Allow three-fourths to one pound of turkey for each person to be served in planning the Thanksgiving dinner. A 15-pound bird will make 20 generous servings. In planning ahead for cooking the bird, the housewife should have an open pan ready for a young bird, or a covered roaster for old or very lean birds. The open pan should be deep enough to hold every drop of turkey fat and drippings. Turkey fat is one of the most delicious cooking fats, especially valuable in wartime.

Those who like to decorate their homes with Christmas holly during the festive season have an opportunity to obtain the finest grade through the Deparment of State Forests and Parks, State Forester Joseph F. Kaylor announces. In cooperation with the Garden Clubs, the Department has agreed to distribute, without profit, "certified holly", that is holly harvested under approved conservation methods, instead of under the system of "tree butchery" that now obtains in many places. Only No. 1 grade is accepted, and each shipment is certified by the Department to be the best obtainable.

All those who wish "certified holly" are urged by Mr. Kaylor to write to him without delay at 1409 Fidelity Baltimore, for lists and order blanks. Promptness is essential, because no orders can be received after December 5th.

It is estimated that 20 to 30 percent of the food produced in the U. S. every year is lost or wasted—on the farm, in transit, in wholsale or retail establishments, in restaurants and homes—mostly in bits and driblets, according to a statement by the U. S. Department of Agriculture.

V

Farmers of this country will raise more food next year than they have this year, but the extra food will go to meet war needs of armed forces, allies and others rather than to civilians, acording to the latest predictions of the U. S. Department of Agriculture.

Keep window screens fit for the duration by cleaning and painting this fall, then storing carefully for the winter. Good winter quarters for screens are clean, dry and safely out of the way of objects that might bend or break the wire. Screens must be stored level so frames will not warp

Plenty of Turkeys

The civilian turkey supply, just starting to come on the market, will be almost as large as last year, according to the Department of Agriculture. However, this year's demand will probaably be much larger and shoppers will be wise to put in orders early. Men and women on duty in the American armed forces, at home and abroad, will be served a pound of turkey at dinner Thanksgiving Day and will have all the traditional "fixin's."

WFA Relesaes Canned Foods

Approximately 2,790,000cases of canned peaches, peas, and tomato catsup were released to consumers recently by the War Food Administration. The canned goods probably will not reach retail shelves for serveral weeks. These foods were a portion of the reserves owned and held by canners to meet possible emergency requirements of the goverment.

Reduce Octane in Gas

Premium gasoline used by civilians will be reduced from 78 and 80 octane to 76-octane to conserve tetraethyl lead and volatile gasoline fractions, both of which are required in the manufacture of high-octane military gasoline. More than 50 million gallons of gasoline, fuel oils, lubricants, and other petroleum produces are going direct to the fighting forces every day, the Petroleum Administration for War disclosed. One-third of all gasoline produced in the U. S. is now required for military purposes.

PARTY LINES *are* PATRIOTIC LINES

The copper that used to go into new telephone lines is now going into war weapons. This means we must make the most of the lines we now have.

Thus, party lines become a part of the all-out war effort—they take on a new name—PATRIOTIC LINES.

You will find that "Patriotic-line" telephone service is good telephone service if all users will follow these simple rules:

1. If another is using the line, hang up gently and wait a reasonable time before trying again.
2. Make way for your neighbor by being as brief as you can on your calls.
3. Avoid making a number of calls in succession.
4. Replace the receiver carefully after each call so as not to prevent others from using the line.
