RADIANT LIVING

As He Was Praying
By Rev. C. M. Griffith
Methodist Pastor of
Deals Island, Md.

Has it ever occurred to you that there is a marvelous enrichment that comes to us while we are in the act of prayer?

This was the experience of Jesus on the Mount of Transfiguration. The Gospels tell us that "as He was praying, the fashion of His countenance was altered, and His raiment became white and dazzling."

Did you ever notice the significance of the word, "as," in the above Scripture?

While we will not be transformed as was he, nevertheless, there is a transformation wrought in us while we are praying, that is, if we are praying aright.

We can not look at even a flickering candle but that its lights illumines our face. How then could we look earnestly into the face of God in prayer and not have His light to illumine our soul?

It is by the rays of that light which shines into our souls while we are in prayer that we see some things in our lives which we ought to change and thus as we pray, God while praying that will make those changes, the work of transformation begins.

The transformation of Jesus, however, was different. His transformation was that of saintliness suddenly illumined by heavenly glory, a glorious transformation attesting the perfect union and harmony of one's will with the will of the Divine.

As a certain one has beautifully expressed it: "The more intimately a soul is united to God the more it views things as God sees them."

As we pray, God speaks to us. And as we say "yes" to Him, our souls become illumined and transformed. Bless God for those moments when He speaks directly to the soul!

Add A Touch Of Something To Apples Serve Them Glazed

When a housewife is serving baked apples for breakfast for the family she usually just bakes the apples and lets them go at that. When there is company however, the story changes a bit and she finds herself wishing that she knew of some finishing touch to put on that baked apple. Try this next time:

GLAZED BAKED APPLES 8 apples 1 cup sugar 1 pint heavy cream 1 cup boiling water

Wash apples thoroughly, remove cores and skins from top of each apple, place in saucepan with one apple touching the other, with the peeled side up. Add the water and cook slowly, testing occasionally with a toothpick to see if they are soft. When done place in a baking dish, sprinkle with sugar and put in hot oven 425 F. basting with water in which they were originally cooked until the tops are crisp, rich brown. Serve cold with heavy cream.

Another nice touch to use when baking apples is to fill the hole where the core was removed with chopped

"In America You Are Your Own Radio Censor!"

YOU CAN HAVE WHAT YOU WANT WHEN YOU WANT IT. THAT'S AMERICAN RADIO. If freedom means anything it means freedom to make mistakes as well as to do the right thing. Broadcasters have made mistakes in their brief history. That is the way they have learned to be broadcasters. But they have made surprisingly few. And they should be left free just as they always have been in this country.

It is of paramount importance in a democracy that broadcasting must never be throttled. Today it is privately supported through commercial sponsorship during a portion of its program hours. Under this system—wherein the advertiser, NOT TAXES, pays the bill—it has demonstrated that an equal opportunity can be given to broadcast all sides of important controversial public issues. Thus can radio give expression to every viewpoint, rather than be censored or one-sided, as fed to listeners of the dictatorial governments. Thus has freedom of the air been established to take its place with freedom of speech and freedom of the press.

Here in America we still have freedom and liberty and there is at our disposal a medium that can spread the truth from crowded city to remote farm. Industry is learning how to use this new medium to the advantage of the public and itself. The listener at all times has the radio program under hair-trigger control. He has only to move his finger and the program is obliterated.

A message in the interests of the American System of Broadcasting by one proud to be a part thereof; by one privileged from time to time to have contributed to its progress; by one seeking new opportunities to broaden its service to the American listener.
