PRODUCE MORE FOOD FOR FREEDOM
the CONSERVATION WAY

The Supervisors of the Kent and Queen Anne's Soil Conservation Districts state that there are many precautions farmers can take now to insure themselves of a better wheat or small grain crop next year.

Drilling of small grain on the contour or on the level across the slope instead of up and down hill is a simple way to increase yields. This conservation practice reduces run-off and helps prevent soil washing. Heavy seedings of small grain and grass in draws and gullies prevents further gullying of fields and makes combining of small grain much easier. Gullies cut rapidly if not properly seeded and cared for.

Standing water and wet areas also cause considerable crop damage. Many times these drainage conditions can be eliminated by opening dead furrows into main drainage ditches. This can be done by plowing, with shovel or by scooping. Low spots in fields can often be brained by opening them with a plow or scoop. Opening or deepening of main outlets is also very essential to provide adequate drainage. These ditches become clogged with silt, weeds and other debris.

A few simple precautions now may mean many more bushels of grain next harvest season.

Washing Egg-Beater
Avoid putting the cogs of the egg beater in water. Rinse the spokes under cold water first, then wash only the spokes with your dishes.

Hardest Metal Soft
The hardest metal yet produced by science, carboloy cemented carbide, is so soft and fragile before it is fused at tremendously high temperatures that parts made from it are sometimes handled in sponge-rubber lined individual wooden cradles to protect them against injury.

Beverage Stains
Gin, whiskey, beer and all carbonated water drinks yield to the "water bowl" stain treatment if they are treated promptly. If allowed to set too long in white or other light-colored garments, some of the stain may remain after using the water bowl treatment. In that case, dab the stains with peroxide and allow about five minutes for bleaching. Flush with water and feather if necessary.

NAGGING BACKACHE
May Warn of Disordered Kidney Action. Don't Neglect It!
Modern life with its ceaseless hurry and worry, irregular habits, improper eating and drinking, exposure, contagion, whatnot, keeps doctors busy, hospitals crowded. The after effects are disturbing to the kidneys and oftentimes people suffer without knowing that disordered kidney action may cause the trouble.
After colds, fever and similar ills there is an increase of body impurities the kidneys must filter from the blood. If the kidneys are overtaxed and fail to remove excess acid and other harmful waste, there is poisoning of the whole system.
Symptoms of disturbed kidney function may be nagging backache, persistent headache, dizziness, getting up nights, swelling, puffiness under the eyes—a feeling of nervous anxiety and loss of strength and energy. Other signs of kidney or bladder disturbances sometimes are burning, scanty or too frequent urination.
In such cases it is better to rely on a medicine that has won world-wide approval than on something less favorably known. Use Doan's Pills. They have been winning new friends for more than forty years. Be sure to get Doan's. Sold at all drug stores.
THE REASON DOAN'S ARE FAMOUS
All over the country grateful people tell others: "Doan's have helped me; I recommend them to you." That is why we say: Ask your neighbor!
