WHEN you start at sudden noises, worry over trifles, can't bear the noise that children make, feel irritable and blue—ten to one it's your nerves.

Don't wait until your overwrought nerves have kept you awake half the night and paved the way for another miserable day. Take two teaspoonfuls of Dr. Miles' Nervine and enjoy the relief that follows. Take two more before you go to bed. Sleep—and wake up ready for the day's duties or pleasures.

Dr. Miles' Nervine is now made in two forms—Liquid and Effervescent Tablet. Both are the same therapeutically.

Liquid or Effervescent Tablets at all drug stores.

Price $1.00

SCHOOL DAYS — By DWIG

Film Stars Demonstrate Record "Distance" Call

The longest transoceanic telephone call ever made, 21,000 miles, from Los Angeles, Cal., to Sydney, Australia, now has its counterpart, the world's shortest call, 30 inches long, recently made at Paramount Studios, Hollywood. The map illustrates the route of the longest call, and Peggy Shannon and Buddy Rogers, film stars, are at opposite ends of the shortest route, which runs through walls of a soundproof cabinet used to check on sound quality in "talkies." When a talking picture is filmed, sound experts inside this box talk by telephone with persons outside it, to avoid delay in unlocking the tightly closed door. An electric light is used as a signal, instead of the usual telephone bell.

ADVOCATES RE-FORESTATION

AMERICAN FORESTRY ORGANIZATION POINTS OUT POSSIBILITIES OF ROOSEVELT PROPOSAL

Last Winter The Transcript published a paper which was written by Mrs. W. W. Hubbard, and read by her, before the Women's Democratic Club in Washington. The subject was "Planting Trees as a Relief for Unemployment", Rosevelt the Democratic Presidential nominee is imbued with the same idea. Secretary Hyde of the Department of the Interior condemns the proposition. The following is copied from the Washington Star. It is a reply to Sec. Hyde by Ovid Butler executive Secretary of the American Forestry Association:

"Secretary of Agriculture Hyde's attack on Democratic Presidential Nominee Franklin D. Roosevelt's reforestation proposal was condemned yesterday in a letter sent to the Secretary by Ovid Butler, executive secretary of the American Forestry Association.

"I believe that what the American people, particularly those unemployed and suffering, desire and what they are entitled to is a thorough exploration into possibilities of public welfare work available in the whole field of forestry and the opportunity to perform that work. They do not want it approached in a negative way. Your department represents the public in this field and country. Therefore it looks to you to give it the full facts regarding the possibility of employment relief offered by a broad and constructive project of forest work," the letter read.

Mr. Roosevelt's proposal, which was designed both as a reclamation project and a mode of unemployment relief, would be of little value in either case, Secretary Hyde said in a statement Tuesday.

Butler's Letter

Butler's letter, in part, follows:

"I have read your statement discounting the possibilities of providing work for the unemployed through a national project of reforestation. It is true that if reforestation is viewed in the narrow sense of merely planting trees, such a project has its limitations, due to insufficiency of nursery stock.' The question before the American people, however, is to provide constructive work to relieve distress among hungry men women and children. To give the impression that forestry offers only the possibility of tree planting is, in the judgment of the American Forestry Association, to dismiss the subject without fair consideration of the very large and diverse possibilities which the field offers.

"Your department is custodian of some 150,000,000 acres of forest land In addition it co-operates with virtually every State in the Union in protecting private and State forest resources from fire. It engages in extensive protection of trees and forests against destruction from tree-destroying insects and diseases. It carries on forest research in every section of the country, and it is concerned with the maintenance of tree and plant cover on idle land as beneficial influences in controlling foods and stpping soil erosion, which you yourself have stated is impoverishing millions of acres of our land.

Face Possible Loss.

"The records of congressional hearings offer abundant evidence that your department yearly stresses to Congress the need of expanding these and other forestry activities in order adequately to protect basic natural resources of the Nation. You are no doubt aware of the fact that the country is facing an emergency in the protection of its forest resources from fire, due to the inability of many States and private owners to provide protective funds and to the recent action of the Government in reducing co-operative funds to be made available this year. If the process of depletion in the Nation's system of resource protection is permitted to continue, it will expose to wholesale loss not only our forest assets but the complementary values, inherent in stable forest land administration, such as forests, wild life, soil fertility, scenic beauty, water supply and the beneficial influences of forests, on floods and erosion.

"There appears to be no question that if a national forestry project, viewed in the broad light of needed work to be done in protecting the country's forest and complementary resources from fire, insects and diseases, in protecting agricultural lands, communities and cities against erosion and establishing trees and plant covers for watershed protection, in building protection roads and trails, lookout towers, telephone lines, fire lines, etc., on national and State forests, national parks and game preserves, work for a very large number of men could be provided. Furthermore, it is work that must be done sooner or later if our national resources are to be adequately perpetuated and the real sources of our national wealth maintained intact. The present situation, in the judgment of the American Forestry Association, offers an opportunity to accomplish this constructive end, and in so doing to contribute very materially to relieving unemployment.

California Used Men

"Your attention is called to the fact that local communities and some of the States have already recognized and seized the opportunities offered by the field of forestry. During the past Winter, for example, the State of California took men from the bread lines and put them to work in the forest and watershed areas of the State on fire protection improvements, such as snagfelling, roadside clearing, firebreak construction, insect control, etc. Some 25 camps were established, with an average of 200 men in each camp, and I am advised that the undertaking has been highly successful. I cite it merely as an apt illustration of what may be done by effective cooperation between Federal, State and local governments in giving distressed people an opportunity to do needed and constructive work. Multiply these camps in California and in every forest State in the Union and relief possibilities loom large."

WORTON

Miss Maude Morris, of Denton, is visiting Mr. and Mrs. Charles Ivens.

Miss Ann Taylor spent last week end with Mr. and Mrs. Thomas Taylor.

Miss Betty Hadaway is spending some time with Miss Hazel Wallis, of Middletown.

The Worton M. E. Sunday School will hld its annual all day picnic at Tolchester on Wednesday, August 3.

Mrs. Howard Carter and daughters, Audry and Betty, of Syracuse, N. Y., are spending the summer with her parents, Mr. and Mrs. B. F. Rash.

Mr. Barney Cooper had the misfortune to have a rib broken while milking last Sunday.

Mr. Henry Matthews, of Rochester, N. Y., is the guest of his parents, Mr. and Mrs. James Matthews.

Mr. Kenneth Carter and Miss Frances Midlam, of Wilmington, spent last week end with his grand parents, Mr. and Mrs. B. F. Rash.

Subscription to the Transcript $1.50 per annum.

Phone Johnny on the spot for Coal--149.

When the mercury is dancing up to meet the perspiring sun—that is the time to buy your supply of coal. It is priced now to help frugal, prodent folks save money.
