## HOG FEED

The most valuable pig for a breeder to raise is the one that will give him the most money for the feed consumed.

Spring Garden Hog Feed is all food, no waste. The protein content is practically all digestible as compared with 70% digestibility in corn.

It is made from corn germ or hearts, corn oil meal, corn bran and part of the crown portion of the kernel. Thoroughly kiln-dried and sterilized; packed clean by machinery; free from dust and adulterants. Guaranteed to keep pure and sweet and do all we claim for it or money back.

Spring Garden Hog Feed is the most economical pork producer on the market. Superior feeding value proven by Agricultural Station tests.

Farmers who raise both cereal crops and stock can profitably sell their corn and use Spring Garden Hog Feed. This can be readily demonstrated by breeders who will compare results.
