

Two base hits: Lockwood, Wallace, Peacock, F. Coleman, Walraven, E. Coleman.

Three base hits: Johnson 2.

Home Runs: Wallace, Peacock.

Base on balls: Coleman 4, Starkey 1, Lockwood 2, Cockran 2.

Struck out by: Coleman 8, Lockwood 2, Cockran 3.

Left on bases: Sudlersville 4, Galena 10.

Summary: Sudlersville hammered Galena pitchers hard and batted out a game for their first win of the season. Starkey started for Galena and threw his arm out in the second inning; Lockwood was hit hard, also Cockran. Coleman pitched a nice game for Sudlersville but was in trouble most of the time. Good fielding helped Coleman.

HEALTH NOTES

USE YOUR EYES

Vacationists, campers, and hikers through the Maryland woods are warned against the danger that lurks in the familiar three leaved vine, the poison ivy, that climbs over old fences, festoons itself over stumps and bushes, clings to trees and forms a carpet over uncleared grounds. "It is worth while for every out of doors person to learn to use his eyes," Dr. R. H. Riley, Director of the State Department of Health said in issuing his warning, "so that he may be able to distinguish between vegetation that is friendly and the plants and vines and other growing things that should be avoided.

"Poison ivy is one of the worst offenders and in a season like this when all vegetation is especially luxuriant, the growth of this clinging, clambering vine is particularly abundant. But you can avoid it if you will remember that poison ivy is readily distinguished from other vines by its three leaflets. The old saying: 'Leaflets three; let them be,' is worth recalling. The Virginia creeper, or woodbine as it is also called, with which poison ivy is often confused and with which it is often entangled, has five well marked leaflets.

"The dermatitis skin poisoning that is caused by poison ivy and by other members of the same family of plants, among them the poison sumac, and the poison oak, which is not an oak at all, is due to an irritating resinous substance in the sap of the plants. The slightest bruising of the bark or of the leaves seems to release this substance. Some people are immune to its effects. Children and certain adults are very sensitive to it and very slight contact will produce the characteristic symptoms. Direct contact does not seem to be necessary, as the sap is readily carried on the shoes or clothing, on farm or garden implements, on the fur of animals, on golf clubs and golf balls, and in some instances in dropets in the smoke of burning brush containing the branches of the vine.

"The symptoms of poison ivy poisoning often include in addition to painful and severe irritation of the skin, swelling of the affected parts, constitutional disturbances, fever, digestive and kidney complications. It is obvious that the first precaution to be taken is to learn to recognize the plant and to avoid it. If, inadvertently, as often happens, in taking a tramp through the woods, you come in contact with it, the first thing to do is to lather and wash the affected parts thoroughly with a good alkaline soap, strong kitchen soap and water, rinsing frequently in clean water. The washing must be thorough and care must be taken not to spread the irritating poison.

"The itching and redness that are the first symptoms of the dermatitis may not appear for a day or even for several days. But if these symptoms do appear, don't wait for further developments, consult your doctor. He will tell you what to do next."

PRODUCTION COST OF SHORT CROPS

Theaverage cost of producing an acre of tomatoes, for the three years 1925-27, was $80.75 in Harford county and $54.80 in the Eastern Shore area, or an average of $57.91 for the State. With tomatoes selling at $15 per ton, it is necessary to produce 4.5 tons per acre in Harford county and 3.5 tons in the Eastern Shore area to cover costs, and 6.0 tons in Harford county and 5.0 tons in the Eastern Shore area to provide a margin of profit.

The cost of producing a ton of tomatoes during the three years was $10.28 in Harford county and $11.87 in the Eastern Shore area, or an average of $11.57 for the State.

The net income pe racre from tomatoes averaged $34.69 in Harford county and $15.50 in the Eastern Shore area, wit han average of $17.79 for the State. During the three years, 65 per cent of the farmers, growing 66 per cent of the tomato acreage, produced at a profit.

The average cost of producing an acre of sweet corn during the three years was $33.39 is the North Central area and $27.88 in the Eastern Shore area, or $31.59 for the State To cover cost of production with sweet corn selling at $14 per ton, it is necessary to produce 2.4 tons per acre in the North Central area and 2.0 tons in the Eastern Shore area. To provide a margin of profit a yield of 3.25 tons per acre in the North Central area and 3.0 tons in the Eastern Shore area is necessary. The cost per ton in the State was $13.05.

The net income per acre from sweet corn was $1.23. During the three years, 49 per cent, of the farms, growing 51 per cent. of the acreage, produced sweet corn at a profit.

