PAIN

HEADACHES
NEURITIS
NEURALGIA, COLDS

Whenever you have some nagging ache or pain, take some tablets of Bayer Aspirin. Relief is immediate!

There's scarcely ever an ache or pain that Bayer Aspirin won't relieve—and never a time when you can't take it.

The tablets with the Bayer cross are always safe. They will not depress the heart, or otherwise harm you. Use them as often as they can spare you any pain or discomfort. Just be sure to buy the genuine. Examine the box. Beware of imitations.

Aspirin is the trade-mark of Bayer manufacture of monoaceticacidester of salicylicacid.

ACID STOMACH

EXCESS acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which will neutralize acid. The best corrective is Phillips Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention.

One spoonful of Phillips Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods once you learn how quickly this method acts. Please let it show you—now.

Be sure to get the genuine. "Milk of Magnesia" has been the U. S. Registered Trade Mark of The Charles H. Phillips Chemical Company and its predecessor Charles H. Phillips since 1875.

AFTER 40
bowel trouble

Constipation may very easily become chronic after forty. And any continued constipation at that time of life may bring attacks of piles and a host of other unpleasant disorders.

Watch your bowels at any age. Guard them with particular care after forty. Whenever they need any help, remember a doctor should know what is best for them.

"Dr. Caldwell's Syrup Pepsin" *is a doctor's prescription for the bowels.* Tested by 47 years' practice, it has been found thoroughly effective in relieving constipation and its ills for men, women and children of all ages. It has proved perfectly safe even for babies. Made from fresh laxative herbs, pure pepsin and other harmless ingredients, it cannot gripe; will not sicken you or weaken you; can be used without harm as often as your breath is bad, or when your tongue is coated; whenever a headachy, bilious, gassy condition warns of constipation

SEES ROTARY AS ECONOMIC INFLUENCE

Dr. Paul E. Titsworth Gives Opinion

Though Rotary International is not an organization committed to the propagation of any issue, not even to spread propaganda in the cause of peace, the world-wide body is, nevertheless, coming to be a steadying influence in the economic and social councils of the Old World and is doing much to hasten the day of universal peace toward which the world is striving. This is the opinion of Dr. Paul Emerson Titsworth, president of Washington College, Chestertown, Md., who has, within a week after his return from Vienna where he attended the international Rotary convention, made a visitation to thirteen Rotary clubs in the 34th district of which he is the newly elected gov-

Dr. Paul E. Titsworth

ernor and in which this city is included. The very fact that Rotary does instill into its own members a love of peace and good-will will in itself hasten the advent of world peace, the Rotarian educator believes. Evidences of this probability were seen on every hand at the convention, he said in an interview this week. Not only were 67 countries represented by 4,288 delegates, more than half of them of non-English speaking nationalities, but the good-fellowship existing among nationals in Central Europe whose countries are saturated with ancient fear and distrust of each other was a portent of the final peace that must come to Europe if it is to remain civilized. When the Rotary club of Budapest entertained in honor of Czecho Slovakian delegates and nationals of two countries, which may fly at each other's throats at any time, fraternized on common terms it is the opinion of the 34th district governor, who was present, that such gatherings cannot help but be constructive agencies in the cause of peace and international understanding. "Rotary may serve as a common denominator, so to speak, whereby divergent nationalities may get together, understand each other and cut away age-old suspicions and barriers of political hatred," he said. The district governor spent a week at Semmering, where the assembly for district governors was held and then attended the convention proper where he was impressed with the increasing internationality of the Rotary movement. Sidney Paschal, elected to head the international body, was the first president, not a North American, ever chosen. Following the convention Dr. Titsworth spent a week in Oberammergau, where the Passion Play is staged every ten years, as the guest of Anton Lang, the Christus of the play. Crossing the German frontier the Maryland educator sounded sentiment and returned home convinced, he said this week, that Germany is a peaceful country and not thinking of war but only of her economic recovery through peaceful means. Restlessness is the keynote in Central Europe, what with high tariff walls and the impossibility of German and Austrian goods finding a market and Germany, feeling she is the doormat of Europe, is patiently trying to readjust herself to new conditions, a different Germany from the haughty, militaristic nation prior to 1914. If revolution is to be avoided in those central European countries, however, America and the rest of the world, says Dr. Titsworth, must realize that all nations are economically interrelated and take measures to relieve the stress under which they are laboring. The new governor had as fellow passengers on the Mauretania, going over, Secretary of the Treasury Andrew Mellon and Lady Wilkins who was following her husband on the submarine, Nautilis. He escorted home on the Berengaria 22 students in American colleges who spent their junior year in foreign study. He will shortly continue his visitation to the other 48 clubs in the 34th Rotary district.

NAME COUNTY TEACHERS FOR YEARS 1931-32

South Africa's "Tablecloth"

The "Tablecloth" is a cloud that occasionally covers the flat top of Table mountain in South Africa. Charles Fitzhugh Talman of the United States weather bureau, in his book "The Realm of the Air," says it is probably the most famous individual cloud in the world, and in describing it adds: 'It consists of a dense cloud sheet, formed when warm moisture-bearing winds are forced up the steep slope of the mountain, especially in summer. The cloud often pours over the brow of the mountain, like a mighty cataract, and is dissolved as the wind is warmed by compression in descending to a lower level. The effects produced by this rolling mass of vapor are sometimes indescribably grand, and the phenomenon is all the more striking because a perfectly clear sky generally prevails over the surrounding country while the "Tablecloth" overspreads the mountain."

"Railroad" and "Railway"

The reason that one transportation company is called a railroad and another a railway is simply that railroad and railway are corporate names. Often when a railroad goes bankrupt it must reorganize under a different name. For example, the Chicago, Milwaukee & St. Paul railroad went into the hands of receivers and when it emerged it was the Chicago, Milwaukee, St. Paul & Pacific railway, the adding of the words "Pacific railway" making a new corporate name. Likewise the changing from railroad to railway changes the name of the corporation.
