The NEW McCormick-Deering Spreader Features an ALL-STEEL Box

THE new McCormick-Deering No. 4-A *all-steel* spreader is convenient, low to the ground, simple, and compact. It features a galvanized, rust-resisting, copperized, non-warping, heavy-gauge steel box of 60 to 70-bushel capacity. Eight roller bearings and Zerk lubrication, combined with perfect alignment of all parts, make this new *all-steel* spreader unusually light in draft. Two horses can haul capacity loads in it all day long.

Five spreading speeds are provided, permitting the use of just the right amount of manure at all times. The manure is torn and shredded by a saw-tooth upper beater, a spike-tooth lower beater, and a wide-spread spiral before it is spread in an even layer over the soil. A special end-gate can be provided for use when liquid manure is to be hauled. A brake is available as special equipment. Also, there is a lime-spreading attachment which changes the No. 4-A into an efficient lime spreader.

See this new *all-steel* spreader at our store at your first opportunity.

SPURNED BY HIS IDOL

Leslie Howard, as the 'OF HUMAN BONDAGE' hero, makes ureciprocated love to the contemptucus waitress, Bette Davis, in the RKO-Radio Picture from the famous W. Somerset Maugham novel.

POWERFUL DRAMA IN 'OF HUMAN BONDAGE' WITH LESLIE HOWARD

He believed that dreams and human bondage are the stuff of which mortals are made.

He himself was in bondage—to a woman, a beautifulfi worthless and utterly selfish creature whom he worshipped with a strange passion stronger than love, more powerful than reason.

This is the poignant role Leslie Howard plays in RKO-Radio's film of the Somerset Maugham novel, 'Of Human Bondage," which will be the feature attraction at the Naw Lyceum on Monday and Tuesday, September 3 and 4.

As Philip Carey, well bred, artistically inclined medical student, who is doubly sensitive because he is lame, he meets Mildred, a waitress, and is at first intrigued and then enslaved by her.

The girl takes what he has to offer, but gives nothing in return. As her power over him increases, Carey marvels at himself and cowers before the scornful rebukes to his own manhood. He is powerless to break the mysterious chains which bind him to Mildred, and even the love of an intellectual woman of his own class is unable to free him from the bondage.

Bette Davis plays the exceptionally powerful role of the luring, sculless Mildred, and Kay Johnson portrays the woman who tries in vain to break the chains of the selfish waitress. Frances Dee will be seen as another dominating figure in the tangled love patter. Supporting roles are played by Reginald Denny, Alan Hale, Reginald Sheffield and Regiald Owen. John Cromwell directed.

On Wednesday and Thursday, September 5 and 6 the New Lyceum will present the new Musical Comedy Hit 'Romance in the Rain' as the feature attraction. Romance in the rain was made by the producers of 'Moonlight and Pretzels' which will be remember-er as one of the big hits of the past season and has as the featured players Roger Pryor, Heather Angel, Esther Ralston and Victor Moore (comedy star of 'Of Thee I Sing.')

STUART ERWIN AS MARRIAGE BROKER

Where the average motion picture ends with matrimony and a live-happily ever afterwards fade out, 'Bachelcr Bait,' new comedy hit at the New Lyceum Theatre, on Friday and Saturday, September 7 and 8, begins with marriage and deals with it throughout.

Featuring Stuart Erwin, Rochelle Hudson, Pert Kelton, Skeets Gallagher and Berton Churchill, the RKO-Radio laugh film starts its action in the civic marriage license bureau where Erwin is employed. Fired from the job, he uses first hand experiences as vocational guidance and founds a matrimonial buseau. At his Romance, Inc., mates are supplied to clients.

While smoothing the course of true love for others, Erwin succeeds in making it distinctly rough for himself. The lovely prospect he is committed to marry to another man happens to be the girl he loves. A luring siren, who has her own methods of making marriage pay and pay, adds to the pot of trouble, as to a grating racketeer and a puppet politician.

