

YOUR DOG AND MINE

By EDWARD C. LOUD, JR.

General character of the Bloodhound—The Bloodhound possesses, in a most marked degree, every point of those dogs which hunt together by scent (Sagaces). He is very powerful, and stands over more ground than is usual with hounds of other breeds. The skin is thin to the touch and extremely loose, this being more especially noticeable about the head and neck, where it hangs in deep folds.

Height of the Bloodhound —The mean height of the average dog is 26 inches, and of the average bitches 24 inches.

Weight of the Bloodhound—The average weight of dogs, in fair condition is 90 pounds, and of the average bitches, 80 pounds.

Expression of the Bloodhound—The expression is noble and dignified, and characterized by solemnity, wisdom, and power.

Temperment of the Bloodhound—In tempermant he is extremely affectionate, neither quarrelsome with companions nor with other dogs. His nature is somewhat shy and equally sensitive to kindness or correction by his master.

Head of the Bloodhound—The head is narrow in proportion to its length, and long in proportion to the body, tapering but slightly from the temples to the end of the muzzle.

Skull of the Bloodhound—The skull is long and narrow, with the occiput peak very pronounced. The brows are not very prominent, owing to the deep set eyes.

Foreface of the Bloodhound—The foreface is long, deep, and of even width throughout, with square outline when seen in profile.

Eyes of the Bloodhound—The eyes are deeply sunk in the orbits, the lids assuming a lozenge or diamond shape. The eyes correspond with the general tone of color of the animal, varying from deep hazel to yellow. The hazel color is to be preferred.

Ears of the Bloodhound—The ears are thin and soft to the touch, extremely long, set low, and fall in graceful folds, the lower parts curling inwards and backwards.

Wrinkle of the Bloodhound, The head is furnished with an amount of loose skin; the skin falls into loose, pendulous ridges and folds, especially over the forehead and sides of the face.

Nostrils of the Bloodhound—The nostrls are large and open.

Lips, flews, and dewlap of the Bloodhound—In front the lips fall squarely, making a right angle with the upper line of the foreface; whilst behind they form deep, hanging flews, and, being continued into the pendent folds of loose skin about the neck, constitute the dewlap, which is very pronounced.

Neck, shoulders and chest of the Bloodhound—The neck is long, the shoulders muscular and well sloped backwards: the ribs are well sprung; and the chest well let down between the forelegs.

Legs and feet of the Bloodhound—The forelegs are straight and large in bone, with elbows squarely set; the feet strong and well knuckled up, and the hocks well bent and well let down.

Back and loins of the Bloodhound—The back and loins are strong, the latter deep and slightly arched.

Stern of the Bloodhound—The stern is long and tapering, and set on rather high with a moderate amount of hair underneath.

Gait of the Bloodhound—The gait is elastic, swinging and free, the stern being carried high, but not too much curled over the back.

Color of the Bloodhound—The colors are black and tan, red and tan, and tawny. A small amount of white is permissible on chest, feet, and tip of stern.

A REPUBLISHED COPY OF

OLD KENT!

—BY—

GEORGE A. HANSON

The Original "OLD KENT" was published in weekly installments in the Transcript while Geo. A. Hanson was editor in 1875. Col. Hanson, after moving to Baltimore, had "Old Kent" republished and put in book form. These old books in the past five years have sold as high as $85.00.

In 1933-34 the Transcript republished the original "OLD KENT" in weekly installment and now has put it in book form. This republished book contains as much material as the former book but is arranged differently and is printed in smaller type.

The Republished Book Is Printed And Is Now Being Indexed. It Will Be Ready For Delivery Soon In Handsomely Bound Form. A Limited Supply Was Printed. Cash Price Per Copy

$8.00

NOTE---A Sample Copy Without The Binding Can Be Seen At The Transcript Office.

FISHERY MEETING AT ATLANTIC CITY

ALL TYPES OF FISHING REPRESENTED

Atlantic City, N. J.—The several commercial fisheries associations as well as previously unorganized port groups are assembled in full strength at Atlantic City on February 23rd and 24th. So much importance is being attached to the assembly that the Board of Governors of the Eastern Fisheries Association voted to hold the February interstate Fisheries Conference here on February 23rd.

