TRU-BLU BEERS-ALE THAT FAMOUS OLD BREW

Made by the Pennsylvania Dutch

NOTICE TO DELINQUENTS IN THE PAYMENT OF CORPORATION TAXES, TOWN OF GARRETT PARK, STATE OF MARYLAND.

By virtue of the power and authority vested in him by the Act of 1912, Chapter 799 (as amended) of the General Assembly of Maryland, if the taxes shown to be due in the following list, together with the interest accrued and the proportional cost of advertising be not paid before Saturday, April 30, 1938, the Clerk and Treasurer of Garrett Park, a municipal corporation of the State of Maryland, will sell at Public Auction to the highest bidder FOR CASH, on

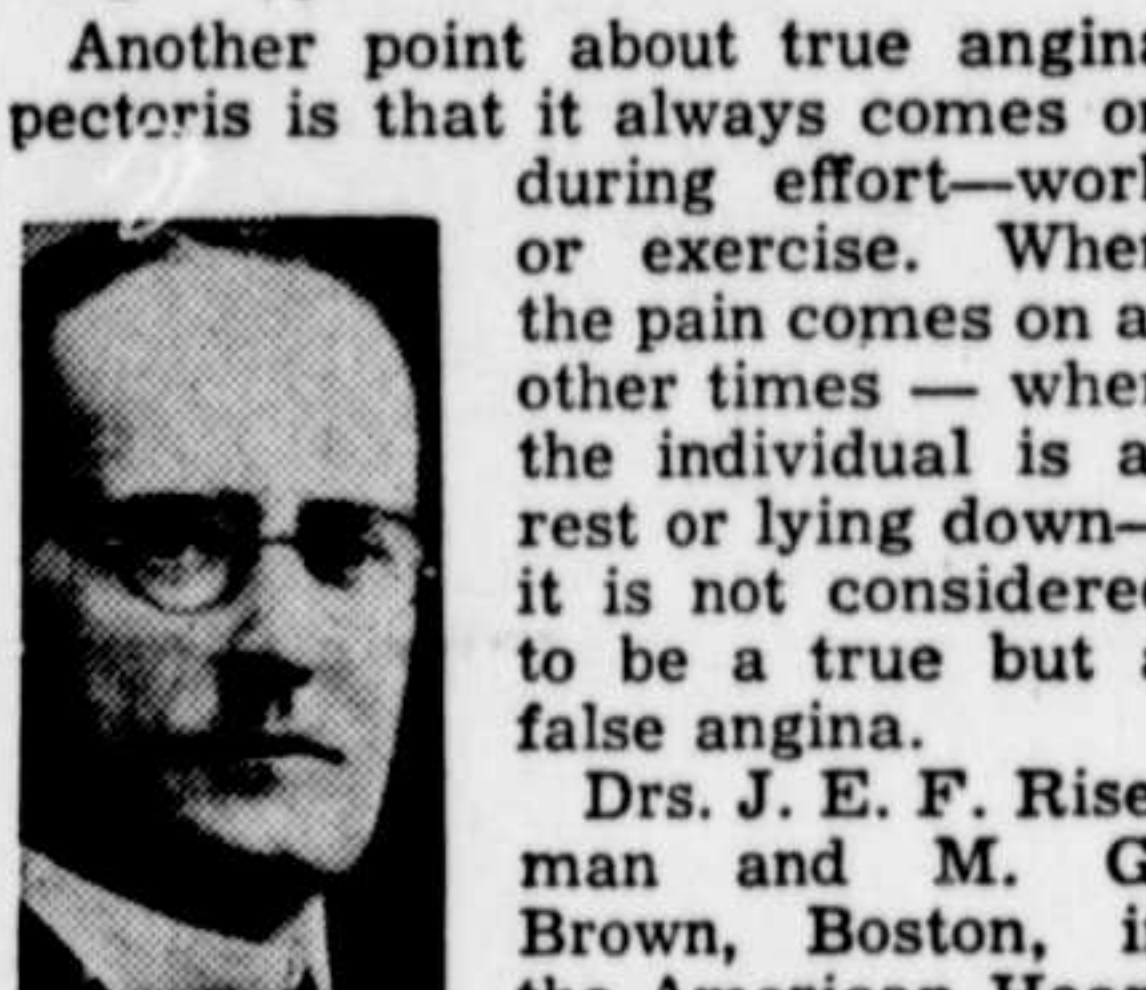

APRIL 30, 1938,
 at 3:00 o'clock P. M., in front of the Post Office in Garrett Park, Md., the hereinafter described pieces or parcels of land or property, situated in Garrett Park, Montgomery County, State of Maryland, and assessed to the persons named, or so much thereof as may be necessary to pay the total amount of taxes, penalties, interest and costs due and unpaid for the current year and such arrears, if any, as may be due from previous years on each piece or parcel or from each person or corporation assessed, as provided by section 260 of the amended charter. Such interest, penalties and costs to be computed to date of sale. All conveyancing, recording, etc., at the expense of the purchasers.

