EASTON MAY BECOME HUB OF AIR TRAFFIC

The Mayor & Council of Easton and the County Commissioners met the night of February 12th at the Municipal Biulding to discuss the leasing of the Easton airport, and the angles attendant to such leasing, for post-war use.

To date, four companies have asked for the opportunity to submit bids for leases. They are Fenimore & Co., Washington, D. C.; Breese Airways, Inc., New York; Maryland Airlines, Inc.; and Bennett Motor Co., of Easton.

Eastern Air Lines, Inc., have notified the Mayor & Council and the County Commissioners that they have applied to the Civil Aeronautics Association for permission to add Easton and Annapolis to their route as regular points of service. The Chesapeake Air Lines, Inc., of Baltimore and Washington, has also filed a petition with the CAA for air mail, passenger. and freight service to Easton.

The Mayor and Council of Easton and the County Commissioners were unanimous in their desire to receive proposals from interested companies outlining both long and short term leases, to receive bids with the lessee constructing all buildings and maintaining the airport, as well as bids where the lessor constructed the buildings and maintained the airport.

A motion was made and carried that advertisements be mailed to interested companies for such bids. Mayor Barnes, Commissioner Marvel, and E. G. Kastenhuber, Jr., were appointed to draw up the advertisement.

The Easton Airport is one of the three finest on the Eastern Shore, the other two being at Salisbury and Dover. The Easton Airport has two runways 150 feed wide and 4,000 feet long. It cost the Government over a million dollars. It is understood that the Government intends to erect the necessary lighting facilities for night operation of aircraft.

The Mayor and the Council of Easton and the County Commissioners are anxious to have the airport facilities leased to the company which will operate the airport to the greatest advantage to the community, they say not only for immediate post-war period but for the years ahead.

Bids or proposals for leasing will be opened March 12th at the Municipal Building at 8 P. M. in the presence of the Mayor and Council and the County Commissioners.

Extension of the present support price of $12.50 per hundredweight, Chicago basis, for good to choice butcher hogs weighing 200 to 270 pounds, to March 31, 1946 has been made by the War Food Administration, according to word just received by Extension officials at the University of Maryland. The WFA has asked hog producers having adequate feed supplies to keep additional sows suitable for farrowing next spring to help meet the goal for spring pigs.

Commenting on the announcement, War Food Administrator Marvin Jones said: "The continued high level of demand for meat for war needs makes it imperative that hog producers meet the goal of 57,500,000 spring pigs. I am concerned about the prospect of a pig crop next spring smaller than last spring. We shall need more hogs than now appear to be marketed next fall and winter. The feed grain supplies available will feed more hogs than would be produced from next spring's pig crop, according to present indications. I am asking all War Food Administration agencies with field staffs to make every effort to let farmers know that we shall need additional pigs."

Reclaiming Paint

A new technique originated by the Chrysler corporation for recovering waste paint from the air is being adopted by dozens of other war plants on arrangement with the motor company, says "Industrial Finishing." More than six gallons of paint are recovered from every ten gallons of waste by salvaging the paint-filled mists which normally would be exhausted from the factory stacks. So important is this salvage, that Chrysler engineers are operating a $100,000 reclaiming plant.

Plastic Uses

Eighty per cent of all plastics produced today go in planes that have hundreds of plastic parts and must withstand temperature changes from 130 degrees on the ground to 30 below in a matter of moments; in battleships which use thousands of plastic items; and in projectiles engineered to precision dimensions.

In these days of shortages of materials and personnel, it is the cooperation of our customers that enables us to maintain efficient telephone service. Thanks for your cooperation in avoiding needless calls to "Information", in limiting the number and length of your Long Distance calls and in taking good care of the telephone equipment in your home.

Supper

Everyone is invited to the Covered Dish Supper sponsored by the P. T. A. on Thursday evening at six (6) o'clock.

Averages

The pupils with an A or B average for the month of January are:

Senior — Martha Davis, Thelma Wallace.

Junior—Julia Wharton.

Sophomore—Hester Miller, Rita Donahoe, Frances Churay.

Pupils averaging A and B for the first term are Martha Davis, Julia Wharton, Austia Davis, Rebecca Miller.

Due to the interest of the Freshmen in the Junior Red Cross an amount of money has been raised toward this cause. As there is no local Red Cross the money was sent to the National Red Cross. A very active person toward this effort was Miss Agnes A. Hadley, a freshman.

—V—

Farm foreclosure sales in Maryland have been made on a descending scale, since 1932, with a slight increase shown in 1943. The number of foreclosures per 1,000 farms, carrying mortgages have been: 1932, 22.3; 1933, 21.5; 1934, 22; 1935, 14.9; 1936, 15.4; 1937, 11; 1938,9.5; 1939, 8; 1940, 8; 1941, 7.8; 1942, 2.4; and 1943, 3.6. Agricultural economists at the University of Maryland point out that the present low rate off foreclosures reflects two things; I. More and more farmers have recovered from the drought years and from their financial difficulties, some of which resulted from paying too much for farms and borrowing too much money to do so during and after the last war; and 2. The present high farm incomes are making it possible for most farmers to get and keep their debts in shape. Farmers are warned against buying farm land at prices far above the normal earning capacity of the farm to pay off.

