FARMERS,

LIST YOUR

Repair Needs.

It would be hard to find a farmer what at some time or another had not lost valuable time waiting for necessary repair parts. Take this territory and total up the time lost in this way and it will astonish you. And all because repairs are not ordered as early as they should be.

There is no better time than right now—just before the busiest season on the farm—to go over your machines carefully, make a list of repairs you are likely to need and send it to us. With this list in our hands, we can order our stock so as to be prepared to met every call promptly.

Repair part service is a necessary part of our business. We realize what it means to you in time and money to get what you need at once. Help us to help you by making up your list now and sending it in to us.

PAUL COMEGYS

MILLINGTON, MD.

Our Prayers

Our prayers are ships. We send them to no uncertain port. They are destined for the throne of grace; and while they take a cargo of supplications from us, they come back argosies laden with the riches of divine grace.—Presbyterian of the South.

If the turkey hen is to be allowed to hatch her own eggs, the nest should be made where it can stay through the hatching season.

More revenue from farm flocks is obtained from eggs than from broilers or roasters sold.

June & July Baby Chick Prices

Barred Rox, Reds, Wyandottes $10 per hundred.

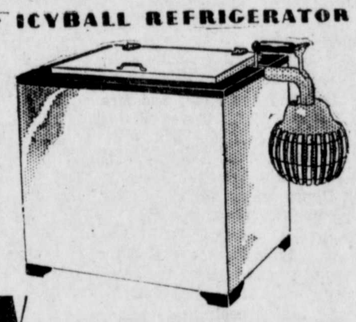

White Leghorns, $9 per hundred.

500 or more, $1 per 100 less.

THE CROSLEY ICYBALL REFRIGERATOR

NEW INVENTION

Demonstration of device that revolutionizes refrigeration

PROTECTS YOUR HEALTH SAVES FOOD

Do you know that you can have perfect refrigeration in your own home—without electric current or gas?

With the Crosley Icyball Refrigerator you have—at a modest expense—an efficient refrigerator which you can operate yourself. No matter where you live you can have a Crosley Icyball Refrigerator to preserve your food and provide you with cold storage for any purpose.

$85 COMPLETE F. O. B. FACTORIES

Once a day you heat the Crosley Icyball unit for one hour and a half and you then have cold for all purposes until the next day. A gas or an oil stove may be used to heat the unit. That is all there is to it. No fuss no expense. The average cost of heating is two cents per day.

HEALTH NOTES.

MOTHERS AND YOUNG CHILDREN

The report of the Bureau of Vital Statistics of the State Department of Health, of births, stillbirths, infant deaths and maternal deaths for the State of Maryland for the first four months of 1930 as compared to the record for the corresponding period of 192 indicates a falling off in the total number of births, 10,274 in 1930, in comparison with 10,365 for the corresponding period of 1929.

The number of infant deaths was considerably fewer in 1930, 711 of which 289 occurred in the counties, and 322 in Baltimore City, as compared to 887 in 1929, 507 in the counties and 380 in Baltimore City. The infant mortality rate was 69.2 for the State, for the first four months of 1930, as compared to 85.6 for the corresponding period of 1929. (By the infant mortality rate is meant the number of deaths under one year to each thousand live births.) The reduction is reflected in both white and colored rates. The white rate for the first four months of 1930 was 59.7 in comparison with 73.6 for the corresponding period of 1929; the colored infant mortality rate was 101.9 for the first third of 1930 as compared to 138.4 for the corresponding period of 1929.

Forty-nine women in the State, 22 in the counties and 27 in Baltimore City, died from some complication in childbearing during the first four months of 1930 as compared to 62 during the corresponding period of 1929. This gives a maternal mortality rate for the State, per thousand live births of 4.8 for the first third of 1930 as compared to 6.0 for the same period of 1929. The number of maternal deaths can be greatly reduced by securing for expectant mothers satisfactory care before, and during, the birth of their children. This care, so greatly to be desired for the mothers, would at he same time reduce the number of stillbirths and the excessive number of infant deaths that occur during the first few weeks of life. The need for such measures is better understood when it is remembred that nearly half of the infant deaths that are recorded each year, occur during the first month of life.

DAIRY HERD IMPROVEMEN ASSO. MEETS

HERD RECORD BOOKS PROVE VALUABLE REFERENCES

A very enthusiastic meeting of the Kent Dairy Herd Improvement Association was held Wednesday night at the County Agent's office.

The officers of the up and coming young organization are Walter L. Walbert, President; Olin S. Davis, Vice-President; P. M. Brooks, Secretary-Treasurer; T. Ringgold Jones. S. W. Caldwell, J. I. Rigby, Directors; A. H. Bikle, Tester.

The discussion of the Herd Books reveal some exceptionally good cows also some boarders. The members realize that the record keeping is the only sure way to take the guests out of dairying. It reveals the efficiency of the man in supplying suitable feeds in adequate amounts and gives a definite check on his grain feeding practices. It reveals the cow's ability to respond to care, feed, and management. It determines which cows should go to the butcher and which are of economic worth to the farmer. The production record shows which cows calves should be raised for herd replacements. The Herd book furnishes a permanent place in which to record pertinent facts relating to pedigrees, breeding and freshing dates, disposal of offspring and, as the years pass, will prove the breeding merit of the sire.. The Herd Record Books are therefore prized possession of interested dairymen. They will be treasured through the years as a means of recording and measuring progress in the development of the herd.

It appears that, at least, one bull owned by a member of the Association has been "proved" by the Record Keeping. Seven daughters that were tested this year show they have inherited production ability. Many interesting, as well as practical, results are revealed. These most valuable lessons are being worked out by County Agent McVean and Mr. Bikle, the tester, and will be summarized in a Report for the members. The report, when issued, will be most interesting and valuable to all dairymen.

The members of the Association are to be congratulated on their business acumen. The Kent Association is one of about 1100 scattered throughout the United States. These Association show the possibilities in dairying, The United States average production in these Associations in 60 per cent. greater than the average United States cow produces, naturally such cows are far more profitable than "just cows."

The members of the Kent Association are:

Charley Rausch, Olen Davis, Scott Rosen, E. Thomas Massey, Samuel W. Caldwell, Mm. B. Anthony. T. Earl Nickerson, John Carvel Sutton, E. R. Pennington, Roger Harris, Walter T. Morris, Jr., Romie Morris, George Carroll, L. A. Sutton, J. Ivan Rigby, Walter T. Bramble Walter Walbert. Weldon Walbert, Walter Moffett, A. Earl Nicholson, Wm. G. Smyth, M. P. Edwards, T. Ringgold Jones, Percy Hepbron, Arthur Lusby, George Clendaniel, J. D. Davis, Jr.