This promises to be the first really large get-together of the kind ever held on the Atlantic Coast. Owners of practically every class of fishing vessel and boat will meet with owners of pound net fisheries to work out co-ordinated plans for mutual protection and advancement.

From the early applications for places on the program it appears certain that at least six coastal states will be well represented. Matters of state and federal legislaton will be decided upon and for this reason members of the U. S. Senate and of the Congress are expected to be present as well as representatives of several state legislatures.

Spring Outfitting Plans

In view of the predicted shortage of basic foodstuffs this coming Spring it is essential that the full producing strength of the fisheries be brought up to the maximum and for this purpose it may be necessary to obtain a federal subsidy for the sole purpose of restoring every fishing rig to its utmost fishing capacity.

Just as government money was used to enable the agricultural interests to carry on with reduced production at times of excessive supply, just as money was supplied to the live stock producers to slaughter their surplus so, now, when the aftermath of the unlooked-for drought leaves the nation facing a shortage of basic foods, it is imperative that the government assist the fisheries to go into the Spring producing period equipped to produce the most bountiful possible harvest from the sea. Under the proposed subsidy-plan, funds are to be provided only to the extent necessary to rebuild equipment to a point equal to what each vessel, boat and short fishery had in practical use in, say, the year 1929.

Better Marketing

Workable agreements are to be built up toward the end that no producer need operate at a loss. It is believed that only in this way will it be possible for sea-foods to go on the open market to the consuming public at a consistently low average price and for the fisheries to show a reasonable profit for the season's operation. With this will be includel measures for protection against unfair wholesale practices and, where possible, the elimination of bad credit risks.

Standard practices of grading and packing are to be adopted to such degree as found necessary in order to maintain best possible prices; also agreements for the curtailment of fishing for such sizes and varieties as serve only to weaken the market for good saleable fish.

Wider Amalgamation

Divisions of the coastal fisheries whose operations directly affect the main organized bodies are expected to carry back to their home ports workable plans under which their boats may profit by joint agreements while contributing toward the success of such plans as are to be put into operation following this assembly.

Some extension of the present organized groups is expected to result from the working out of plans affecting certan divisions of the fisheries which have not, heretofore, been included in the activities of the United of New Jersey or other established associations.

Tariff and Embargo Measures

All sides are to be heard on proposal dealing with tariff and embargo needs. In some cases it is felt that active steps must be taken to secure immediate embargo on certain varieties of sea-foods. This is especially true in the case of scallops, the free importation of which is certain, if permitted to continue, so completely wipe out the sea scallop fishery of the Atlantic. Other varieties show need for tariff equalization, as in the case of lobsters.

