THE TRANSCRIPT

WITH THE primary election for the nomination of a Congressman from this congressional district to be held next month, no one has yet announced their candidacy. It now looks as though congressman Goldsborough can have the nomination without opposition if he wants it, and it is to be hoped that he will succeed himself. Each time heretofore he has been a candidate he has had to fight for the nomination and for his election. It seems to us only fair and just if he desires to succeed himself in Congress that he should have the Democratic nomination without a contest. He has made a most faithful and able representative.

NOW that the senate has disposed of the tariff they are ready to take up the Muscle Shoals question. Muscle Shoals has abundance of power, situated as it is on the Tennesse river. It was acquired by the Government for the purpose of making nitrogen for munition during the late war, but now that the need no longer exists some of the lawmakers, led by Senator Norris want to establish an immense plant for making fertilizers and furnishing power for public utilities. It has been a much moated question for a long time, one party holding that the government should not come in competition with private enterprises, that the making of a commission to control it will be another prize for office seekers, and that the government cannot run it economically. While Senator Norris and his followers think that the Public Utilities are growing rich at the public expense and the fertilizer will lower the price which the farmers have to pay for it and as the government owns it, it should be run for the peoples' good. Long and bitter has been the fight over this government owned plant. At one time Henry Ford wanted to lease it, but as there was bitter opposition to leasing it to him, he withdraw his offer. So, for over ten years it has lain idle waiting for Congress to decide what to do with it, whether to lease it, or to let the Government run it for the people.

MISS ANNE ROTHWELL STEWART ILL

Miss Anne Rothwell Stewart, founder and first president of the Women's Eastern Shore Society, is ill in a Baltimore hospital and Mrs. Harry E. Houck of Guilford, has asked that her name be placed first on the list of volunteers for a transfersion of her blood, should a transfusion be made.

Mrs. Houck made her offer at the annual meeting of the society at the Women's City Club, when a call for volunteers was issued.

Before more could offer their services, the wife of a physician pointed out that it was only rarely that a woman's blood could be taken for transfusions, that of young men being preferred.

The society then decided to let the executive board of the organization appropriate funds to take care of the fourth transfusion.

Miss Stewart is suffering from anemia. Blood has been given for twice by her nephew, D. B. Stewart, Jr., and once by John Slaughter, a friend of the family from Caroline county.

Miss Stewart is native of this county; she is well and favorably known here.

Are *You* Ready

When *your* Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug; Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot put away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea; effective, too, for older children. *Twenty-five million bottles were bought last year.*

Fletcher's CASTORIA

THE MODERN FUNERAL

The methods and systems in vogue a few years ago, and still adhered to by many, are no longer applicable. In this age and generation a better understanding of the duties of the funeral director has changed the old order. One of the most difficult problems confronting the modern funeral director will be solved when the public realizes that SERVICE is the principal, and in fact, only commodity which we have to offer.

The casket and funeral appurtenances are negligible, or practically so, requiring little or no expense and, in the matter of expense, consist only with the costs of production.

Service is the main consideration—the care and disposition of the body of the one that has passed on. Knowledge and ability and a readiness to relieve the burden of those who are left to mourn.
