LESS POISONOUS WHISKEY.
A ROBOT TELEPHONE.
PROFITS IN STEEL.
TWO BILLIONS OF US.

Commissioner Doran, in charge of prohibition, says "rum poison" will do less harm this Christmas.

Bootleggers, it seems, make their own alcohol, not using so much "denatured" alcohol, in which the government has put poison to keep men from drinking it, the penalty, for drinking as for murder, being death.

It is pleasing to know that fewer people will be poisoned by whiskey specially prepared by government order.

On the other hand, the announcement that whiskey is now less poisonous will not help temperance.

Those who could not be kept from drinking by common sense and self-respect could in some instances be frightened by the statement: "Bootleggers' rum is poisonous."

Some "robot" salesmen sell merchandise.

Another robot, at a distance, answers questions, gives information as to the amount of water in a reservoir,

An airplane traveled from Cleveland to Washington, a robot gyroscope in charge of the controls, until the moment of landing.

Now the telephone company has a telephone that calls out in plain English the numbers dialed. The dial telephone that you have learned to operate can be arranged to tell a central operator what number you want in a voice as clear as that of any phonograph.

It takes a good imagination to suggest something that men can not do.

If you have a steel business, and run it well, you can make money in America with the help of a protective tariff.

Income tax reports of the leading steel companies show that in six years past they have paid income tax on one thousand million dollars of profit.

A billion in six years is good profit, but no more than a great industry should make, in a prosperous country.

The benefit of buying at home from your own people, even if you pay a little more, resides in the fact that the money stays here, goes into other American enterprises, more factories, more production, more prosperity.

After hearing about profits of steel companies, solemn Senators voted to increase the tariff on manganese, which steel companies need, instead of putting it on the free list.

Apparently the Senators think the steel industry too prosperous. They suggest some proud father, observing that his son is fat, and deciding to give him no more food.

The human family is bigger than it thought. The League of Nations statistical department shows that earth's population is only 50 millions short of two billions.

Two thousand million human beings is a big crowd, of whom the majority never think, and a minority think occasionally.

The wonder is not how slowly we progress, but that we progress at all, the few dragging the many along with them.

More than half of us live in Asia. This continent north and south, has 232,000,000. All of Europe has 514,000,000, only 64,000,000, more than China alone.

In vast Africa, where men fight tropical suns, sleeping sickness and many other diseases, the population is only 146,000,000.

Australia, New Zealand and the Pacific islands have 9,000,000.

Earth's total population could stand at the same time on Staten Island, in New York Harbor.

Texas, intensely cultivated, could feed them all and provide them with room to live in comfortably.

And American factories could supply them all with automobiles if they had money to pay for them.

Douglas Davis flew from New York to Atlanta, Ga., in five hours, a record.

Shortly, New York, Chicago and other cities' business men, after the stores and exchanges close on Saturday, will fly south in the winter, landing in time for dinner at the beautiful resorts on the Georgia coast, in time to swim or play golf before dinner.

On German territory occupied by French and British armies during the ten years since the war are 15,000 "post war babies" with German mothers, French and British fathers.

A club of women in Cologne wants Britain and France to support the 15,000 babies.

France answers, quoting Napoleon's law still in force, "It is forbidden to seek to stablish paternity." What Britain will answer remains to be seen.

The 15,000 babies, no matter who their fathers, will be worth in a few years all that it costs to raise them and millions more.

New York City re-elected James J. Walker Mayor by almost 500,000 plurality. The biggest city in America evidently likes the young man who dresses neatly and does not take himself or the world too seriously.

Chestertown, Md., October 28th, 1929.

Report of the Auditing Committee

Of Kent County, Maryland.

To the Honorable Board of County Commissioners of Kent County, Md.

Gentlemen:—In compliance with an act of General Assembly of Maryland, passed January 1904, and in harmony with our appointment as Auditors for Kent County, we have examined the Books, Accounts and Vouchers of the County Commissioners, the Board of Education, the Treasurer's Office, the Trustees of the Alms House and the Dog License Fund.

This Audit deals chiefly with the levy of 1928-29 when a rate of $1.54 on the $100.00 was declared for Kent County purposes.

This report gives in full the source of revenue for the County for 1929-1930 as shown by the books of County Commissioners June 15, 1929.

Respectfully submitted,

J. FRANK WHEATLEY,
M. deK. SMITH, JR.,
ISABEL ROE NEWNAM.
