Which Gasolines Knock the most?

*Electric Ear REVEALS THE TRUE KNOCK RATING OF 16 RIVAL GASOLINES IN ACTUAL ROAD TEST

New TYDOL winner over 16 gasolines in first scientific anti-knock road test!

Even the engineers have never known which gasolines knocked most, or least—*on the road.*

For laboratory octane tests won't stand up—*on the road.*

But when science perfected this new super-sensitive Sound Meter, it created a new way, a true way, to measure knocking—*on the road.*

For the first time, 16 rival gasolines told their true stories . . . while the Electric Ear listened in . . . and recorded every ping and pound.

And every knock was a boost for the New TYDOL—winner in every test. First in anti-knock quality. And first in power, too. For the less a gas knocks the more power it develops, as every motorist knows.

Change today to this new super-fuel. Thousands of orange-and-black TYDOL pumps are waiting to fill your tank with ALL the premium qualities—at the regular price.

Try it. Check its power and anti-knock. Compare it with any gasoline at any price. You don't need a month. Or a week. One day's driving, or even a single trip, will sell you 100% on the New TYDOL, and keep you sold.

*Electric Ear KNOCK CHART

"ELECTRIC EAR" is the popular name for the new and amazingly accurate instruments which record sound in decibels. A decibel is an engineering unit denoting volume and intensity of sound. In these tests, lowest decibel rating (new Tydol) indicates best anti-knock gasoline.