'Bachelcr Bait' was directed by Geo. Stevens.

Famous Athlete In Swimming Meet At Betterton
Barney Berlinger In Diving Event

Barney Berlinger, famous University of Pennsylvania athlete and winner of the Decathlon championship in the 1928 Olympic games, was one of the entrants in the bi-monthly swimming meet staged by the Betterton Beach Club at Betterton last Saturday. He participated in the diving event and, although he had never done any diving in competition before, took third place.

With only one more meet to be staged the contestants for the honors, decided on points for the full series, are turning a close race.

The Labor Day meet, which will bring the series to a close, will have a number of added attractions including a marathon swim, and canoe and rowboat races.

The events on Labor Day will be staged from the new Owen's pier. The Labor Day program is as follows:

10 A. M.—Marathon Swim.
2 P. M.—Swimming, canoeing and rowboat races.

Swimming

Boy's Class (under 12 years):
1—15 Yard Free Style.
2—Doggie Race.
3—Tub Race.

Girls' Class (under 15 years):
1—15 Yard Free Style.
2—15 Yard Side Stroke.
3—Novelty Race.

Boys' Class (under 12 years to 16 years):
1—25 Yard Free Style.
2—Under Water Swim for Distance.
3—Diving.

Womens' Class (15 years and over):
1—25 Yard Free Style.
2—25 Yard Side Stroke.
3—100 Yard Free Style.

Mens' Class (16 years and over):
1—25 Yard Breast Stroke.
2—25 Yard Backstroke.
3—200 Yard Free Style.
4—Diving.

Canoeing—Events for men and women:
1—Singles.
2—Doubles.
3—Mixed Doubles.

Rowboat event for men and women.

MOLESKIN COMES BACK

Among the new fur collars used on fall dresses, moleskin has staged a comeback, and this flattering fur is quite effective when dyed to match the new greens. The fur will doubtless appear in short capes as well.

A New York designer is showing a stunnig black kidskin hat with cuffs and vest to match, as splendid accessory set to wear with a plain dark green coat.

CANOE ASSO. FORMED
H. B. STRONG ON COMMITTEE WM. C. GRIEB ATTENDED MEETING

The following is an account of the activities of the Chesapeake Bay Log Canoe Assoc. and is an account of the meeting held last year. It was the purpose of the Assoc. to have the next meeting in Chestertown but this was postponed and maybe it will be held here next year. Many local racing fans are expected to join the organization and next year it is hoped to have the entire fleet at our regatta here:

With represetative yachtsmen from all parts of the State present, the Chesapeake Bay Log Sailing Canoe Association was launched last year at a meeting held at 'Rolles Range' the home of Mr. and Mrs. William H. Green, near St. Michaels.

The meeting was opened by Mr. Green, who told of the aims and hopes of the association. He pointed out that, until the past few years, the boats which have made the Chesapeake famous, had gone comparatively unrecognized. He proposed setting up an association somewhat along the lines of the Star Boat Association, with a Commodore, Vice Commodore, Rear-Commodore, a Secretary and a Treasurer.

Mr. Green's address was followed by a brief talk by Griffith W. Dodson, of Norfolk, Va., Mr. Dodmers at St. Michaels, moved that the following officers be elected: William H. Green, Commodore; Mrs. Searles Rose, Vice-Commodore; A. Johnson Grymes, Rear-Commodore; J. H. Grymes, Rear-Commodore; J. H. Caulk Kemp, Secretary and Treasurer.

The following were elected as an executive committee: Howard Strong, George Wilson and Duke Adams.

Governor Albert C. Ritchie, John P. Cosden, Nichols Hardcastle, Ira Hand, Capt. Lowery, John B. Harrison and Captains George Shockley, Neal Thomas, George Lambdin, Robert Lambdin, Jerry Seymour, Will Meyers and Harry Sinclair were elected honorary members.