Assessed in the Name of	Description of Property	Taxes and Penalties	Cost	Total
Brown, Mary C.	Lot 10, Section 95 Lot 11, Section 95 Parking between Sections 94 and 95. Said Lots 10 and 11, of Section 95, being improved by a certain one story frame dwelling.	\$8.99	\$3.50	\$12.49
Brundage, C. Ernest and M. S.	Lot 2, Section 96, said lot being improved by a certain one story frame dwelling with a built in garage.	13.08	3.50	16.58
Berrier, Joseph P. and Edna Z.	South 70 ft. of Lot 4, Section 95 South 70 ft. of Lot 5, Section 95	1.09	3.50	4.59
Fraser, James S.	Lot 8, Section 53	2.30	3.50	5.80
Mercer, John E.	Lot 22, Section 93	2.02	3.50	5.52
Viets, William E.	Lot 9, Section 53	1.09	3.50	4.59

ROBERT H. GAMBLE, Clerk and Treasurer,
 Garrett Park, Maryland.

Angina Pectoris
By DR. JAMES W. BARTON

WHEN there is a "griping" pain in the region of the heart which may go up the left side of the chest and sometimes down the left arm, it is only natural that this pain would be considered angina pectoris or breast pang. If the other symptoms—stopping still and supporting the body with the hand and the other hand held over the heart—are present it would be definitely called angina pectoris.

Another point about true angina pectoris is that it always comes on during effort—work or exercise. When the pain comes on, at other times—when the individual is at rest or lying down—it is not considered angina pectoris.

Dr. J. E. F. Rise-man and M. G. Brown, Boston, in the American Heart Journal, recorded their investigation of 207 patients suspected of having angina pectoris. All the usual methods of testing were used; that is, the history of the symptoms, X-ray, tracing the outline of the heart, the heart rate, the metabolism (rate at which body processes work), effect of exercise or work.

Five Chief Symptoms.
 These physicians state the five important characteristics or symptoms of angina pectoris:
 1. The attacks were sudden in onset.
 2. The attacks lasted but a short time, usually just a few seconds.
 3. The pain was located in the front of the chest and inner side of the arm.
 4. The attacks were brought on by exertion in the cold.
 5. The attacks consisted of a vague, indescribable sensation of unrest or distress.

"Patients who lacked one or more of these five characteristics or symptoms proved to have either no heart disorder as the cause of their symptoms or to have not only angina pectoris but some other complicating ailment."
 When there was difficulty in deciding definitely as to whether the case was true angina pectoris, the effect of exercise—running upstairs, walking briskly hopping or running on the one spot—usually decided the matter, as true angina pectoris occurs during exercise or effort.

"Thus when you feel any pain over the heart or under the breast bone do not become alarmed and think you have angina pectoris, as most pains in this region are due to pressure of gas in the stomach or intestine."

Removal of Teeth.
 A champion amateur and later professional boxer consulted his physician regarding a pain in his lower back. He stated that the pain got easier or even passed away when he was exercising, but was so bad at night that he couldn't get much sleep. He felt "tired" all the time.

As the physician could find no other trouble present—tonsils, gall bladder, sinuses—and X-ray showed some inflammation of the lower back, the boxer referred to his dentist. The dentist admitted that there was a little trouble present, but not enough to justify the removal of such otherwise good teeth in a young man of twenty-one.

The young man then consulted another dentist, equipped with his own X-ray apparatus, who, after examining these new films, declared that the two teeth should be removed at once. Both teeth were removed and found to be infected, the odor from one being particularly disagreeable. The pain in the lower back disappeared within two or three days, and the young man resumed training in less than a week and a few weeks afterward won the boxing championship.

It is in such cases as the above that the physician and the dentist are placed in an awkward position. The dentist could readily extract the tooth or teeth and insert some bridge work but he knows that nothing can do the work as well as the patient's own teeth and he tries to save them. Perhaps he feels that there may be some other source of infection that is causing the symptoms and if teeth are not removed this source may be found.

