## TEST RIVER FOR POLUTION

On Wednesday afternoon of this week the State Department of Health took samples of water from Chester River and will take them to Baltimore to be tested. A report will be made within the next ten days.

The samples were taken from the following places: Barroll's cove and three samples were taken from this point to the Queen Anne's shore. At the cove between the steamboat wharf and the bridge and from this point across the river; at the mouth of Radcliffe Creek and from this point across the river; at the Country Club and then across the river; at Cannon St. and then across the river. These tests were made on ebb tide.

On Thursday morning, with a flood tide these tests were repeated. The largest sample was taken under the drawer of the Chester River bridge.

W. H. SCHAEFER, Attorney.

THE ONLY NATIONAL BANK IN KENT COUNTY

# "The Bank Where You Feel At Home"

## Important Facts Every Checking Depositor Should Know

We want you association with this bank to be on the basis of Mutual Friendship and understanding. Therefore, the less mystery there is about our banking operations and the more knowledge you have of the ways in which we are trying to serve you, the better you can cooperate to your advantage.. The facts are submitted to you with this purpose in view. Please read them carefully.

FIRST, A bank is a business which must be conducted on business principles because the bank does not deal directly in goods over the counter, people often lose sight of the fact that banking is, nevertheless, fundamentally a business of buying and selling, which must be conducted like any sound business,—For profit as well as for service.

SECOND, A fair profit is essential to both good management and good service the commodities the bank deals in are money, credit, and service. It accepts and safeguards deposits, provides valuable facilities, and renders a great variety of helpful services. In return, it asks the temporary privilege of loaning part of these deposits in safe ways that will return enough money for the bank to pay for its service, with a little added profit besides.

THIRD, The bank that makes money is the safest place to deposit money, a well-managed bank, like a properly conducted business, should make money. It it does not make money it will not be a strong bank, and if it is not a strong bank it cannot be a safe place for a depositor's money. This fact should not be overlooked.

FOURTH, Good checking balances help to make a bank strong, every checking depositor should try at all times a keep a balance in his checking account large enough so that after all current checks are paid there will still be left on deposit, a sum that the bank can use profitably for the expense of rendering service. Intelligent co-operation of this character offers the best possible proof of individual ability and good management.

FIFTH, How the bank and its checking depositors may co-operate to mutual advantage, —service, in a bank, travels in a circle it is not something that passes from the bank to its depositors, never to return. The circuit must be completed. The depositor receives service and gives his co-operation in return. The ideal condition exists where both understand each other and work together closely for mutual benefit.

SIXTH, Every depositor, therefore, who maintains a fair checking balance in his account, is helping himself and at the same time making it easier for the bank to give him its best service at all times.
