Surely, he could leave no better legacy to his family.

And as "Mose" has always been true to his people, so he intends to continue to be. He intends to keep on selling them the best clothing for the money.

Here's the Little Machine That Is Revolutionizing Wood Cutting

WADE'S Gasoline DRAG SAW
Cuts 25 Cords A Day

Has a capacity of 25 cords a day and will pay for itself in a season's work and leave you a handsome profit besides.

When loaded with gasoline and water it weighs only 285 pounds. One man can move it on logs and it only takes two to shift it from one log to another. Don't be fooled with rigs mounted on wheels. They could not be hauled otherwise on account of their weight. They have 4-cycle engines of only 3 horse power with valves and springs. Our 2-cycle engine is compact light weight (being 1/2 or only 285 pounds complete) 4 horse power and eliminates valve and spring trouble. We furnish 6 foot blade regular; 5 or 7 foot if desired. There is only ONE WADE and it has half a century reputation behind it.

Cuts a 40-inch log in five minutes, about ten times as fast as two men with a cross-cut saw can do it in the old-fashioned way.

It's just as far ahead of hand power as the automobile is ahead of walking—in fact, it's the application of the auto principle to the saw.

The WADE SAW is equipped with a 4 horse power, 2-cycle gasoline engine, driving the saw with abundant power, while a safety clutch prevents the saw pinching in the cut. Saw has 20-inch stroke and one gallon of gasoline will cut about ten cords of wood.