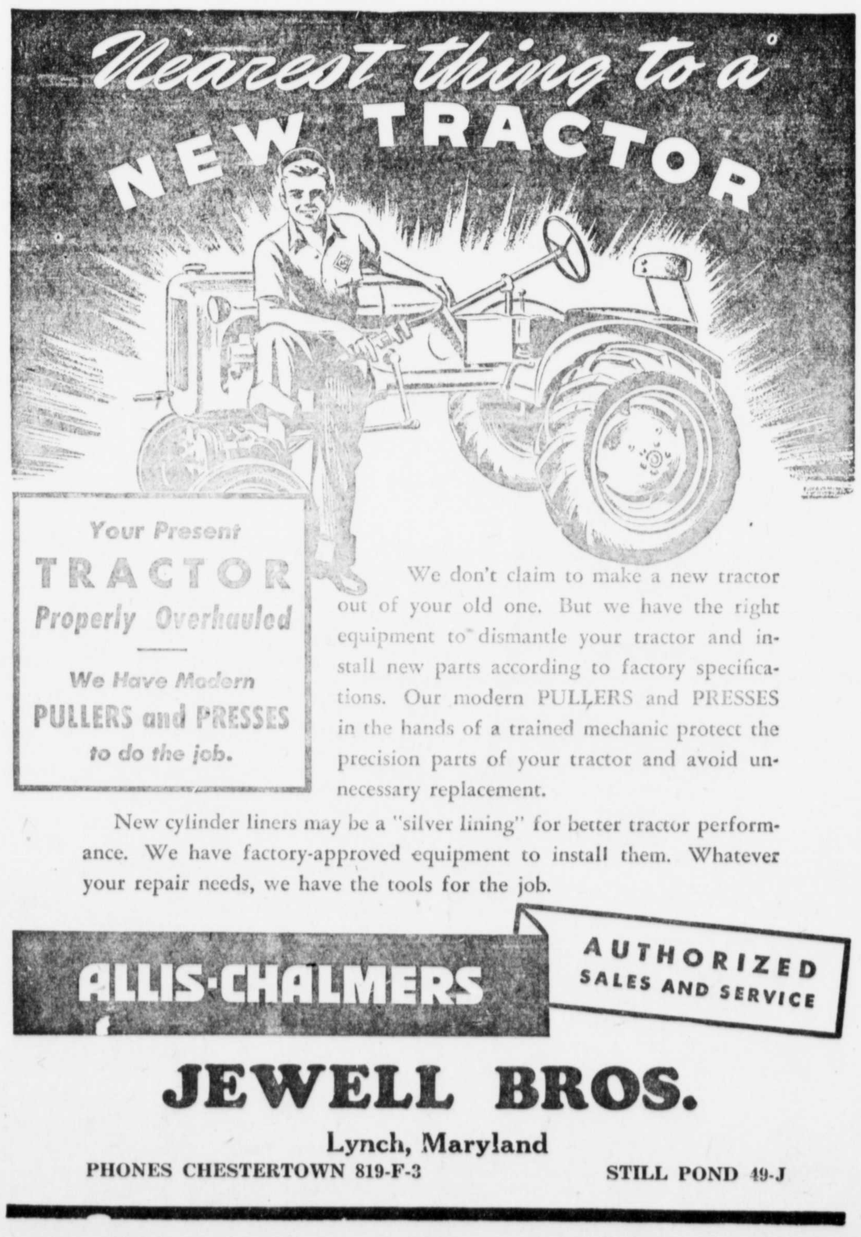
Rhubarb Sauce

When serving rhubarb that has been frozen after being blanched, or frozen without any preliminary treatment and packed plain, make a sauce by adding the frozen fruit to ½ cup of sugar and ⅛ cup water which has been brought to the boiling point. Cook for two minutes after the sirup comes back to boiling. When serving rhubarb prepared with sugar sirup, add the rhubarb to ⅛ cup of boiling water, bring to boil and cook two minutes.



We don't claim to make a new tractor out of your old one. But we have the right equipment to dismantle your tractor and install new parts according to factory specifications. Our modern PULLERS and PRESSES in the hands of a trained mechanic protect the precision parts of your tractor and avoid unnecessary replacement.

New cylinder liners may be a "silver lining" for better tractor performance. We have factory-approved equipment to install them. Whatever your repair needs, we have the tools for the job.

Different Bacteria

Bacteria are of several different types. Some of the most heat-resistant forms in canning, such as spore-bearing types, are found in the soil and may contaminate the vegetables, particularly snap beans and greens which grow near the soil.

GENERAL INSURANCE

From where I sit ... by Joe Marsh

Tro... a Happy ...rriage

The Cuppers are about the happiest married couple in our town. Comfortable off, too, after Dee's fifty years of honest work. But their two most prized possessions are an old beer mug and an 1890 Floradora hat.

When they were first married, Dee allows he couldn't stand the hat; while Jane turned her nose up (privately) at Dee's fondness for a friendly glass of beer from time to time. But each figured it was the other's right ... so they lived and let live.

And as time went by, they realized that the hat and mug had become important symbols in their marriage—symbols of respect for each other's rights and differences of opinion.

From where I sit, a lot of marriages would be happier if there were more funny-looking hats and old beer mugs in the background. Tolerance is a mighty good foundation for living happily together.

Joe Marsh
