THE RECENT PROPOSAL of Governor Harry Nice to spend a large proportion of the $53,000,000 road building program on Eastern Shore highways if application for that sum from the $4,880,000,000 Federal Public Works Program is approved, will no doubt be received as very gratifying to Eastern Shoremen. It conforms with the present policy of wide smooth boulevards for through traffic. It would provide comfortable fast transportation for those motorists who are going places but the question is whether it is an expenditure of money to the best advantage of those who will eventually pay the bill. The expenditure of public funds, whether it be County, State or Federal, must eventually come out of the pockets of the taxpayers. The tax payers of the Eastern Shore, where much of this road improvement is planned are composed of farmers and business men who do much of their business with farmers, so let us consider whether the proposed program will work to the best advantage of this class of citizens. In carrying out the business of farming and the mercantile business of dealing with farmers, it is necessary that the county road systems be built and maintained so that fairly rapid transportation can be maintained between the farm, townships and metropolitan areas the year round. While the main highways could be greatly improved, they however in their present condition, afford safe and easy travel at a reasonable speed but there are many sections in all parts of the shore where the by ways always present a problem. Several years ago Kent County spent $1,000,000 to build nine foot concrete and slag roads which went a great way toward helping the business of farming, yet it did not go all the way. Would it not then, when considering the expenditure of this large sum of money, be to the advantage of the tax paying citizens mentoned above, to first build a series of nine foot concrete feders before improving the already acceptable highways?

THE RECOMMENDATION that the State subsidy to the Tolchester ferry be cut from $25,000 to $13,500 should be given serious consideration as to what effect it will have upon the continued operation of ferry service from Tolchester to Baltimore. A recent statement from the Tolchester Company showed a small operating loss during 1934 with the $25,000 subsidy and with $11,500 less receipts during 1935 there can be only three answer—either the present schedule must be reduced, the fares must be raised or the service discontinued. Any one of these three answers would render a serious hardship on Kent and a large portion of Queen Anne's counties. For those who do not have the use of an automobile, it would be almost impossible to make a round trip to Baltimore the same day both from the standpoint of time spent in travel and the expense of the trip. While the service of the Tolchester ferry could be improved greatly, it still affords the most practical means of transportation from this section to and from Baltimore. Some enthusiasts go so far as to state that the discontinuance of the Tolchester ferry would hasten the construction of the Chesapeake bay bridge but even if this is true Kent County would be isolated from Maryland's largest city for some time it and would further increase the tendency of the people of this county to seek markets and shopping centers in out of the state cities. The recent ice pack in the bay which prevented the continuance of the ferry schedule for a two week period is a striking example of the value of this ferry service. While the recommendation is made with the idea of reducing State expenditures this particular item will likely prove false economy.

THE QUESTION OF a re-assessment scheduled for Maryland in 1935 is creating a great deal of concern to members of the Maryland Legislature. While a re-assessment to bring real estate down to its present value is generally favored, yet the question arises as to whether the expense is justified at this time. With the present indications of the counties, particularly Kent County, having to take over certain road expenses which have for the past two years been born by the State and the probability that some of the past Federal borne relief may also be shifted on the shoulders of the county tax payers, the problem of whether this county should spend approximately $8,000 for a re-assessment, is a serious one and should not be taken lightly. The present State law provides for the re-assessment this year and to prevent it a law to that effect will have to be passed at this session of the Legislature postponing it to a future date. Such a bill would be in line with the desire of the tax payers to reduce State and County expenditures.

THE PROPOSAL TO build a bridge across the Chesapeake Bay from Tolchester to Miller's Island received a boost and set-back this week when the Eastern Shore Travelers Association, composed of 600 memebrs, heartily endorsed the construction of the bridge as a boom to business on the Shore, and oGevrnor Nice frowned on the proposition. If the Bay is to be spanned, the bridge is far superior to the suggested bridge tunnel construction from Kent Island to Sandy Point for reasons of engneering construction, cost of construction, desirable traveling for the motorist and the territory served. If the bay brdge is to be built there is no time like the present when Federal funds are flowing freely.

TOLCHESTER CO. FILES BANKRUPT PETITION

WILL NOT AFFECT FERRY SCHEDULE

Although it will not effect the ferry schedule for the present at least, The Tolchester Beach Improvement Company, of Kent County has filed with the United States District Court at Baltimore a petition under Section 77b of the Federal Bankruptcy Act. Judge W. Calvin Chestnut signed an order setting March 11 as the date for a hearing to determine whether the property should remain in the custody of the company or a trustee be appointed. James W. Chapman acted as attorney for the company.
