Lessening Sadness

Is the First Duty of the Funeral Director

My excellent system of arranging the details for each and every funeral entrusted to my care leaves with those upon whom I wait, a feeling of confidence and satisfaction that the last offices were performed with such perfect harmony as to greatly lessen the sadness connected with such an event.

Laws Allows Horse One Bite, One Kick

Los Angeles.—Following the old rule that a dog is entitled to one bite, a court here went a step further and ruled that a horse cannot be denied a single nibble, or for that matter, one kick—but not both.

Harry Goldstein, a dealer in cast-off articles, sought $725 from Frank Martin, operator of a riding stable, charging that a horse he had rented from Martin had attempted to bite his hand.

The judge ruled that Goldstein must show that Martin's horse was of a habitual vicious nature. The junk dealer couldn't prove that he horse had previously bitten or kicked, and lost the suit.

AMERICA WAS ONCE JOINED TO EUROPE

French Scientist Says Deluge Parted Continents.

Paris.—The Abbe Moreux, eminent French meteorologist and scientist, has aroused intense scientific interest by reviving discussion of the theory that the American continent once was joined to the Old world but, after the deluge, floated away to its present position.

This theory was advanced during the early part of this century by the German meteorologist Wegener, who died recently. Accepting the theory that the interior of the earth is fluid, then the solidified continents may be giant expanses of floating earth, attached to the interior of the earth by a supple, gradually diminishing link.

The Abbe Moreux points out that the German scientist held that the two continents, when they were close together, fitted into one another almost perfectly, as though they were parts of a jigsaw puzzle. Examination of a world map shows that this jigsaw puzzle idea is not so farfetched as it would seem at first.

When the deluge came, Abbe Moreux says, the narrow gap between the continents widened, America drifted away, leaving the wide expanse of the Atlantic to separate the newly created world from the old.

The French scientist declares the theory is not new. It was first advanced by Pierre Placet in 1668, and again by Snider in 1889. Abbe Moreux, while unwilling to pass on the theory, points to the curiosity of the islands of the Atlantic, such as the Azores and Madeira. Have they remained stationary, or are they floating more slowly toward the new world?

It is indicated that the French academy of sciences may discuss the theory in its entirety, while organization of a mission to study the composition of the Azores and other Atlantic islands is being urged.

Legion Would Push Work on Public Improvements

Chicago.—"While the American Legion is constantly looking after the welfare of physically disabled comrades, the Legion now feels that it should give attention to the many thousands of veterans who are physically sound but financially disabled." This statement was made by Ralph T. O'Neil, national commander of the American Legion in commenting on the public improvement programs being sponsored by the ten thousand Legion posts in ten thousand cities.

"Government reports show that there are about $2,500,000,000 worth of public improvements planned and nearly ready to carry through," points out Mr. O'Neil. "But many millions of dollars worth of projects are tied up in red tape and money appropriated is lying idle. Since a great deal of man-power is required in construction work, labor's share of this two-and-a-half-billion-dollar program will be in the neighborhood of one and a half billion dollars. Labor needs that money

"The American Legion unemployment commission, headed by Howard Savage, past national commander, asks that each Legion post support in its own community needed projects so that employment may be furnished immediately. This will be to the public benefit for projects built now will cost far less than later when higher prices return. Further, money productively spent to the benefit of labor and the community will not have to be spent next winter in nonproductive relief work with the same men. The ex-service man asks no charity, but an opportunity to support himself by building up his community and his home."

GREAT GARDEN FOR U. S.-CANADA BORDER

Plan Living Monument to Honor Long Friendship.

Toronto, Ont.—The project of an international peace garden on the boundary line between United States and Canada is proceeding. Before very long it will be possible for the sponsors to announce the site of this modern Eden of trees, shrubs and flowers which will be laid out as a living monument to the long amity of the two nations.

Then, according to H. J. Moore of Islington, Ont., who conceived the idea and is now international secretary of the scheme, the drive for funds will be on in earnest. Funds have been coming in, although no special effort has been made to induce them. These have been spontaneous gifts from people who have, either individually or in groups, been seized by the graphic beauty of the plan to make a boundary garden.

