SCIENTIFIC
because Fully Automatic

Kelvinator refrigeration is scientific, because it eliminates guess-work and hand-adjustment. The four zones of cold are constantly and automatically maintained.

(1) Food preservation temperature is constantly below 50°. (2) The Frost Chest, for meats, fish and game, is always below freezing. (3) Ice cube trays, constant, rapid freezing. (4) World's Record Fast Freezing Speed, for freezing desserts or ice cubes in a hurry—always.

Come in and let us explain how the *fully automatic* Kelvinator maintains these four distinct temperatures constantly; also how fully it covers the 16 requirements of the Standard Rating Scale.