On the other hand, the physician feels that as he has checked all other possible sources, the teeth must be to blame, and that the infection present may be due to very dangerous organisms which may sooner or later cause serious complications and possibly death.

First of Societies
 The first of the English Swendenborgian societies was established in London four years after his death and was known as "A Society of Gentlemen for the Preservation of Baron Swendenborg's Works."
Naming Mount Rainier
 Mount Rainier was named after the British admiral, Peter Rainier, who figured in the American Revolution. The name was given by Capt. George Vancouver, English navigator and explorer.
Ancient Landmark
 Blackbeard castle, an object of interest to all who visit the Virgin Islands, serves to remind of the days when pirates roamed the seas and raised havoc with ships and their cargoes.

Site of New Hampshire Was Gift to John Mason

New Hampshire was originally a grant of land from the ill-starred Charles I to John Mason, merchant and shipmaster, in 1629. The latter founded and named his new possession, but found to his cost that a tract of virgin forest on a new continent could easily swallow a fortune and still yield no profit. In fact, this well meant gift ruined Mason. But settlement had been started at Strawberry Bank, now Portsmouth, and those at Dover, Exeter and Hampton followed.

Among the early settlers there must have been artisans of various kinds, but records of them are fragmentary and hard to locate. Of "joyners" working in the New Hampshire grants during the Seventeenth century I have found but a scanty dozen, writes Paul H. Burroughs in the American Collector. The earliest one was Thomas Crockett, who in 1633 was working at Piscataway. By the latter part of the century, however, there were several families who had accumulated fair fortunes for the period. For instance, we find the will of Walter Abbot, of Dover, dated 1652, listing about 150 acres of land, cows, oxen, pigs, and one mare. In addition were "Ye new dwelling house," a log house, and outbuildings.

In the log house the furniture included a bedstead, "4 joynt stools and one chare," two tables and forme, a bedstead table, and a chest. The new dwelling house contained "1 table and forme, 1 looking glass, 3 bedsteads and old valance and 1 table board." Thus we see furniture was scarce, but not so highly prized as one might think, as the "4 joynt stools and 1 chare" were inventoried at ten shillings and the looking glass at two.

Cephenomyia Fly Found

Fastest Thing in World
 A fuzzy fly, the Cephenomyia, is credited with the speed championship of the world by Dr. Roy Chapman Andrews, director of the American Museum of Natural History, in an article in the museum's magazine, Natural History.

The insect can attain a speed of 818 miles an hour, and travels faster than sound. Sound travels 1,089 feet a second, while the Cephenomyia, says Dr. Andrews, can fly 1,200 feet a second, and therefore can keep ahead of its own buzz. Dr. Andrews admits he has never observed Cephenomyia's flight in a wind tunnel, but says that the estimate of the insect's speed is based on the observations of a scientist who devoted years of study to this fly.

Cephenomyia is a member of the family of bot flies, which lay their eggs under the skin of animals. This particular fly, which is about a half inch long, is found in New Mexico, and lays its eggs under the skin of deer.

"Perhaps we had better not comment ourselves," Dr. Andrews says, "as to whether it is the superior streamline, or the extraordinary wing strength, or merely the knowledge of how to use their wings that gives some insects their speed. Science has yet to solve this riddle."

Marijuana's Origin

Marijuana's origin goes back to 1090 when sheik-dominated tribes in the Orient were introduced to the drug. Sheiks subjected tribesmen to the drug. Finding pleasure in it, they became more subjugated because they wished the opiate and could get it only from the sheiks. Known in the East as hashish, the drug gave its name to a cult or tribe known as Hashishans. Its members were murderous under the influence of the drug and from the name of the cult comes the modern word "assassin." On this continent the plant has the scientific name of cannabis sativa. Commonly the drug is known as "loco weed," "muggles" or "reefer." Used most commonly in cigarette form, it produces a feeling of acceleration and results in high states of irrationalism. Destroying brain tissue, it leads to insanity.

Old Autographs in Cave

Practically all of the exploring of Mammoth cave, Kentucky, before the Civil war was done by the use of reed torches and home made tallow candles. In those days it was a practice of the visitors who were taking routes through the cave to tie their candles on walking canes and smoke their names on the walls and ceiling of the cave. At one place in the cave this practice was carried on so extensively that it has been named Register hall. Here many of the dates are a century and a quarter old.