The average cost of producing an acre of peas in Maryland was $43.97. With peas selling at $60 per ton, a yield of about 0.75 of a ton per acre covers the cost of production and a yield of 1.0 ton is necessary for a margin of profit. The cost per ton was $40.93.

The net income per acre from peas was $21.26. During the three years, 78 per cent. of the farms, growing 84 per cent. of the pea acreage, produced peas at a profit.

The greatest opportunity for decreasing the cost of production lies in increasing the yield per acre, especially in the case of tomatoes. With the average fertility of soil in Maryland, larger yields per acre are obtained by the application of more lbor, fertilizer and other materials per acre, which increases rather than decreases the growing cost per acre, but results in a yield sufficient to lower the cost per ton.

(From The Canning Trade.)

While dairymen in the Centreville area have made commendable progress this year in providing feed for next Spring, it will be necessary again in 1930 to sell milk on a manufacturer's price basis, during at least two months. Because of this condition an agreement was reached Tuesday evening with officials of Harbison Dairies, Inc., to continue the same arrangement that was in effect during April and May this year, throughout about the same period in 1930.

CHURCH NOTES

Chestertown M. E. Church

The services tomorow at Chestertown M. E. Church, the Rev. J. Harry Wright, pastor, will be as follows:

10.00 Church School, with lesson theme, "Prophets and Kings of Judah's Decline." 11.00 a. m. morning worship, with sermon by the pastor, subject, "Patriotism." 6.45 p. m. Epworth League, topic, "A Growing Faith in the Kingdom of God."

Fairlee M. E. Church

Robert E. Green, minister. Sunday School 10.00 a. m., Mr. Willis, Supt. Church service 11.00 a. m. preaching by the minister Epworth League 7.30 p. m. Mrs. Bramble leader.

Worton M. E. Church

Robert E. Green. minister. Sunday School 10.30 a. m. B. F. Rash, supt.; Epworth League 7.15 p. m. Preaching by the minister 7.45 p. m.

MILLINGTON

Miss Eva Adkinson, of Wilmington, spent the week end with her parents, Mr. and Mrs. Charles Adkinson, near town.

Miss Nellie Everett, of near town, is visiting her brother, Rev. Willard Everett, of Hillsboro, Md.

Mr. William is the guest of relatives at Salisbury, Md.

Services at Holy Cross Chapel, tomorrow, June 30, will be as follows: 9 a. m. preaching by Rev. J. H. Garner; 10 a. m. Sunday School.

Miss Mary Numbers spent the past ten days with friends at Jericho, Vt.

Little Miss Jean Tobin, visited her grand-parents, Mr. and Mrs. J. A. Tobin, of Middletown, Del., this week.

Mr. Millard Porter was the guest this week of friends in Wilmington.

The monthly meeting of the Asbury Bible Class was held last Tuesday evening in the Sunday School room of the church.

Miss Nellie Everett, of near town, had her tonsils removed last Wednesday at Emergency Hospital, Easton, Md.

Mrs. P. H. Wood, Jr., and twin daughters, Misses Phyllis and Marguerite, of Wilmington, spent this week with her parents, Mr. and Mrs. J. P. Ahern.

Mr. John Anthony visited his brother, Mr. Gaylord Anthony, near Still Pond, this week.

Mrs. Raymond Edwards was the guest last Sunday of relatives near Roberts.

Mr. and Mrs. Howard Stewart returned last Tuesday to their home in Wilmington, after spending ten days with her grand-mother, Mrs. Annie Poore. They were accompanied home by her brother, William, who will make his future home with them.

Mr. and Mrs. Asher Brown, of Millville, N. J., spent the past week end with Rev. and Mrs. R. L. Tawes.

Miss Leona Phillips visited relatives in Philadelphia this week.

Little Miss Margaret Vansant, of Elkton, was the guest this week of her grand-parents, Mr. and Mrs. George Jones.

The Home Guards and Mothers' Jewels of Asbury M. E. Church, were given a picnic last Thursday after noon on Mrs. Amos Everett's lawn, near Crumpton, by the auxiliary of the Woman's Home Missionary Society.

Mr. B. C. Hart and little son, Leon, and Mr. Sudler Wiest spent Thursday of last week in Wilmington.

KENNEDYVILLE

Mr. Richard Haggerty entertained his nephews, of Wilmington, on Sunday. Miss Katherine Haggerty returned home with them.

Mr. and Mrs. James Archibald motored to Wilmington on Sunday. Miss Gladys Archibald returned home with them.

