This Week

by Arthur Brisbane

DEMPSEY TO FIGHT LIONS.
THE BIG BANK ARRIVES.
DON'T MAKE YOURSELF SICK.
WOMEN ALWAYS PIONEERS.

Our newly discovered planet neighbor, circling around the sun far out beyond Neptune, is the most interesting news item.

We are only a little more than 90,000,000 miles from the sun. This new planet, about the size of our earth, is 1,335,000,000 miles from the sun.

Multiply that by six and you will know, approximately, the length of the far-off planet's journey around the sun.

On that planet, one lives 3,200 earth years to be a year old.

To see the new neighbor, look now. It will be visible with earth's telescopes only about a hundred years longer, and then be hidden for 3,000 years, while it finishes one of its own years.

Jack Dempsey, once heavyweight champion, will go to Africa to kill lions, elephants, giraffes, hippopotamuses and rhinoceroses. On one of his "safaris," that's what the British call a hunting expedition, Mr. Dempsey thinks he may pick out a colored heavyweight.

Plenty of Zulus could fill Madison Square Garden. The difficulty would be to make them endure prosperity and bootleg products after they got here.

If Mr. Dempsey should meet one of the big red-haired, eight-foot-tall florillas of the Baboon country, he'd be surprised.

That kind of heavyweight could stroll along dragging Dempsey with one hand. Carnera with the other.

Money is international. Its power, and respect for it, are international. Now, along lines of government by high finance, comes an international bank.

Gates W. McGarrah was chosen head of it, Pierre Quesney, marvellously able French financier, only 35, was chosen general manager.

Mr. McGarrah is considered one of the ablest financiers in the United States.

Pierre Quesney represents the acute financial intelligence of the French, illustrated in the fact that, so soon after a gigantic war, they have a billion dollars in gold to the credit of France in this country.

What the big bank will be, time will tell.

Andrew Jackson is interested in it, if he still keeps track of earthly matters.

The intelligent people of this country are grateful to President Hoover Congressional extravagance. In dignified Presidential language he says what David Warfield said to Lillian Russell in the Weber and Fields days.

Warfield, in the play, meets Lillian Russell in Paris, invites her to supper and says: "Go as far as you like." Beautiful Lillian orders 10 or 15 different dishes. Then Warfield says: "Missus, because it don't cost you nothing, don't make yourself sick."

It doesn't cost Congress anything to spend billions, taken from the people, but if Congress goes too far it will make the country sick.

Prosperity will not boom if you persuade the man with money that it is better to invest in tax-exempt securities than in enterprises giving employment. That will happen if government reaches in and takes too much from incomes.

Oklahoma unveils a fine statue to the pioneer woman. Women have always been earth's real pioneers, in ideas and in action.

Far back in the Stone Age they had produced all the grains we know, by developing the seeds of wild plants.

They tamed female buffalos to provide milk for their children, planted gardens, changed human beings from a nomadis to a settled life.

They are pioneers of the frontiers and pioneers in ideas and in religion.

The influence of mothers on their sons in the last million years has changed men from prognathous cannibals to semi-civilized money-grubbers.

William Manck, 48 years a letter carrier, absent only one week in 48 years, retires. His superiors shake hands with him and are photographed doing it. That's kind, but Uncle Sam might do more.

He might give William Manck and other faithful servants of the post-office a generous pension on which they could live comfortably when their hard work is done.

And without waiting for them to be worn out he might give them generous pay.

The richest employer in the world should be at least just.

The "Last Man's Club" of Atwater, Minnesota, has buried its last but one member. Charles Lockwood, 87, accompanied to the grave the body of his friend Peter Hall, who died at ninety-one. Now Lockwood is the last. When he goes, the club will end.

AGRICULTURAL NOTES

BY COUNTY AGENT J. D. McVEAN

The following principles are listed as essential to raising pigs free of the handicap of round worms. Those engaged in 4-H Clubs or competing in the 150 day-1500 pound Litter Contest will do well to observe them as is true of all who desire thrifty shoats.

I. Thoroughly clean the farrowing pen, then a thorough scrubbing with **hot lye water.**

II. Scrub the sow's udders with soap and water just prior to farrowing.

III. HAUL the sow and litter to clean pasture (not to old hog lots which are sure to be worm infested.)

IV. Keep the young pigs on clean pasture until they weigh 75 to 100 pounds (when danger from round worm infectation is largely over.) Forage crops are essential also for economical rains.

A number of Kent County farmers are entering sows and litters in the Litter Contest. It will be recalled that Mr. O. E. Yerkey was the Kent County winner in this state-wide contest last year. He won a $2500 prize and had the satisfaction of producing a splendid litter of pigs very economically. The County Agent has entry blanks and rules for the contest.

Any Kent County poultry raiser desiring to enter a pen of ten (10- pullets in the Maryland State Egg Laying Competition, beginning next fall, may get entry blanks from the County Agent. Only one hundred pens are accepted, first come, first accepted. The present contest is half-way completed. It will be recalled that the 1000 birds in the 100 pens last year averaged 202 eggs per hen, which is far above the State average. It demonstrates the merit of the ration and housing plan advocated by the Maryland Experiment Station.

The importance of high quality seed corn is not sufficiently realized as it effects the stand and yield. Corn free of seed borne disease is very important. Unless seed known to be free of diseas is available, the seed should be treated. The "dust" treatment is quite effctive. Other important factors are seed bed preparation, fertilization of the soil and proper tillage methods following planting.

Those who have apple orchards which they desire to spray should apply at once the "petal fall.' spray This spray is designed to protect all new foliage from scab and leaf spot infection; to poison curculio and to prevent entry of coddling moth worms through the calyx. All of which is important if yield and quality of fruit is desired

"What we want is a candidate who isn't too radical nor yet too conservative; in short, a middle-of-the-road man."

"Then Jimpkins is the man to nominate. He's been a bus driver for years."

The knowing woman no longer submits meekly to regular, systemic suffering. For this kind of pain is relieved by Bayer Aspirin just as readily as an occasional headache, twinge of neuralgia, or the more intense pain of rheumatism. Try it for the days you dread and share the gratitude of business and professional women for Bayer Aspirin. Doctors declare it safe to use freely. Any drugstore.

BAYER ASPIRIN

Aspirin is the trade mark of Bayer Manufacture of Monoaceticacidester of Salicylicacid

AUNT SARAH'S OVENS $1.00

THE MODERN FUNERAL

The methods and systems in vogue a few years ago, and still adhered to by many, are no longer applicable. In this age and generation a better understanding of the duties of the funeral director has changed the old order. One of the most difficult problems confronting the modern funeral director will be solved when the public realizes that SERVICE is the principal, and in fact, only commodity which we have to offer.

The casket and funeral appurtenances are negligible, or practically so, requiring little or no expense and, in the matter of expense, consist only with the costs of production

Service is the main consideration—the care and disposition of the body of the one that has passed on. Knowledge and ability and a readiness to relieve the burden of those who are left to mourn.
