efficient and faithful public servant,

Ramsberg & Ehert's make. L

HALL & GREENWELL,

The Official Paper of Con-And Newspaper for the People.

IT will be seen by the annexed extract from a letter of General Washington to David Stewart, dated New York, 17th March, 1790, that the idea of such a paper as I propose to make the Globe originated in the mind of the Father of his Country. He said: "it is to be lamented that the editors of the different as the decisions, would then come fully before the public and afford the best data for its judgment. "-Sparks's Wri tings of Washing on, vo'. 10, p. 84.

THE DAILY GLOBE THE CONGRESSIONAL GLOBE. In surrendering my interest in the organ of a great political party, I cherished the purpose of continuing the Congressional Globe, and, i possible, in time, to perfect it into a full history of the action of Congress, giving the debates accurately and fully with the proceedings-all stamped with the verity of an official record. From the passage in the letter of General Washington, which I have quoted, it will be perceived that he thought this office might be combined with that of a regular newspaper; and it is certain that the avidity of the public for news of the less important kind graetly contributes to give wings to the weightier matter which may be called Congression-

Having succeeded in my purpose of perfecting the reports of the debates in Congress and giving them the official stamp, I now propose to send them abroad, in connection with the 219 news of the day, in such baste as shall outstip 299 full and accurate intelligence sent from the 851 seat of Government in any other form whatever. It will even anticipate the scraps of news forwarded to cities within two hundred and fifty miles of Washington by telegraph .-Before the events thus transmitted are publish-878 ed in the morning papers, (for instance, of the 840 city of New York,) the Globe containing them 887 will have reached the post office of that city by the Express Mail of the previous night .-The process by which this will be effected

now lay before the public. I will have a corps of sixteen Reporters in 753 | Congress; each in succession will take notes during five minutes, then retire, prepare them for the l'ress, put them slip by slip in the hands 844 of compositors, and thus, while a debate is going on in Congress, it will be put in type, 17 be in print. I shall by this means be enabled oc to send by the Express Mail of ao'clock p. m. for the East, West, and north, and by that of 9 23 o'clock p. m. for the South, all the proceedings 35 of Congress up to the ordinary hour of adjorn-38 ment. Thus the accurate debates of Congress will reach the cities two hundred and fifty miles from the Capitos before their daily morn-

ing papers are in circulation. The miscellaneous news I shall be careful to 48 gather from remote sections of the country by 14 telegraph. I will obtain from the Executive Departments, through official sources, the mat-- 125 ters of moment transacted in them, and, through agents employed for the purpose, all 92 the city news of consequence in sufficient 80 | time to be put into the Globe and mailed in the 66 Express Mail trains. In this way I hope to create a new era in the dissemintion of news from Washington. Hitherto no newspaper has attempted to give authentic accounts of things done at Washington before the public 31 mind at a distance had received its first impre-

sions from irresponsible telegraphic dispatch or by letter-writers biased by peculiar views. Washington has now become so great a centre of political interest during all the yearthe proceedings of the Executive Departments 10 and the information collected by them even 68 during the recess of Congress is of so much importance to the interest of every section of the country—that I shall continue the publica-30 tion of the daily paper permanently, with a view to become the vehicle of the earliest and

96 most correct intelligence. 91 It is part of my plan to reduce the price of 58 the daily paper to half that of similar daily papers; and thus I hope to extend its circula-82 tion so as to invite advertisements, I will 100 publish advertisements of the Government .-To subscribers in the cities I hope to submit 71 such terms as will induce them to advertise 62 their business in every village throughout the Union, where the Globe is sent daily under the franks of members of Congress, all of whom 30 take it, and some of them a large number of