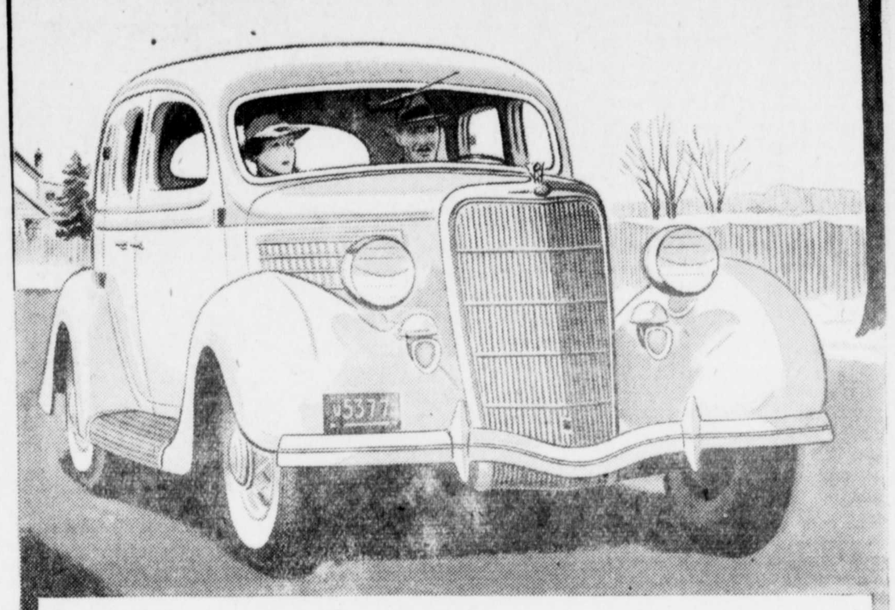

Since this will be the occasion for members of Congress to discuss all the angles of these situations with the affected producers it is considered a vital occasion for all those directly interested.

State Legislation

Within the territory represented by the associations gathering in Atlantic City on the 23rd and 24th are several states where new fisheries legislation is pending and it is hoped that well-formed plans may be drafted through which to afford the fullest possible security to the commercial fisheries against the meddling by ill-informed enthusiasts.

Certain existing state regulations may be recommended for suspension during a limited period while efforts may be made to hafe others permanently with-drawn.

NEW FORD V-8

The Car Without Experiments

THERE's never any doubt about value when you buy a Ford car. You know it's all right or Henry Ford wouldn't put it out. One thing that never changes is his policy of dependable transportation at low cost.

That's the biggest feature of the New Ford. The reliability and economy of its V-8 engine have been proved on the road by upwards of 1,400,000 motorists. Owner cost records show definitely that the Ford V-8 is the most economical Ford car ever built.

See the nearest FORD DEALER *for a* V-8 *demonstration.*

NEW FORD V-8 TRUCKS AND COMMERCIAL CARS ALSO ON DISPLAY.

FORD MOTOR COMPANY

In a sod orchard, breaking the ground with a 'weed hog' is effective in destroying large numbers of mice and in breaking up their breeding quarters.

Meekly: Do you guarantee results in your nerve treatment?

Dr. Dolder: I do. Why, a man came to me for nerve treatment, and when I had finished with him he tried to borrow $50.

DAVID COPPERFIELD FROM THE MOTION PICTURE

Based on the Novel by CHARLES DICKENS

David stays to dinner at the Wickfields. Uriah sits at the head of the table, flushed with his own importance. But when Agnes leaves the room he proposes a toast to his hopes of winning her as his wife. Wickfield, enraged, tries to strike him, but when Uriah speaks to him warningly, he collapses.

David and Dora are married and live in a tiny cottage at Highgate. In spite of Dora's childisn helplessness about everything, they are happy together until the night Aunt Betsy and Mr. Dick come to dinner. Everything goes wrong. The roast is burnt and the oysters are unopened.

The young couple quarrel bitterly and Dora bursts into a torrent of tears. But later, when their guests have left, they each beg the other's forgiveness and David decides to bring Peggotty into the house to take care of everything in the household so that Dora will have no further worries.

Some months later, Peggotty rushes in and interrupts David's writing. Em'ly has been found! David quickly seeks out Uncle Dan who tells him how Steerforth had cruelly deserted her in Naples. He begs David to go to Ham, who has now grown reckless of his life, and tell him the news. Will David reach him in time? Watch for tomorrow's concluding installment of "David Copperfield."

The "liquid test"

...it ENDS bowel worries for many people

This is a test that tells you whether the system needs a *cathartic change*. If you have constant sluggish spells or bilious attacks, and laxatives seem to make things worse, it would be wise to try this:

Stop all use of any laxative that does not encourage variation from a "fixed dose" (which may be entirely too large a dose for your individual need). Use instead, a *liquid* laxative that you can measure and regulate as to dose. As necessary to repeat, *take smaller doses*, less and less often, until the bowels are moving without any help at all.

Doctors use liquid laxatives, and a properly prepared liquid laxative, containing natural laxative agents like senna and cascara is a joy and a comfort; a real help in establishing regularity. Ask your doctor about this! (Doctors use liquid laxatives.) You can get Dr. Caldwell's Syrup Pepsin, which is a most dependable liquid laxative, at any drug store.
