

## Announcing NEW CHEVROLET TRUCKS FOR 1936

New Power •• New Economy •• New Dependability

**NEW PERFECTED HYDRAULIC BRAKES**  
always equalized for quick, unswerving, "straight line" stops

**NEW FULL-TRIMMED DE LUXE CABS**  
with clear-vision instrument panel

**CHEVROLET** You are looking at the most powerful truck in all Chevrolet history . . . and the most economical truck for all-round duty . . . Chevrolet for 1936! Chevrolet has made three major improvements in these new 1936 Chevrolet trucks: (1) It has increased power. (2) It has reduced operating costs to a new record low. And (3) it has modernized truck design and construction in every important part and feature. Buy one of these new Chevrolet trucks, and up will go power and down will come costs on your delivery or haulage jobs.

**6% NEW GREATLY REDUCED G.M.A.C. TIME PAYMENT PLAN**  
The lowest financing cost in G.M.A.C. history. Compare Chevrolet's low delivered prices.

**NEW HIGH-COMPRESSION VALVE-IN-HEAD ENGINE**  
with increased horsepower, increased torque, greater economy in gas and oil

**FULL-FLOATING REAR AXLE**  
with barrel type wheel bearings exclusive to Chevrolet

Rising Sun, Md.

### RAT-SNAP KILLS RATS

Also mice, roaches and beetles. One package proves this. RAT-SNAP comes in cakes. They eat it without any bait. Doesn't matter how much other kinds of food is around. Apply it 1st, 4th and 7th day and cut each cake in 80 pieces, place it where the vermin is seen to run.  
25c size—1 cake—enough for Pantry, Kitchen or Cellar.  
35c size—2 cakes—for Chicken House, coops, or small buildings.  
75c size—5 cakes—enough for all farm and out-buildings, storage buildings, or factory buildings.  
Papka & Zuelke, Campbell, Minn., say they "tried a 5-cake package and did wonders. Will most certainly make short work of them after Rat-Snap gets on the ground."

### CHRISTIAN SCIENCE SERVICES

"Life" will be the subject of the Lesson-Sermon in all Churches of Christ, Scientist, on Sunday, Jan. 19. The Golden Text will be from I John 5:11—"This is the record, that God hath given to me eternal life, and this life is his Son."

Among the citations comprising the Lesson-Sermon will be the following from the Bible—Matt. 19:16—"And behold, one came and said unto him, Good Master, what good thing shall I do that I may have eternal life? And he said unto him, Why callest thou me good? there is none good but one, that is God; but if thou wilt enter into life, keep the commandments."

The Lesson-Sermon also will include the following passage from the Christian Science textbook, "Science and Health with Key to the Scriptures," by Mary Baker Eddy, page 289—"Man is not the offspring of flesh, but of Spirit,—of Life, not of matter. Because Life is God, Life must be eternal, self-existent. Life is the everlasting I am, the Being who was and is and shall be, whom nothing can erase."

With the increase in the burden of taxes the question naturally arises as to the justice in the law that exempts members of congress and other officers of the government from the payment of income tax. Especially since in most instances these parties receive more regular and substantial income from the government pay roll than they would be able to earn from any private paymaster.

### LARGEST CHEVROLET PRODUCTION IN HISTORY

Detroit, Jan. 8.—Chevrolet Motor Company today announced that its total production of cars and trucks in 1935 was 1,066,196, making it the third largest year in the history of the company, and its fourth year to exceed 1,000,000 units in output. Production in December, the fourth highest month of the year, was 115,483, a new record for the month, exceeding the previous high December of 1930 by more than 31,000 units. As significant of the change brought about by the industry's November introduction of new models, instead of in January, the announcement, issued by M. E. Coyle, president and general manager, stated that production in the fourth quarter of 1935, totalling 293,387 units, was more than double the fourth-quarter production of 1934, and set an all-time record for the final quarter of the highest previous last quarter was 159,478 units, in the industry's all-time peak year of 1929. Every quarter during 1935 showed a gain over the corresponding period of 1934, and the final quarter was the second largest of 1935, instead of the smallest as in the preceding year. Quarterly production was as follows:

Quarter	1934	1935
1st	223,010	234,673
2nd	302,083	316,881
3rd	215,997	221,255
4th	127,102	293,387
Total	868,192	1,066,196

The year just closed ranks as the third highest in the company's production among the four years in which production has exceeded one million units. The million car years are as follows: 1927, 1,001,880; 1928, 1,193,212; 1929, 1,328,605; 1935, 1,066,196.

