No Hurry

The American car was flying through the Warwickshire lanes when it pulled up with a screech of brakes opposite a gate on which was leaning an old countryman.

"Say," said the driver, "kin you tell me if I'm right for W. Shakespeare's house?"

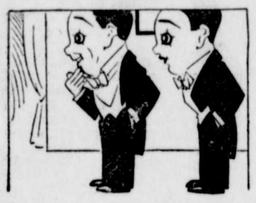

"Yezzir," replied the countryman, "but there's no need to hurry—he's been dead some years."—Tit-Bits Magazine.

Preferred It Straight

A judge was trying a case concerning the division of a stream. He had just returned to court after a good lunch, and counsel for the defense was speaking when he noticed that the judge was taking a nap. To house him he shouted, "We now come to the water, my lord—the water."

The judge, partly opening one eye, and putting his hand on the inkpot, said: "Very little, thank you."—Stray Stories Magazine.

INFORMATION

"I see you took the pretty girl into the conservatory. Did you propose?"

"No; we both kind of got cold feet. There was a married couple in there having a family talk."

Exchange of Compliments

Two perfect ladies were discussing each other, and their remarks were anything but complimentary.

At length one of them said, "You don't consider yourself a prize beauty, I hope?"

"No," replied the other, "I don't, and I must say your mother must have been very fond of children to have brought you up."—London Tit-Bits Magazine.

Cat's Away

The minister met a gamekeeper. "Come, my good fellow, why is it I never see you at church?"

"Well, sir, I don't want to make your congregation smaller."

"I don't see very well how you could."

"Well, sir, you see, if I came to church the rest of the parish would go poaching."

Music?

"Did you ever hear anything so perfectly stunning?" exclaimed the daughter of the house as she turned the radio on to a new jazz tune.

"No," replied her father. "The nearest thing I ever heard to it was when a truck loaded with empty milk cans collided with another truck that was loaded with live ducks."—Prairie Farmer.

And That's That

"I don't want you to treat my friend Jones as coldly as you do," said Robinson to his daughter. "He may not have much style, but he's a diamond in the rough."

"I know he's a diamond in the rough," replied his daughter. "That's the reason I'm cutting him."

FACTS AND FIGURES ON YOUR TELEPHONE BY

Telephone installations are increasing steadily month by month. The Western Electric Company, manufacturer for the Bell System companies, on a normal day now turns out 5,000 telephones. The materials required in the production of this great number of telephone instruments naturally are diversified and come from the far corners of the earth.

Tracing back to their sources some of the thirty-seven different materials used in the modern hand telephone alone, which is made up of 347 parts, offer a lesson in world geography. Gold from Alaska, platinum from Russia, and silver from the western United States are among the metals employed.

The silk worms of Japan and the asphalt lakes of Trinidad contribute materials. Kauri gum comes from New Zealand, tung oil from China, and carnauba wax from Brazil. Sumatra sends rubber; linen comes from Ireland, and cotton from the southern states. Cobalt, tungsten and chromium are mined in South Africa. Tin comes from the Malay Peninsula, shellac from India, antimony from China, and mica from Madagascar. The Rocky Mountains yield copper and Missouri lead, while the furnaces of Pennsylvania furnish steel.

Cable, an important factor in telephone operation, is also produced in enormous quantities. A month's output of the various kinds of cable and wire requires approximately 3½ billion feet of wire. Junk rope gathered from the ships that travel the seven seas is used in making the paper which insulates the wires in telephone cable.

The Western Electric Company, manufacturing, purchasing and distributing organization of the telephone system, produces as many as 20,000 types of apparatus involving hundreds of thousands of different parts required to meet the varying needs of telephone service. Good telephone service requires equipment of uniform design and quality. Repairs could not be made promptly and satisfactorily if telephones and equipment were not standardized. This fact alone has worked to the advantage of the telephone-using public in repairing plant following innumerable storms, floods and other disasters.

HINT TO MOTORISTS

St. Mary's Canal Busy

St. Mary's canal, which is a canal system around St. Mary's Rapids at Sault Ste. Marie, Mich., and Ontario, carries the largest amount of waterborne traffic of all artificial waterways of the world.

Fast Breeders

One reason that rats are so difficult to exterminate is the early age at which breeding starts with these rodents. Scientists state that rats begin to breed when they are only three or four months old.

"Licked Into Shape"

The expression "licked into shape," is derived from an old legend which tells how a young bear cub was born a shapeless mass and had to be licked into its proper form by its mother.

Now Ease Neuritis Pains Fast

Bayer Tablets Dissolve Almost Instantly

In 2 seconds by stop watch, a genuine BAYER Aspirin tablet starts to disintegrate and go to work. Drop a Bayer Aspirin tablet into a glass of water. By the time it hits the bottom of the glass it is disintegrating. What happens in this glass . . . happens in your stomach.

For Amazingly Quick Relief Get Genuine Bayer Aspirin

If you suffer from pains of neuritis what you want is quick relief.

Genuine Bayer Aspirin tablets give quick relief, for one reason, because they dissolve or disintegrate almost instantly they touch moisture. (Note illustration above.)

Hence — when you take a real Bayer Aspirin tablet it starts to dissolve almost as quickly as you swallow it. And thus is ready to start working almost instantly . . . headaches, neuralgia and neuritis pains start easing almost at once.

That's why millions never ask for aspirin by the name aspirin alone when they buy, but always say "BAYER ASPIRIN" and see that they get it.

Try it. You'll say it's marvelous.