Gets Big Support.

It was August, 1929, when Mr. Moore first outlined the idea to the National Association of Gardeners of America at their annual convention in Toronto. It was enthusiastically indorsed and received such support that today 56 national, state and provincial organizations have put their pledges behind it.

Recently a wave of support has come from the Middle West and South, particularly from Manitoba, the Dakotas, Kansas, Nebraska and Texas.

These are states on the great Canada-to-Canal highway, called already the Main street of America—which will eventually run from Churchill on Hudson bay, down through Canada, the United States, Mexico, and Central America to Cape Horn. It will be, it is claimed, the world's greatest highway and will make it possible to motor from the sub-Arctic of Canada through the tropics to the southern tip of the continent.

The road now runs from Bowsman and Swan River, Manitoba, across the boundary and down through the United States to Mexico City. It is not yet a completed highway throughout.

Site Wins Favor.

The reason for the recent strong wave of support from regions on the Canada-to-Canal highway is evident from the fact that the road runs through an area that is being considered as a possible—one might almost write probable—site for the International Peace garden. This area is Turtle mountains, on the boundary between Manitoba and North Dakota, one of the few heights of land in the mid-west prairies.

Geographically this area could not have been more ideally located for its purpose. It is on this main north-south highway of the continent and on the boundary line almost exactly midway between New York and Vancouver.

It is, in fact, almost at the exact geographical center of the North American continent.

Ex-Passenger Ship Runs Michigan Mill

Menominee, Mich.—Once a proud freight and passenger carrier on the Great Lakes, the steamer Pere Marquette No. 6 is now operating a saw mill.

Tom Finn, owner of the vessel, also controls the Sawyer Goodman Lumber company. The company's boilers wore out this spring and since the mill was going to run only a few months it was deemed inadvisable to replace them.

So Finn backed the old Pere Marquette No. 6 into a slip alongside his mill, hooked up the boat's boilers with the mill's engines and had plenty of steam.

Butter Is $6 a Pound Under Rule of Soviets

London.—S. Koldofsky, who has just returned from a mission in Russia on behalf of the British Federation of Jewish Relief Organizations, reports the following price list for food in Moscow: Milk, 42 cents a pint; eggs, 36 cents each; butter $6.24 a pound; oranges, $2 each.

Chocolate, coffee, cocoa and lemons can only be obtained through food bootleggers and at prohibitive prices. Only workers possessing "working cards" can obtain tea, and then only a quarter of a pound per week is allowed for four.

Growth of English Language

The English language is growing constantly. The latest edition of Webster's New International dictionary includes over 400,000 words. Thirty-six pages of the volume are devoted to new words which have come into use within the past few years.

MAGNANIMOUS POP

Father: "Yes, my boy, I'm a self-made man."

Son: "Gee, Pop, that's what I admire about you. You always take the blame for everything."

INCRIMINATING

A Negro was pleading his own case to save the price of a lawyer. He called the chief witness to the stand and said, "Joshua, where was I when we stole dose chickens?"

There's Power Aplenty in the McCormick-Deering 10-20

THE McCormick-Deering 10-20 Tractor provides power in abundance for general farm work. It pulls two plows under all reasonable conditions and travels at good speed while plowing deep. For its size, the 10-20 has a great capacity for work—you can apply its power three ways—by drawbar, belt, or power take-off—to operate a variety of equipment throughout the year.

The surprising strength of the 10-20 is due to the rigid one-piece main frame, in and on which are mounted the 4-cylinder engine, clutch, and transmission and differential assemblies. All important wearing parts are completely enclosed, protected from dust and grit, and run in a bath of oil. Handholes provide quick accessibility to all enclosed parts.

Ask us how this remarkable, sturdy, powerful tractor can make power farming a reality on the moderate-size farm. We also have the economical McCormick-Deering 15-30 and the all-purpose Farmall.