Chevrolet built its 11,000,000th car early in December. Its total all-time production, from 1912 to the close of 1935, is 11,105,278.

### NEW CHEVROLET TRUCKS FOR 1936

New Chevrolet trucks for 1936, comprising a wide range of standard body types mounted on half-ton and 1½-ton chassis, which carry numerous advances in engineering and improvements in operation, are announced by Chevrolet Motor Company for introduction in January.

Design changes, including a restyling of the sheet metal and the adoption of a coupe type cab with solid steel top, have enhanced the appearance of the 1936 models.

In the chassis, the most noteworthy development is the adoption of hydraulic brake operation in conjunction with improved brake mechanisms at the wheels.

Engine improvements include increased power, better fuel and oil economy, and greater durability. The major change in the engine is the use of full length water jackets, in combination with higher compression ratio (6 to 1).

The 1½-ton chassis now has a full-floating rear axle, with a stronger housing that includes a malleable iron differential case and seamless steel axle tubes. Rear axle loads are carried on the housing, instead of on the axle shafts, which now have only to drive the wheels.

Passenger car comfort for the truck driver is offered in the new coupe type cab, which presents a streamline appearance and reduced over-all height in an all-steel structure having a one-piece solid steel top.

In changing to hydraulic brakes on both chassis models, Chevrolet has adopted this principle of brake actuation to its own design of brake mechanism within the brake drums. A hydraulic cylinder with double opposed pistons is used to actuate each pair of articulated brake shoes. The master cylinder is mounted on the frame in the 1½-ton model, and on the clutch housing of the half-ton. The hand brake lever actuates both service brake shoes in each rear wheel. The connection is by flexible cable, attached to a lever and toggle mechanism within the rear brake drums.

Engines of the two chassis models are identical in design and in horsepower and torque. Maximum horsepower is 72 at 3200 r. p. m. Maximum torque is obtained over an unusually wide range of engine speeds, 155 foot pounds being maintained all the way between 900 and 1500 r. p. m.

Dredging operations, which have been started on the Long Marsh ditch between Caroline and Queen Anne's counties, will improve the drainage conditions for 43,000 acres of land. This is one of the projects handled by the CCC drainage camp at Goldsboro.

### JOHN RANDS Teacher, Lecturer, Counsellor Astrological COLORA - MARYLAND

#### The Astrologer Forecasts

**FOR YOU**—If born between Jan. 17-23, incl., prepare for a period of expansion and development in your personal affairs during the last three months of 1935 and the first six or seven months of 1936. Worthwhile effort during 1936 will bring you financial reward during the summer of 1937. Avoid domestic friction and watch home and estate matters during last ten days of March; cooperate with others and avoid quarrels during the first half of August; watch reputational affairs and be diplomatic in dealings with social and occupational superiors during the first ten days of January, 1937.

**FOR EVERYBODY**—The period Jan. 17-23, incl., accentuates reputational matters, business and social, with criminal activities emphasized and stressed beyond the normal. Also: prevalence of high nervous tension affecting World Leaders in politics and industry. This is a period during which to guard against the reactions of emotional display.

Jan. 17: Guard speech and writings. Promote romantic interests.

Jan. 18: Artistic and social affairs and interests favored.

Jan. 19: Guard health. Avoid argument or precipitate action.

Jan. 20: The evening is stimulating mentally and emotionally.

Jan. 21: Evening hours favor social affairs and financial interests.

Jan. 22: The development of unusual situations.

Jan. 23: Care with opposite sex; actions of others brings anxiety.

Storm Periods: Jan. 19-20, and Jan. 23-25.

#### MONTHLY FORECAST

Based upon the New Moon of January 24, 1936

The Lunar period, Jan. 24-Feb. 22, 1936, will be marked by many unfavorable trends in National and International Affairs. Distress will be world-wide and caused from scarcity of food-stuffs, redoubled burdens, fears, indecisions and anxiety.

#### The United States

Extremely bad weather, causing traffic tie-ups, will mark the period Jan. 24-Feb. 22, 1936. Labor troubles and disruption in Services, with the lowering of the National health. The Administration encounters violent opposition and almost insurmountable obstacles. Intense feeling in Administrative circles over the financial situation. Shipping and all transportation and communication facilities will suffer. The stock Market will react unfavorably to conditions.

