WHAT EVERY WORK SHOE WEARER SHOULD KNOW

Read the amazing facts listed just below and you will have no trouble at all understanding why millions have found supreme foot comfort — money saving, longer wear in. . .

Wolverine Shell Horsehides

1—Leather in Wolverine Shoes is Shell Horsehide, just that part taken from over a horse's hips and is tanned in the Wolverine Tanneries.

2—Shell Horsehide is considered by authorities to be the longest wearing leather known. Wolverines often give from ¼ to ⅓ longer wear than ordinary shoes.

3—The shell section of a horse's hide is approximately 1/6 of the entire hide — enough to make only 1 6/10 pairs of Wolverine Shoes.

4—Wolverine Shell Horsehide is tanned and re-tanned three times, so no matter how wet Wolverines get, they dry soft and stay soft, and are also as near barnyard and acid proof as leather can be made.

5—The peculiar structure of Shell Horsehide makes Wolverine Shoes actually scuff-proof as they not only wear longer, but also keep their good looks longer.

6—Wolverine shoes are the only Work Shoes with both soles and uppers made entirely of Shell Horsehide.

When tanned the secret WOLVERINE way, this tough reinforcing center layer found only in Shell horsehide accounts for the remarkable extra wear and greater comfort of WOLVERINE SHOES

You can't go wrong on work shoes that have so many outstanding qualities as are listed above. Try one pair of WOLVERINES and it's 10 to 1 you'll wear WOLVERINES for life. See them — try them on the very first chance you get. We have a full range of sizes in all the popular work shoe styles.
