He expected his grandparents and little aunts and uncles, Mr. and Mrs. William Davis and family and was quite disappointed when they couldn't come due to the misfortune of one of the little uncles who had a couple bones broken in his hand. Little Billy received many presents and cards and had a cake with candles besides.

THE COST OF HURRY

From the Portland Oregonian

Thirteen makes of automobiles, tested at various speeds, all give approximately the same result as far as the relationship between speed and expense is concerned. Step on the gasoline and up goes the gasoline expenditure per mile. Up goes the oil bill also.

Following is a tabulation of the tests, announced by the American Automobile Association:

30 miles an hour—18 miles per gallon.

60 miles an hour—12.6 miles per gallon.

80 miles an hour—8.6 miles per gallon.

Oil consumption is seven times as great at 55 miles as at 30 miles.

But we presume a person who starts out on a trip at 80 or so miles an hour doesn't worry much about the bill. His widow can take care of that out of the insurance money.
