

YOUR DOG AND MINE

By EDWARD C. LOUD

COUGHING PUPPIES

A litter of otherwise healthy pups suddenly begin to cough when they are eight to ten weeks old. They may cough for a week or two and then stop. Or they may continue to cough. What is the cause?

Studies made on the lift cycle of the worm by many parasitologists reveal an outstanding fact which should be understood by every kennel man. The round worm, Ascaris lumbricoides, is what causes most of the trouble. Let us say that puppies have been wormed when they are five weeks old and again at eight weeks. You are sure they have no worms. But actually they do have worms which are picked up by lapping the ground, chewing on roots or gnawing on a bone that has been contaminated.

It was once thought that the eggs hatched and the little worms attached themselvts to the stomach wall. But not so, we are told by students. The eggs hatch and the worms burrow into the wall of the digestive tract to the blood stream in which they are floated about. They wind up their journey in the lungs, where they grow, and gradually work upward reaching the larynx where they cause an irritation. The pup has to cough and hawk and strain until he has raised a little phlegm, which he gradually swallows.

Hence when your puppies cough and try to raise some phlegm you need not become alarmed except by the fact that your runs are contaminated. As soon as the pups stop coughing, you had better worm them again and get rid of the young worms in the stomach. Frequent worming and keeping the runs clean will do wonders for any pup. And remember that a very great deal of unthriftiness in pups results directly from worms.

Massey, July21st—Fast fielding and good pitching enabled Massey and Galena to send the hard hitting Town Point lads down to defeat. A Passwater's fielding was a feature of the game while Massey and Peacock were the long hitters of the game. Grady limited the visitors to five scattered hits. Five double plays were also features of the game.

Batteries for Massey and Galena, Grady and Peacock. For Town Point Pierce and Crawford.

Sudlersville proved no match for Massey and Galena in the second game of the double header, the latter sending in second string men in the outfield. Cochran on the mound for the Massey team allowed only four scattered hits and fanning ten men. Massey and E. Passwater again led the hitting while Peacock again distinguished himself in the field.

Modoc Meets Streamlined Zephyr

PUSHING a three-car stainless steel Zephyr train was an easy task for Modoc, giant elephant of the circus. The train, built by the Edward G. Budd Manufacturing Co., in Philadelphia, weighs little more than an ordinary Pullman car and runs on roller bearings. That explains why Modoc rolled it along with as much ease as he would a wagon on the circus lot.

WAKE UP YOUR LIVER BILE—
WITHOUT CALOMEL

And You'll Jump Out of Bed in the Morning Rarin' to Go

If you feel sour and sunk and the world looks punk, don't swallow a lot of salts, mineral water, oil, laxative candy or chewing gum and expect them to make you suddenly sweet and buoyant and full of sunshine.

For they can't do it. They only move the bowels and a mere movement doesn't get at the cause. The reason for your down-and-out feeling is your liver. It should pour out two pounds of liquid bile into your bowels daily.

If this bile is not flowing freely, your food doesn't digest. It just decays in the bowels. Gas bloats up your stomach. You have a thick, bad taste and your breath is foul, skin often breaks out in blemishes. Your headaches and you feel down and out. Your whole system is poisoned.

It takes those good, old CARTER'S LITTLE LIVER PILLS to get these two pounds of bile flowing freely and make you feel "up and up." They contain wonderful, harmless, gentle vegetable extracts, amazing when it comes to making the bile flow freely.

But don't ask for liver pills. Ask for Carter's Little Liver Pills. Look for the name Carter's Little Liver Pills on the red label. Yesent a substitute. 25c at drug stores. © 1931 C. M. Co.