Miss Bennett, of Chestertown, visited her friend, Miss Smyth over the week end.

Preaching in Grace Presbyterian church next Sunday evening at 7.30. Preaching by Dr. John Humphreys.

In spite of the warm weather quite a number attended service last Sunday evening and heard Dr. Humphreys splendid sermon. Come out and hear him.

Mrs. John Hessner entertained relatives from New Jersey the past week.

Mrs. Meeks and Miss Hope Meeks, of Chestertown, spent Thursday with Mrs. John Rollison.

Miss Daisy Ford and Miss Della Spry and friends from Wilmington were week end guests of their parents, Mr. and Mrs. Wilmer Ford.

Miss Katherine Nickerson left on Thursday for the Delaware Watergap, where she expects to spend the summer.

Mrs. and Mrs. Umflet, of Wilmington, visited relatives here on Sunday.

Mrs. Edgar Lusby and Mrs. Wm. Crow spent Thursday with relatives in Denton.

Mrs. James Robinson is visiting her son, Mr. Delbert Robinson, in Baltimore.

Mr. Harry Rasin, Miss Anna Rasin and Miss Mary Hill left Wednesday for summer school.

Mr. and Mrs. Charlie Roader, of Baltimore, spent the week end with Mr. and Mrs. Wm. Webb.

Mrs. Lena Burnham, of Townsend, Del., is spending sometime with her friend, Mrs. Rachiel Hill.

WORTON

Mr. and Mrs. Samuel Wallis entertained friends from Wilmington Sunday.

Mrs. Lewis Wolf and daughters, Jane and Louise, of Baltimore, spent a few days last week with her sister, Mrs. Marion Rash.

Mr. Lawrence Lee, of Wilmington, visited his parents here last week end.

Mr. George Williams, Jr., of Baltimore, was the guest of his parents over the week end.

Miss Anna Williams who had her tonsils removed in Chestertown Hospital is doing nicely.

Mr. Ford Matthews, of Philadelphia, and friend, Miss Gladys Heaton, of Washington, are the guests of Mr. and Mrs. James S. Matthews.

Mr. and Mrs. Otto Schnoor, of near Cambridge, are visiting at the home of Mr. M. H. Byrd.

Miss Clara Matthews is spending some time with her aunt, Miss Emma Cooper, of Pleasantville, N. Y.

Mr. and Mrs. Harold Crew and daughter, Thelma, of North East, are visiting her parents, Mr. and Mrs. Carroll Loller.

Mrs. Josephine Morris, of Baltimore, has been spending sometime with her parents, Mr. and Mrs. Edward Loud.

STILL POND

The W. C. T. U. held its first meeting at Still Pond Church on Friday afternoon, June 21st, with eight members present. We were very sorry not to have had more out but realize it was an inconvenient time for a good many. If satisfactory we will meet in the evening next time at Betterton and trust we may have a better attendance.

Mr. and Mrs. William Medders and son, William, accompanied Rev. and Mrs. Orris G. Robinson to commencement at Cornell University, Ithaca, N. Y., when Miss Clara Medders graduated. The party continued to points farther north, including Niagora Falls and into Canada.

Epworth League service be lead on Sunday evening by Mrs. Howard Rasin. This service begins at 7.30 and all are asked to cooperate and make these summer meetings worth while.

The Daily Vacation Bible School is doing very encouraging and successful work this year. Scholars and teachers alike are interested and we trust that all parents will cooperate and send their children to this school.

Miss Marion Janney, of Baltimore, Md., with her mother and a friend, visited Miss Mamie and Mr. Charles Norris, and Mr. and Mrs. J. M. Norris on Sunday.

Mr. and Mrs. John Jarvis spent last week end in Wilmington.

PENINSULA NEWS

With all indications pointing to record breaking crowds the annual Sudlersvile Firemen's Carnival opened last Friday evening and will continue until tonight, Saturday, June 29. On Friday evening, last, June 28, other important carnivals opened simultaneously at both Millington and Greensboro.

Aunt Adaline Wheatley, colored, for many years cook in the Radcliffe family at Lloyds half a century, died on Saturday of last week. A number of her receipts for cooking Eastern Shore products were broadcasted all over the country last year in Del-Mar-Va literature.

On Saturday, June 15, the Japanese Bettle Quarantine regulations on farm produce went into effect along the new boundary between Kent and Sussex counties, along the Delaware and Maryland State line to the Cecil county line in Maryland and around that to the Pennsylvania line.

Subscription to the Transcript $1.50 per annum.