#### World Affairs

Earthquakes of more than usual intensity will mark this period. Peoples will suffer from scarcity of food and deprivations in general. Riots and disorders of an industrial nature and in prisons. The overcrowding of hospitals. Propaganda of an industrial nature will be spread far and wide. Secret, undercover activities and confidential arrangements between nations. Treachery in high governmental circles. Definite shifts in the foundations of governments, organizations and in personal affairs bringing important revisions. Accidents and injuries above normal. Physical suffering caused by the violence of nature as well as the passionate outbursts of powerful men. Portugal and Spain, Alexandria, Egypt, will be centers of important developments. Individuals should avoid making important and far reaching decisions during the last week of January, this year, for the astral configurations portend disastrous results for all things started at this time.

JOHN RANDS, Astrologian.

#### IN GOD'S BLESSED KEEPING

Evangelist John Moses Baker  
Baltimore, Maryland

They are in God's blessed keeping,  
All our loved ones gone before;  
Safe forever from harm and temptation,  
On the happy golden shore.

They are in God's blessed keeping,  
In that land of perfect rest,  
With the blood-washed throng in  
Heaven,  
The homeland of the blest.

They are in God's blessed keeping,  
Life's burdens all laid down,  
And the crosses sometimes heavy,  
For a bright and starry crown.

They are in God's blessed keeping,  
The toiling time all over and the  
care,  
They watch and wait our coming,  
In that glad and Holy City over  
there.

They are in God's blessed keeping,  
Every battle fought and won,  
What a glorious, happy meeting,  
When our work on earth is done.

A horse chestnut tree on the property of William Woodward, near Collington, Prince George's county, is said to be 35 feet high and has a spread of 61 feet. The circumference of this tree, 4 1/2 feet above the ground, is ten feet ten inches.

## Rising Sun High School News

### THE JOURNALISM CLUB

Editor-in-Chief.....Dorothy Hindman  
Managing Editor.....Hope Reynolds  
News Editor.....Alice Carr  
Sports Editor.....Paul Graybeal  
Activities Editor.....Hazel Hall  
Campus Editor.....Ida Tome

For four years we have had in our high school what is known as the Civic Club. The purpose of this club is to promote student government. That is, to show the students what responsibility they have toward their school.

The Civic Club meets for an hour every Monday at alternating periods. The members of the club are elected by each class. Three representatives from the Junior and Senior classes; two representatives from the Freshmen and Sophomore classes and one representative from the Seventh Grade. The officers of the Civic Club are as follows: President, Alfred Gyles; Vice President, Catherine Keilholtz; Secretary, Lila Todd.

The most important work of the Club is to appoint monitors to different positions in the building. These monitors are not to make the students go around in perfect order, as is sometimes thought; but to see that they don't go running through the corridors and down the steps, or that they do not loiter in the halls and locker rooms.

This year the Civic Club has purchased pins that are given to the monitors while they are on duty. These pins make the monitors feel that they are really holding a position of responsibility. The monitor system is working quite well and we are hoping that the teachers and students will continue to cooperate in making the Civic Club this year, a bigger success than ever before.

#### The School Orchestra

Our school orchestra, under the direction of Mr. Harry Rinehart, is making rapid progress. The members have purchased new books and are able to play several numbers well.

On Thursday, January 2, due to bad weather conditions, Mr. Rinehart was unable to come to the orchestra rehearsal. The absence of Mr. Rinehart gave the members time to organize and elect officers. Paul Graybeal was elected president and Alfred Gyles secretary and treasurer. Some of the business taken up was that of payment of dues. A definite amount was not decided upon but it will probably be five or ten cents weekly.

Mr. Rinehart has been very faithful in coming every week to instruct the orchestra, without charging them anything. To show their appreciation of this the orchestra gave him a Christmas gift of five dollars.

—Paul Graybeal.

#### Reports

The reports for the November-December period were issued Thursday, January 9. This time there were fifty subject failures, which was less than the previous time.

Several things are being done by the faculty to lessen these failures. The teachers are making reports of student failures to the principal every two weeks. The principal reports these failures to the students and letters are sent to the parents, so that they will understand the causes of these failures.

Good grades are very important in considering college entrance. A student must have 60% A's and B's with no D's or E's for the last two years in high school to enter college. The marking system used in our school is as follows:

- A indicates superior work.
- B indicates work is above average.
- C indicates average work.
- D indicates work is below average.
- E indicates failure.