In explaining the purpose of the organization Commodore Green said: The committee in charge of the extending of invitations to this meeting were unable to know that you might be interested in affiliating with this movement in one of three classes active, including only boat owners, whether rigged for racing or not, first class, those who have actually participated in a race as a crew; second, any who desire, through their interest in these boats to affiliate. The dues of the active members will be two dollars per year and the other two classes one dollar. Only the actual competitive owners of boats will have voting power. The association will hold in annual dinner next year on Friday evening of the Miles River Yacht Club regatta at some convention place nearby. The following year the second annual meeting and dinner will be at Chestertown during that regatta and then Oxford and Easton in turn. If you desire to affiliate with this organization in any of the classes kindly write Herbert Griffith, Jr., Easton, Md., secretary and treasurer, of your desire. The charter member list will be withheld for thirty days so you may have an opportunity to go in this class.

AMANDA T. BRADLEY

The newly appointed Dean of Women at Washington College, Miss Amanda T. Bradley, will assume her duties at the historic Eastern Shore institution with the opening of the 153rd college year on September 12. Miss Bradley will also serve as assistant professor of English at the Chestertown school. .....

She holds the Master of Arts degree from Radcliffee College and has done additional work toward the doctorate at Harvard University. She is a native of Alabama and after some years in high school work in that state and Tennessee she began her career as a collegiate instructor.

At Radcliffe Miss Bradley held the National Alpha Omicron Pi Fellowship. For the past two years she has been a member of the faculty of St. Catherine's Episcopal School for Girls in Richmond, Va. She is an active member of the American Association of University Women and the Daughters of the America Revolution.

Subscription to the Transcript $1.50 per annum.

UNDULANT FEVER MORE PREVALENT IN STATE

Undulant fever is becoming more prevalent in Delaware or more cases are being recognized and reported, Dr. C. A. Sargent, Dover, in charge of the communicable disease division of the State Board of Health, writes in the current issue of the Delaware State Medical Journal.

This fever has not been common in this area, but Dr. Sargent reports that there have been seven cases reported in Delaware up to July 1, while there were only two cases reported in 1931, two in 1932 and six in 1933.

"In view of the fact that undulant fever appears to be more prevalent," Dr. Sargent reports, "the State Board of Health is undertaking a thorough investigation of the situation and milk from all dairies, the products of which are consumed in this State, has been analyzed and approximately forty per cent have shown positive agglutination for crucella abortus (the undulant fever germ).

Of the seven cases reported to July 1, this year, Dr. Sargent reports, five were from Kent county, located in Dover and the area north to the New Castle County line. Two cases were reported in Sussex County.

"One significant feature," Dr. Sargent states, "is that no cases have been reported among individuals using pasteurized milk. The most frequent source of infection with brucella organisms is from milk and dairy products of cattle or goats.

"A positive blood test of an animal," Dr. Sargent writes, "indicate infection but does not necessarily signify that the brucella organisms are being driven off in the milk. To determine whether an animal is producing infected milk, it is necessary to do agglutination tests on milk."

Dr. Sargent reveals that surveys in various areas of the nation indicated from 25 to 30 per cent of dairy herds are infected.

There are three types of the undulant fever all characterized by an incubation period of from six to fourteen days, onset with chills, malaise, headache, loss of appetite and frequently acute sciatic pains.

"The most characteristic feature" Dr. Sargent writes, "is the step-like rise in temperature, reaching 104 or 105 degrees by the fourth or fifth day and continuing for twelve and fifteen days without much variation. In two or three weeks there is a relapse with a repetition of the fever. This condition may continue for three or four months, and in some cases as long as two years.

"The malignant variety may stimulate typhoid fever and it frequently terminates fatally in a short time.

"The intermittent variety is characterized by intermittent fever over a period of several weeks or months.

"The ambulatory type of the disease is one in which the symptoms are almost entirely absent and the patient may be acting as a carrier."
