This Week

by Arthur Brisbane

LINDBERGH FEELS SAFE
ANOTHER BIGGEST BANK
OLD AGE AN ILLNESS
MacDONALD'S MISTAKE

Colonel Lindbergh, with his wife, is on a flight that will cover a great part of Central and South America.

A dangerous flight, it has stretches of 700 miles with no possible landing. Fortunately, the world's best flier is in charge.

One of the nation's highest officials begged Lindbergh to run no more risks, saying that any accident to him would mean "a great blow to the affections of the nation."

Said he afterward, "I produced no effect, for Lindbergh declined at the outset to admit any danger in flying."

Mrs. Lindbergh seems to have adopted Roosevelt's motto "Deeds, not words." No young woman interests the Amercian public more than she, and since her marriage she has not uttered one word for publication.

Again, "the world's biggest bank" makes its bow; bigger than any thus far.

Charles E. Mitchell, head of New York's National City Bank, absorbed the Corn Exchange bank, creating an institution with resources of $2,650,000,000.

This financial giant will have 100 branch banks in New York. The old fashioned million has given way to the new "billion."

When will the trillion be transferred from books on astronomy to the books of United States bankers?

Science says old age is really an illness—not inevitable. Age is called "progressive condensation of tissue due to loss of water."

Energy that age lack is located in the ductless glands. When your own glands wear out some of them, including some of the most important, can be rejuvenated.

One pupil of Steinach in Vienna has restored youth and "the desire to whistle and sing" in 700 old men. The majority of human beings, however, still are interested in the fact that when the time comes they can die in peace and start again.

Col. R. W. Stewart, former head of Standard Oil of Indiana, beaten in a fight with Mr. Rockefeller, is in England. Perhaps he went there to join the Shell company in a great British oil merger and anti-Standard oil fight.

If the British want action and an American represenative who knows the oil business, they showed intelligence in slecting Col. Stewart.

It looks like a real oil fight.

Betting is wrong—and apart from that, it migh be unwise to bet against the Rockfellers. They have never acquired the habit of losing.

Pope Pius, addressing 300 Ecclesiastical Monitors of the Catholic Action Organization of Italy, complained of "civil discrimination" against young Catholics.

Newspapers representing Mussolinis government attacked and denied the Pope's statment, declaring that "control of Catholic organizations is the necessary function of any state."

This is of importance because it indicates a growing lack of harmony between the Vatican and the Mussolini government.

Ramsay MacDonald is said to be coming to Amercia with the idea that he can persuade his government to allow him 339,000 tons of cruisers, America contenting herself with 300,000.

If that is so, Mr. MacDonald is wasting time. He does not know President Hoover if he thinks the President will consent to any such inequality.

Considering that we could afford a navy of any size, and that Britian cannot afford to compete, our suggestion of equality should be accepted with gratitude.

When the British had the money they always had the biggest navy. And they did not arrange any conference about it.

Mr. Good, Secretary of War, speaking with President Hoover's authority, says the country will spend hundreds of millions in addition to fifteen hundred millions already spent for harbor and river improvements. The Secretary says: "The government will link together every part of the country with a chain of inland waterways, making one great artery of trade."

That's good news. The people want national improvements, have plenty of money and, fortunately, they have a President who is an engineer and understands problems involved.

He would rather attend to great, permanent enterprises and let somebody else attend to bootleg liquor.

The British Home Office shows drunkenness is diminishing in Great Britian; 9,254 fewer arrests in 1928 than 1927. 1928 had the best alcoholic record since the World War.

Here . . . all that's most new in clocks

Today, the *style* of a clock is very important. Clocks should have distinction, character—should harmonize with the furniture design of the room.

A single visit to our new showing of clocks will convince you how actively we have sought what is most new and distinctive, while emphasizing dependable time-keeping service always.

Interesting new clocks are pictured above. Mantel clocks from $7.50; with beautiful chimes, from $40. Charming bedroom clocks at moderate cost.