—Hazel Hall.

#### Rising Sun Leads In Attendance

Our high school led the county in attendance last month with an average of 93.0. The Freshmen X section led the school with an average

#### GONE ONWARD

Evangelist John Moses Baker  
Baltimore, Maryland

Gone onward to that better land,  
Her presence still is near;  
Her voice still echoes in our soul;  
We have no doubt or fear.

The beams of light fall pleasantly  
On yonder hill and dale;  
Her anchor cast forever now,  
Within the heavenly vale.

There is no death,—what seems to be,  
Is another life more beautiful and grand,  
In yonder city fair and bright,  
And just beyond the strand.

There is no death,—just going home  
To Father's house on high;  
Waiting our coming over there,  
Beyond the starry sky.

We will meet and be together,  
Where partings are no more;  
And sing the old songs over;  
No storms ever break upon that shore.

Many a man is worth less than the insurance he carries.

#### Dramatic Club

Selections for the two plays to be presented by the Dramatic Club early in March are being considered at the present time. While no definite choices have been announced as yet, it is probable that one farce and one comedy-drama will be given. Also the inter-class contests and assembly program are being planned.

One play is actually under way that will be presented before the Dramatic Club, which is entitled "Where But In America," and those having roles are Harvey Townsend, a typical American husband; Florence Drew, his equally typical American wife; and Ann Roberson, the highly valued maid.

—Mary Margaret Stevens.

#### Home Room Program

The Freshman Home Room program period was opened by Russell Johnson. The first part of the period was devoted to reading poetry and stories. Those who took part were Jean Bryant, Hazel Ewing, and Lawrence Wiggins. A play was then given entitled "The Christmas Child." The characters were: Mother, Ruth Baugher; Betty, Mary Robinson; The Christmas Spirit, Emerson Benjamin. The rest of the period was devoted to the singing of carols and the telling of short jokes. The next home room program will be held on January 8th, 1936. The committee in charge is Anna Mae Fristoe and Hazel Ewing.

—Helen Logan.

#### Personal Chatter

A famous scientist once said, "My idea of a joke is to see someone trying to eat spaghetti with chop-sticks." Bad weather last week caused a great amount of absence Thursday and Friday, the first two days after Christmas vacation. There has been though a great improvement. Monday not more than seven or eight were absent in the whole school.

A group of boys in school made an attempt at making Christmas candy and what an attempt it was! It was not very good. As is told by many people, it tasted like flour and water. Better luck next time boys.

We were very glad to see two of our graduates back for a visit in our school—Anna Haines and George Logan. All graduates are welcome to visit our school at any time.

Mr. Zimmerman in history class asked Dorothy Elville who Frances Perkins was. Dorothy answered, "Secretary of Labor." Then Mr. Zimmerman asked "What sex is SHE?"

In Biology class the other day Mr. Hoover asked Mary Margaret Stevens to name some foods which contained vitamins. She named cereals, honey and sugar. No catching what she said he asked, "Cereals, honey—sugar?" Was his face red?

—Ida Tome.

#### Class Rings

The Junior Class this year purchased their class rings from J. R. Woods and Company. There were also several members in the Senior Class and several graduates who purchased rings and pins. All those who received rings were very much pleased with them.

—Alice Carr.

attendance of 96.8. The attendance of the other classes were: Freshmen Y, 93.5; Sophomore X, 93.8; Sophomore Y, 89.7; Juniors, 93.7; Seniors, 90.3. The county average was 91.0.

There are usually a great many absences during January and February because of bad weather, but come of everyone! Lets fool Old Man Winter this year.

—Dorothy Rands.

### NO MORE RATS

mice, roaches or beetles after you use RAT-SNAP. It's a rodent killer. They eat it without any bait. Doesn't matter how much other kinds of food is around. Apply it 1st, 4th and 7th day and cut each cake in 80 pieces, place it where the vermin is seen to run.

25c size—1 cake—enough for Pantry, Kitchen or Cellar.

35c size—2 cakes—for Chicken House, coops, or small buildings.

75c size—5 cakes—enough for all farm and out-buildings, storage buildings, or factory buildings.

The Weisel Seed Co., Inc., Harrisburg, Va., say "Out of the neighborhood of 700 to 1,000 customers we have only had four dissatisfied ones so far, which we consider a very fine record."
